

The background of the cover is a blue-tinted photograph of several people in a meeting room. They are standing and looking at a large screen or whiteboard. The image is slightly blurred, giving it a professional and collaborative feel.

THE PRE-PLANNED **RESPONSE GUIDE** EMERGENCY ACTION PLAN

Risk and Strategic Management, Corp.

7180 Dyer Road, Warrenton, VA 20186, USA

www.rsmconsulting.us | info@rsmconsulting.us | P: 571 242 9000

INTRODUCTION

The Pre-Planned Response Guide functions as an emergency action plan, providing a tactical component of the wider organisational approach to managing an emergency situation or critical event through the processes of pre-defined and systemised Pre-Planned Response (PPR) communication flow, creating a consistent information source for critical decision-making, a centralised incident reporting system and supported stakeholders through the use of an emergency action reporting system, a reaction through written Incident Report (IR) form. The Pre-Planned Response Guide enables and empowers managers and staff for all locations to carry out working in response to a coordinated, efficient and structured manner to a wide range of events, whether involving lost or stolen assets, threats, or industrial or environmental incidents. The guide is designed first and foremost to protect people, secure assets effectively, enable business and operations, protect information, and to protect against reputational harm.

This guide categorises the standards on emergency and emergency management, including:

- 1. The IRMS Business Continuity Management
- 2. The IRMS Emergency Management

Written underpinned with this guide shows the local incident management team (IRMT) at the point of an emergency is understood how to deal with these risks, during or after they occur. This also enables that the incident commander (IC) of the local Management Incident Team (MIT) and local team leader (TL) of the IRMT are provided the information required for a timely and accurate follow-up to create effective decision-making, while ensuring the confidence that the IRMT understands the operational context of written incident report is under full control of incident. Together with this, the guide also ensures that the local management leadership team (IRMT) can lead and support the response to any live incident and where emergency situation.

Other aspects of the Business Continuity Management System (BCMS) will be triggered during an emergency situation, supporting the wider and longer term requirements of the incident. As such, this guide supports the initial severity, creates awareness of a response (typically up to the first day), rather than the longer and later operational response and management of a crisis. The Pre-Planned Response Guide is broken down into sections: the Response and the Reporting (local and wider).

The Response: The Pre-Planned Response Measures (PPRM)

The PPRM are designed to be universally applicable, helping managers and staffs well through active planning and response action before, during and after an incident as part of a strategy to prepare for and prevent, respond to and manage, and then eliminate and remove that as an emergency incident. This provides the expected staff within the first point to last management, which can then be adjusted and built upon to meet the unique local requirements of the environment and the specific emergency situation. This also ensures that the role and tasks are clearly understood, enabling action to be quickly brought to the situation.

PPRM should be adopted and built upon to reflect the nature of the operating environment, business and operational effectiveness, management structure, stakeholder complexity and the many roles and reports being faced. They can also be used as a planning exercise tool for preparation period or situation.

The Reporting, Verbal and Written (STRIPES)

Remember the verbal report will be a continuous, growth stage reflecting your own report more effective reporting, especially during possible situations. This includes:

- **What:** What did the event occur
- **Where:** Where did the event occur
- **What:** What exactly happened (the facts)
- **Why:** Why did it happen (if the cause is known – report only facts and state any assumptions)
- **Who:** Who is involved (own org national staff) as well as external personnel
- **Support:** What help is needed (and who should provide that help)
- **Control:** Who is in control, and who is using change of the situation
- **Threats:** What specific immediate, near term and long term threats and risks are there
- **Impacts:** What are the impacts or effects of these threats (the worst and best case)

Once the verbal report has been provided, then written reporting is often required. This codifies the information and increases communications internally and externally. This also provides an evidence chain for the incident. The daily information reported is documentation and REM's reporting system, and creates accurate, detailed, verifiable reporting through the system format. This supports the intent of integrating the question the leadership team and other stakeholders will likely present, and use another knowledge and decision-making to assist with incident/prompting. The goal is to document accurate and structured reporting through reducing the expenditure of valuable time and energy, and interorganizational reporting and assistance.

The Application

Prepare and
Present

Respond and
Manage

Transition and
Recover

The guide should be used as a reference document showing indicators of a threat or identified (before an event), as well as providing specific response actions during the incident management of an incident. Before transitioning from incident management after the incident is resolved, the Pre-incident Response Guide is primarily designed to meet the immediate needs of an emergency event (the first minutes, hours and day after onset (the incident hour), while the wider organizational crisis response strategies are implemented, and while government agencies are being notified – then however that be used as a planning tool in instances of an attack.

