Emergency Hotline Card

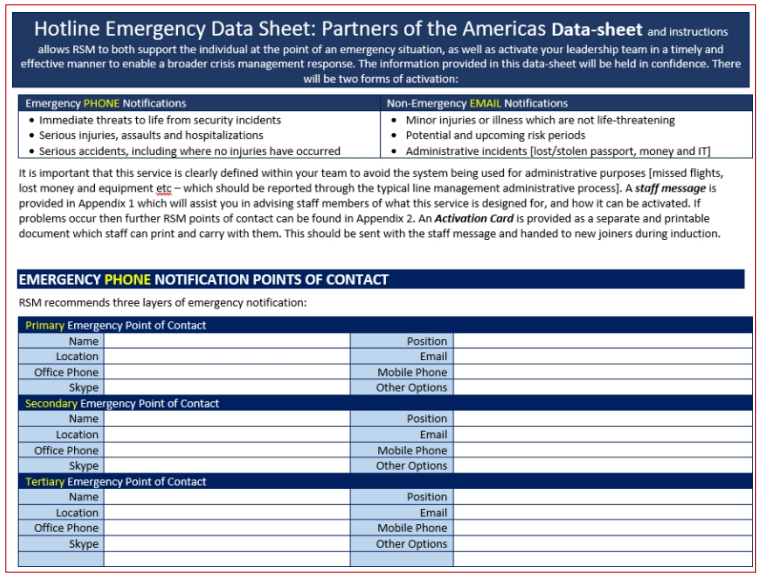
SIGMA\7 RSM
RESILIENCE AND TRAINING

This hotline is only to be used in the event of an immediate life-threatening situation while travelling internationally for work.

Hotline Number

[USA 001] 209-330-8454

This is a United States phone number, as such you will need to know the international dialing code for the country you are calling from. If in the United States, ring 911 for the police, fire and medical services.



Hotline Emergency Data Sheet: Partners of the Americas **Data-sheet** and instructions

allows RSM to both support the individual at the point of an emergency situation, as well as activate your leadership team in a timely and effective manner to enable a broader crisis management response. The information provided in this data-sheet will be held in confidence. There will be two forms of activation:

Emergency PHONE Notifications	Non-Emergency EMAIL Notifications
• Immediate threats to life from security incidents • Serious injuries, assaults and hospitalizations • Serious accidents, including where no injuries have occurred	• Minor injuries or illness which are not life-threatening • Potential and upcoming risk periods • Administrative incidents [lost/stolen passport, money and IT]

It is important that this service is clearly defined within your team to avoid the system being used for administrative purposes [missed flights, lost money and equipment etc – which should be reported through the typical line management administrative process]. A ***staff message*** is provided in Appendix 1 which will assist you in advising staff members of what this service is designed for, and how it can be activated. If problems occur then further RSM points of contact can be found in Appendix 2. An ***Activation Card*** is provided as a separate and printable document which staff can print and carry with them. This should be sent with the staff message and handed to new joiners during induction.

EMERGENCY PHONE NOTIFICATION POINTS OF CONTACT

RSM recommends three layers of emergency notification:

Primary Emergency Point of Contact			
Name		Position	
Location		Email	
Office Phone		Mobile Phone	
Skype		Other Options	
Secondary Emergency Point of Contact

TIME SENSITIVE INSURANCE PROVIDER DETAILS

By providing insurance details RSM can notify the affected individual of ***time critical information*** which may enable a "self-help" response to an incident [such as activating medical insurance locally if injured or unwell]. Only insurance provisions which the individual needs to be aware of should be provided – allowing RSM to pass on these details directly to the staff member. Where situations are serious then RSM will activate the organization to alert them to the situation.
