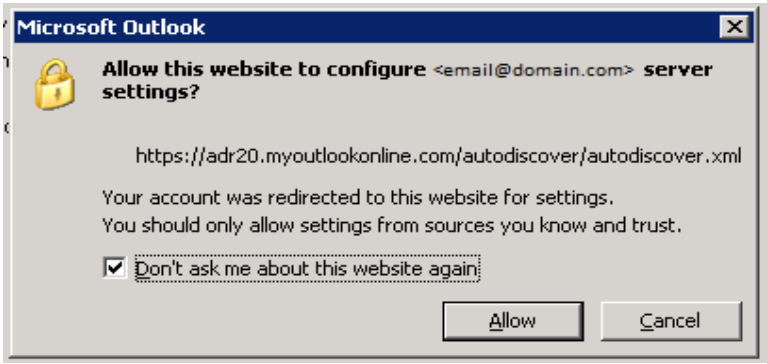
Connecting to Outlook after the Migration

On Wednesday night, we will be migrating your email to our latest Exchange platform. You will need to reconfigure your devices just a little the morning after in order to start using the new platform. A mindSHIFT engineer will be onsite to assist you with this and troubleshoot any issues.

When you open Outlook for the first time after the migration night, you may be prompted to enter your credentials. Outlook may go into a disconnected state. Please wait up to five minutes for the Outlook profile to update with the new settings. You may be prompted to restart Outlook when the settings have updated. Close and re-open Outlook. After entering your credentials, if prompted, you should be connected to the new platform.

You may need to restart Outlook up to three times while the profile updates with the new settings. Leave Outlook open for five minutes each time to give it time to connect to the new platform and receive the new settings. If after three times of this Outlook is still not connecting or updating, please contact mindSHIFT Support.

You may see the following pop-up during the reconnecting process, this is normal. Check the box to not be asked again and click Allow.

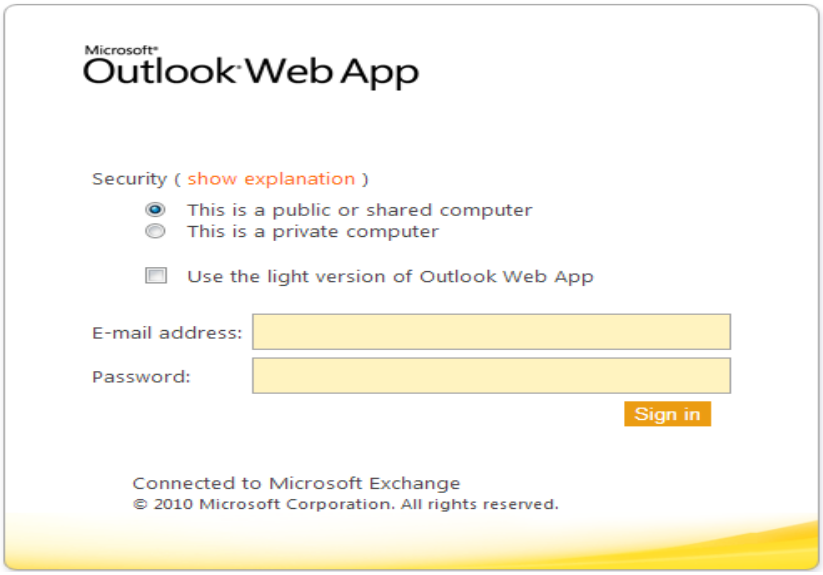


Contact mindSHIFT Support if you have any issues or questions.