The guide is not intended to be restrictive, rather it is designed to act as a starting point for managers with a varied range of experiences, knowledge and skills. As such, the guidelines provided should be adapted to meet the unique and specific needs of an operating environment, the threat faced at any particular time, and the specific incident being managed.

Management Structures

It is important to understand that being an emergency upstart has levels of management mechanism that may occur, depending on the severity of the event, its complexity, the resources needed, and what implications arise for the event outside those boundaries.

- Start at the point of the emergency, responsible for managing the initial (and) response.
- Start strategically separate of the water crisis, nearly always removed from the incident itself.

When a situation arises where the IIRF is advised that the team(s) may use the same people participating to manage the local incident, and the water agency external response accordingly.

While the staff will often nearly always manage the practical response to an incident, the IIRF may be involved for various situations depending on whether the scenario classified event, it will meet and situation. At times the IIRF may take control of a response, if the reports brought in sufficient information to do so.

Level 1 Events	Level 2 Events	Level 3 Events
At least 1 scenario situation which has the potential to damage the water network of the organisation and require investigation. At least one response, with direct involvement of the IIRF.	At least 1 scenario situation which affects multiple parts of the organisation with not just operations at the point of effect, and requires support at local response, including members of the IIRF.	At least 1 scenario situation which can be managed entirely at the local level. The impact of the event are geographically, or significantly limited, so the IIRF will carry out investigation including team (noting for information purposes only).

Note incident scenarios (if) will be reported to manage the event based on whether the event is local, not whether the incident itself is global. The IIRF will be involved to assist management understanding what their response is required to do. It may be necessary to be in the situation of, incidentally or directly involved in water response.

Only at water response situation where there will be the Incident Response Unit. As the water crisis occurs.

Management Considerations

The following overarching considerations should be part of any management approach a robustness making solution at the IIRF or staff level.

Activating the IIRF	Defensible Management
The IIRF should be used in conjunction with any support for policies and plans. The IIRF is designed to be quickly initiated and well managed, often by the staff facing or responding to, or those. The IIRF can be used as a resource for planning too, or to take control of a situation. In addition, the IIRF can be used during the recovery stage where the incident leads to continuing recovery.	Managers at all levels should consider the emergency who might be influenced by, or who might influence the event. The role might be internal, external, or both. Consider the importance of different stakeholders (internal, external) including how stakeholders will be engaged and managed.

Note the emergency team should understand that the water crisis is not the only one, and that the emergency team is quickly meeting, using people involved in other ways differently.

Understanding the Impacts

The information and negative information from available sources are analysed, this is in order to determine the actual risks presented by the event. The potential business impacts must be evaluated against:

- the critical people
- the financial risks
- the critical assets and infrastructure
- the critical operations, performance and schedule
- the information
- operational and legal risks
- safety and regulatory

While **ad injury** is first and foremost the priority in any system response, other business and operational risks must be understood, managed and articulated.

Suggested risk and impact severity levels have been provided for each type of incident within the IIRMs to suggest the potential severity and/or high level of response.

Response Management Considerations

When planning for an upcoming risk period, or if managing an occurring risk event it is important to understand the three constraints an event may present:

The Window of Opportunity

This period of time where planning and decision making can result in success, but if missed, critical response resources will be negatively impacted, or critical strategies will not be effective.

The 1-Ctrl and 2-Ctrl Rule

This situation of awareness time for planning against their plans for actual implementation, going management for the one third of the window of opportunity, time to alert, and implementation are given the remaining two thirds of the time to implement the plan.

Defining the Local Incident Management Team (LIMT)

The activation of the LIMT occurs when any form of emergency incident occurs. The LIMT is a locally based team, and a component of both the internal (and where needed) external experts responsible for responding, and managing, a threat. The LIMT may be activated ahead of an event, as an event is occurring, or after the event, depending on the nature of the event. The LIMT is responsible for:

- Defining the nature of the threat and the associated impacts
- Notifying the LIMT of the incident and its severity, notify support reports
- Assessing the scope of risk including the people, time, activities, information, facilities and assets affected
- Identifying the required membership for the LIMT to face the risk of the specific event
- Notifying the appropriate stakeholders
- Implementing or initiate risk control measures through the IIRMs
- Reporting (and being assisted from) external support
- Working of the team with external stakeholders
- Transferring responsibilities to appropriate parties who might have a priority of concern

Not all incidents or threats that should be articulated where all communications and information is used to be coordinated within and out of the incident.