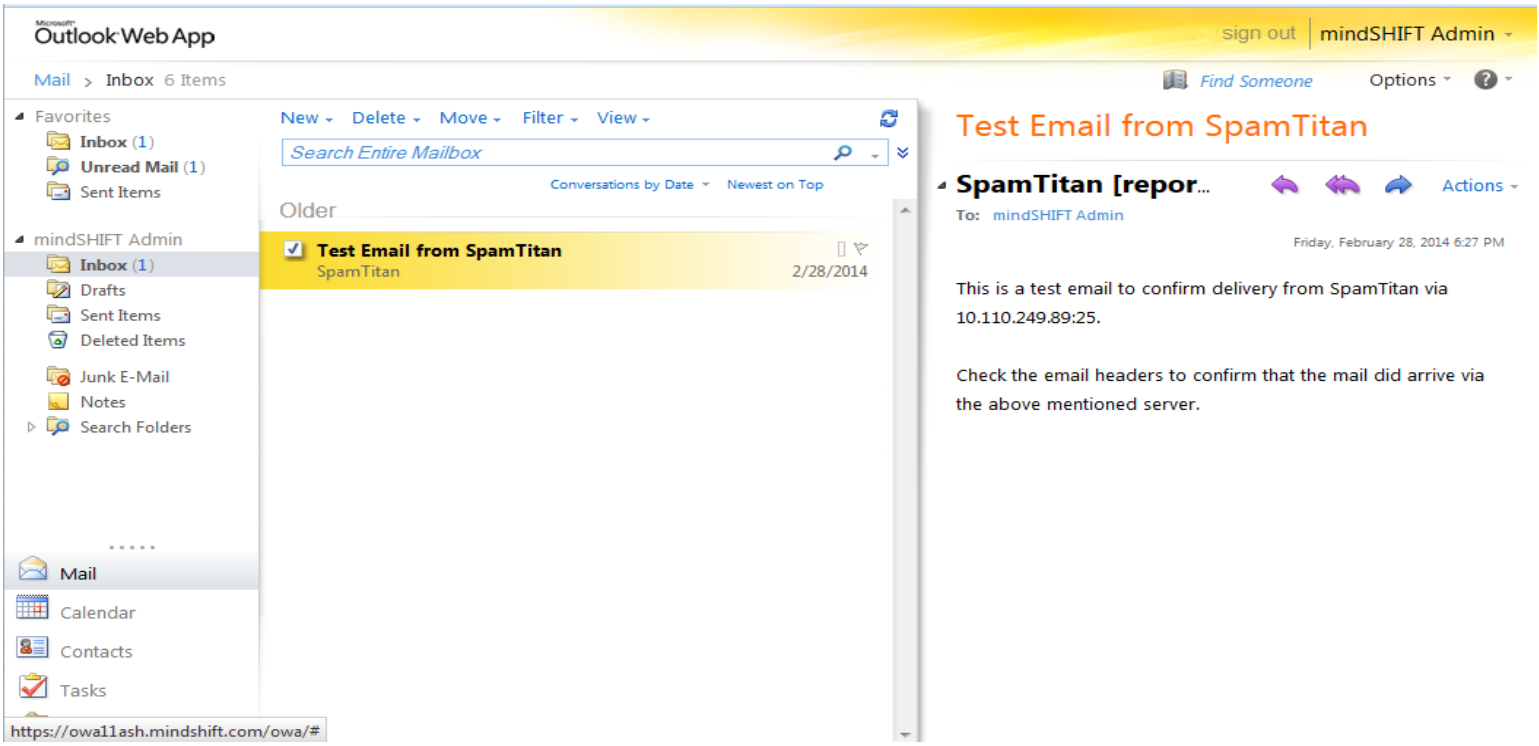
Connecting to Outlook Web Access (OWA) after the Migration

One of the biggest benefits of the new Exchange platform is the updated OWA website. To access the new site from any web browser, go to the address below and login using your email credentials.

https://owa11ash.mindshift.com



You will find that the new website looks a lot like your Outlook client and is the same across all browsers.



Configuring Mobile Devices

Apple, Android, and Windows mobile devices will likely need to be updated manually to access the new platform, use the steps below to complete this if your device does not automatically reconnect. Contact mindSHIFT Support if you have any issues or questions.

BlackBerry devices will need to be completely wiped and re-activated, contact mindSHIFT Support to help you with this. You should backup your device to save any media files before performing a security wipe.

Step 1 - Remove Existing Profile

- Remove your current Exchange profile from your device.
- If prompted, “This will delete your Email, Contacts, and Calendar,” this is normal. Your data will be re-added when connecting to your new Exchange profile.

Step 2 - Adding New Email Profile

- Following the steps provided by your user’s manual, add a new Exchange account to your device.
- AutoDiscover should detect your Server and Domain name for you during setup. In the event your device is unable to detect the Server and Domain information, you may enter it manually using the following Mobile Settings.

Mobile Settings

Email Address	Your Email Address
Username	Your Email Address
Password	Your Email Password
Server	owa11ash.mindshift.com
Domain	sh11.lan

Note

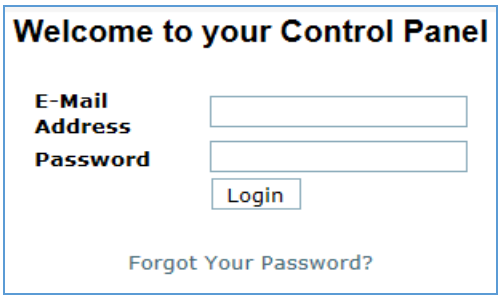
Not all mobile devices are the same, please consult your user’s manual for your individual setup instructions.

Changing Your Email Password

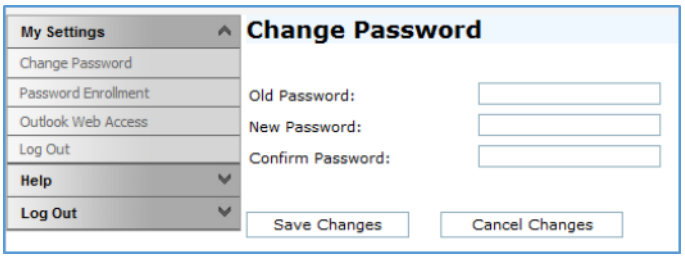
Step 1. Navigate to https://cp.mindshift.com

Step 2. Select "Log into your online Control Panel"

Step 3. Enter your Email Address and Password



Step 4. Select "Change Password" from the menu



Step 5. Enter your old password, your new password twice, and click "Save Changes"

Step 6. Once the new password takes effect after a few minutes, you will need to update Outlook and any mobile devices with the new password. They should prompt you when they need the new password.

Step 7. Contact mindSHIFT Support if you have any issues or questions.