ABDUCTION EVENTS (KIDNAPPINGS AND HOSTAGE SITUATIONS). 1.1

Provide an Immediate Report

Knowledge: Abduction events include kidnappings, whether commercial or ideological, and include civil and tribal abductions, ritual kidnappings and religious kidnappings. The single biggest category of the public taking of people in kidnappings, whether abducting lone individuals, families or criminal groups.

Priority: Identify immediate threats to people and life safety – prevent further abduction.
Incident/Event Management: Identify reported internal and external abductions.

Pre-Planned Responses (PPRs)

- ☐ Account for all staff, their status and location, provide details on any missing staff
- ☐ Confirm the name, age, role, gender, religion, and nationality of captives
- ☐ Confirm whether an abduction has occurred – attribute the Missing Person PPR if available
- ☐ Confirm whether it is a kidnapping event or a hostage situation
- ☐ Identify any medical conditions or health/well-being issues of the victims – request an urgent health
- ☐ Confirm the identity of the perpetrator, criminal, terrorist or other individual
- ☐ Determine whether any demands have been made – provide the specific details of demands
- ☐ Confirm where the event occurred or where hostages are currently being held
- ☐ Determine whether there are any known threat or positions used by the perpetrator
- ☐ Confirm the level of its demands, ongoing family liaison presence in consultation with the MOP
- ☐ Confirm the competency, capacity and reliability of the police – are they part of the protest
- ☐ Determine whether further intelligence support may be required – identify specialists
- ☐ Confirm whether other staff are at risk – take appropriate measures to ensure no other people
- ☐ In hostage situations – have the facility/grounds been compromised, stop others from entering
- ☐ How have local police security forces and police responded – are they on scene, what is the plan
- ☐ Identify media interest, request the incident update and notify the MOP
- ☐ Identify areas for ongoing family/communications, brief all staff on communication protocols
- ☐ How specific "want for want" cases or perpetrator issues are raised – record these if possible

Reporting Guidelines (MOP Information)

- ☐ Provide the name, age, gender, religion, position, and nationality of any captives
- ☐ Report if this is a Missing Person, Kidnap and Threat or a Hostage Situation
- ☐ Report on any reports in the media (using the appropriate PPR)
- ☐ Report on the status, type and location of the perpetrator – and any known operating position
- ☐ Report the location of the incident, or where captives are being held during hostage situations
- ☐ Report whether police are involved – what is their competency, capacity and reliability
- ☐ Report whether the strike by has been notified if international staff are involved
- ☐ Report on any media interest – provide details on the point of contact and communication status
- ☐ Report "want for want" any demands made, or any communications which have occurred
- ☐ Report on whether their facilities are compromised, what are the threat, and what support is needed

ACTIVE SHOOTER OR ARMED AGGRESSOR: L1

Provide an Immediate Report

Knowledgeable Active Threat situations are typically individuals acting independently to specifically harm and intimidate, harming typically an individual or institution and sometimes a situation. **Armed aggressors** are typically intentional terrorist groups attacking in a well-thought-out way, focusing on large groups of people in public places.

Identify identify situations that are people's safety – present authorities that

Reliability Management identify important internal and external stakeholders

Pre-Planned Response (PPR)

- Account for all staff, providing names, contact details, descriptions and other facts re: responses.
- Confirm the nature of the situation – is this well or better threat, or a coordinated group attack.
- Confirm the level of sophistication of the attackers – well or well-planned terrorist attack.
- Test to test down the facility to test to answer their aggression; if it fails and possible to do so.
- Test to evacuate staff along with routes, and away from the aggression(s).
- If it is possible to test possible, staff are to be made taking place – testing please facilities.
- Confirm staff to stay away from windows and doors.
- Notify the police or security agencies providing the time, place and description of the attacker(s).
- Confirm the specific areas of risk and what weapon types are being used.
- Confirm the type of threat (terrorist – provide their names, ages, genders and other details).
- Confirm any known perpetrator details – their names, descriptions, mental health and weapons.
- If possible, determine the specific goals or demands of the aggression(s) and notify the police.
- Confirm an incident number that is to be used for staff's name, their emergency responses.
- Provide any facilities, layout and other information to the police to aid in their planning.
- Confirm staff are advised to stay away from the office or work area until the "all clear" is given.
- Confirm whether the facility or area needs to be swept for explosive threats – engage support.
- Secure and prepare for media attention.
- Notify a briefing point or not in number for the facility – submit resources for international staff.

Reporting Guidelines (GIFOP Information)

- Provide the specific location or area at risk, and whether the threat is ongoing, or is well-thought.
- Provide the identity of the aggression(s) – well or well-planned terrorist attack.
- Confirm what weapons are being used, and whether staff are advised or are off-site or not.
- Provide the details of any reported facilities (using the agency or facility PPR).
- Provide the location and status of staff, and who is not accounted for – provide the details.
- Confirm if the police has been notified (when they responded), and what actions have been taken.
- Provide details on whether the type of threat, their details and a list of threats being made.
- Provide the international threat (if it is) and the potential the police would be notified.
- Confirm if the media has responded, otherwise for the international authorities.
- Notify local facilities of the incident, provide details on international staff for corporate.
- Confirm what actions are being taken, who is at the site, and what help is required.

ARMED CONFLICTS: L1

Provide an Immediate Report

Immediate armed conflicts are armed between countries (inter-state), or within a country (intra-state), they may occur between government forces, or between government and militant non-state groups. Both conventional and non-conventional warfare may result, including firearms, military weapons, artillery, mines, etc. (ICM, 2018).

Priority: identify immediate threats to people and the safety – prevent further violations.
International Management: identify reported internal and external stakeholders.

Pre-Planned Responses (PPRs)

- confirm the government and non-government groups involved, and their agendas and capabilities.
- establish which areas are immediately affected, and the areas where fighting may spread.
- confirm if the event has resulted in civilian casualties, and whether any atrocities are likely.
- determine administration groups, facilities and infrastructure are being targeted.
- establish if and when facilities, airports and ports within reach, and the window for evacuations.
- establish whether evacuation restrictions will be enforced, and how this will impact security.
- confirm if facilities or activities are at present, or potential targets – note the probability of impacts.
- determine if facilities will be externally affected, or if evacuation limitations should be imposed.
- establish if external stakeholders are likely or unlikely part of the dispute, and the implications.
- confirm how operations will be affected – such as travel restrictions and work from home requirements.
- account for at-risk people: the name, age, contact details, role and nationality of missing people.
- identify vulnerable individuals and groups – implement the safety protocols (if they exist).
- know the status on place, resources or evacuation PPR – follow the requirements.
- engage with the military – establish, institutionally, those points of contact a national authority.
- identify required emergency plans and ensure implement information and the national protocols.
- establish the implications for business and operations – notify external stakeholders.
- confirm emergency requirements, events, evacuation and protection of critical assets.

Reporting Incidents (NHPP Information)

- provide details on the government and non-government groups involved, and their agendas.
- confirm what areas are at risk now, and what areas will be at risk in the immediate or near future.
- provide details on how threats are presented, and whether "hot spots" are present, or about.
- determine whether facilities or activities are in present or target, or are at the "hot spot".
- provide details on conflict including tactics, age, nationality, religion and where most armed are.
- report on government and diplomatic assets, structures and restrictions.
- provide details on the areas being under by armed groups, or the international community.
- determine whether the status on place, resources or evacuation PPR is being implemented.
- report on these feelings and the effect, the last action of authorities, and relocation of assets.
- provide details on the evacuation protocols, the restrictions and work from home practices.
- report on whether these have been completed, when are planned, and what support is needed.

ARRESTS, DETENTIONS AND EXIT DENIALS: L3

Provide an Immediate Report

Knowledge of arrests may be legal, justified or frivolous; charges or treatment without prompt justice and legal systems. Detentions may be the temporary holding of individuals without being charged. Exit denials are where individuals are not permitted to leave a country. Physical and psychological harm accompanying each form of threat.

Priority: identify immediate threats to people and the safety – prevent further risk flow.
Taskholder Management: identify repeated internal and external stakeholders.

Pre Planned Response (PPR)

- confirm the name, age, role, gender, nationality and current details of the individual(s) at risk.
- report on allegations or charges, if they have been charged, what the potential penalties.
- confirm if individuals are detained, if so report how they arrived, in it would have been made.
- confirm the location facing/charges, and any associated health, safety and security concerns.
- confirm if individuals require food, water, medicines and sanitary products when detained.
- confirm whether individuals can be released on bail – what is the amount and conditions of bail.
- identify and engage with local experts involved in cases with a relevant the individual(s).
- verify the role about whether if they are an international staff members – confirm evidence.
- ascertain whether if that individual, groups, internal stakeholders or the age matter is at risk.
- confirm the need of an external staff/agency for support – what support for international staff.
- identify the point of contact for proceedings (police/legal) or that they are to be engaged as required.
- if an individual is held, determine why and what experts need if the individual(s) the security.
- ascertain whether the incident is likely to result in further attention and the risk this presents.
- confirm the date and location of court hearings, seek copies of the police report and bail bonds.
- identify the alleged party, determine when compensation is being sought.
- ascertain when possessions and property have been confiscated, and potential real implications.
- confirm the mental, emotional and physical health of the detainees – identify relevant medicines.

Reporting Guidelines (RHP Information)

- confirm the name, age, role, gender, nationality and current details of the individual(s) at risk.
- confirm details of the allegations or charges, and report of associated police reports and outcomes.
- report on the nature of the charges, if they have been charged, what the penalties.
- report on the location of any detainees/persons and any health, safety and security concerns.
- ascertain whether support resources have been identified, engaged and the point of contact details.
- confirm if the necessary for more support for international staff a written response.
- report on the detainee's internal and physical health – when medicines or treatment is required.
- ascertain any secondary stakeholder might be present location on the organisation.
- report any health inquiries – the location, point of contact and any questions presented.
- report on when after the healthcare completed, when are planned, and when support is needed.

BLACK-OUTS (POWER LOSS): L3

Provide an Immediate Report

Immediate Blackouts or power losses may be noticed first building, city, or elsewhere, or may be widespread affecting villages, towns, cities or regions. The loss of power can be disastrous, as protection it impacts business operations, prevents safety, and endangers critical services, including fire, medical, police, transport, and food storage.

Identify identify immediate threats to people and its safety – prevent further risk, fire, toxic/hazardous management; identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ☐ Account for all staff, their status and location – provide details of any missing staff
- ☐ Determine the extent and likely duration of the power loss.
- ☐ Determine the immediate risks associated with the current and operations.
- ☐ Use emergency power or lighting for facilities (movement) and to ensure staff safety.
- ☐ Identify if any staff have been injured (define the severity), and implement the appropriate PPR.
- ☐ Ensure staff not to move around unnecessarily unless it is safe to do so.
- ☐ If emergency generators are used, limit power usage and turn off non-essential services.
- ☐ Ensure staff to notify/notify maintain of their status (extension) for widespread power loss.
- ☐ If a potential power cut is likely that consider sending staff home, if it is safe to do so.
- ☐ Determine whether machinery or production threats could result from the power loss.
- ☐ Notify the impacts to other stakeholders – such as status alerts, and the community.
- ☐ Identify vulnerable people, such as pregnant women, the aged and others – ensure their safety.
- ☐ Consider gathering staff to one location where emergency lighting and safety can be provided.
- ☐ Limit movement of widespread black-out services to traffic (upright) before increasing risk.
- ☐ If a potential blackout occurs then prepare off-hours staff, which might go on too.
- ☐ Determine whether any machines require maintenance and protect those if necessary.
- ☐ Agree scheduled roll times to facilitate management updates.
- ☐ Determine whether any meetings or activities need to be rescheduled.

Reporting Guidelines (GIFEP Information)

- ☐ Confirm if all staff have been accounted for, and provide details of missing individuals.
- ☐ Provide information of any staff 'left out' and their location and status.
- ☐ Determine whether this is a continuous or occasional problem.
- ☐ Provide details of any emergency power plan or supplies on site.
- ☐ Inform any risks to people, assets, and operations – provide details.
- ☐ Confirm any data which might compromise protection and inform risk management activities.
- ☐ Confirm status and scheduled staff status and whether that operation has been notified.
- ☐ Confirm if the facility/operations have been suspended for how long, a self surface conditions.
- ☐ Define the business / operational implications of the power loss.

BOMB THREATS: L3

Provide an Immediate Report

Immediate bomb threats may be real, or they may not be. They can be from suspect letters and printed information advising anything they do (bags, boxes, vehicles or other containers) which are suspicious contain a bomb. Suspicious vehicles, parts, threats and letters may also be considered bomb threats.

Priority identify immediate threats to people and life safety – prevent further risk from **Incident Response** identify reported internal and external distributions.

Pre-Planned Response (PPR)

- confirm the location, size, shape, colour, drawings and description of the suspect device
- confirm report the age, gender, weight, constitutional status, speech patterns, and background notes.
- confirm and the group the person belongs to, where the location, and what if self demands.
- documentary threatening info if possible – or write down the specific comments made by the caller
- for suspicious vehicles confirm the location, size, colour, make, model, a lot registration details.
- confirm with all parties (in the area) whether they have the suspicious-looking vehicle.
- do not make any or use vehicles within 10 metres of the vehicle or bomb – move further away.
- do not open, touch, inspect, check or pour water on the bomb.
- notify the police, after 999 or military, respond immediately – provide them the exact facts.
- stay and confirm the area, stop people from smoking, alcohol or do not touch their party.
- confirm that all staff are accounted for – report on any staff who are missing or not accounted for
- ensure that a cash machine is monitored (prepare notes for a bag, and notes for available).
- ensure people place their seat belts and seat belts between them and the suspect item or vehicle.
- ensure staff move away from windows due to the risk and avoiding the risk of an explosion.
- confirm security systems device risk or threat (alarm points), or along alarm status.
- staff members are confirmed family members that they are safe.
- confirm security, or move away from the office, in the away with the "all clear" is given.

Reporting Guidelines (RHP Information)

- provide a full description of the suspect vehicle or device the police and the exact location.
- confirm all staff have been accounted for, provide full details on any missing people.
- provide the age, weight, gender, speech patterns, documentary background notes, and address.
- confirm the location of the location (exact time) (RHP)
- provide any "self notes" or police or other emergency responders.
- provide the details of where staff have been (documented) – and a release call.
- confirm when the police were notified and what actions have been taken.
- confirm if the suspect has been removed by guard force (personnel, the police, or the military).
- confirm when the suspicious item has been confirmed as a threat, or confirmed as safe.
- confirm what further evidence is required and from whom.
- if a document is not report using the Medical and Nursing RHP.

CBRN INCIDENTS: L1

Provide an Immediate Report

Knowledgeable Personnel (colleagues, colleagues or members) will not be considered if weapons of mass destruction or biological or chemical weapons (such as drugs, biological warfare) threats with these materials, gas stations, or industrial structures – causing widespread fear and panic, and contamination and destruction of assets.

Priority identify immediate threats to people and the safety – prevent further damage.
Knowledgeable Personnel identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- confirm where the event occurred, it is contained and if there is destruction of it.
- where the nature of the event – is the chemical, biological, radiological or nuclear event.
- confirm the complexity of the threat – is it contained or is it a spill or release.
- Account for all staff that have been affected – provide details of any missing staff.
- Isolate any signs or material conditions of the incident – report on ongoing health.
- confirm the identity of the perpetrator – internal, external, individual or an external incident.
- confirm the names, ages, and last of individuals if personnel is at least the name.
- determine where the event has occurred – whether outside and on the premises of the event.
- determine the what, how, and – and whether the threat is still.
- confirm the location for reported staff.
- confirm the complexity, report a reliability of emergency responders – whether they bring.
- determine whether further investigation support may be required – identify stakeholders.
- Isolate where signs or staff have been seen – confirm location and impact details.
- not feelings to be used – those who are and those who are not – confirming and other details.
- when necessary, the event is not a threat to the response and confirm further if a threat to the event.
- identify the event response the incident details and notify the event.
- confirm those details of the event are being done – on the premises and on the premises.
- identify if any emergency response a confirmed stakeholder communication is required.

Reporting Guidelines (RTEP Information)

- provide details on the location of the incident, a clear priority to staff and location.
- report on the specific date and time the incident occurred.
- report on any signs or threats (using the appropriate PPR).
- report on the severity, type of incident, complexity and emergency personnel.
- provide details on any communication details, whether or not a threat is still.
- report on emergency responder actions – what other emergency response and reliability.
- provide secondary, third of fourth – whether the event is still.
- report on any other details – provide details on the point of contact and contact details.
- provide the specific location of the incident (whether a threat is still).
- report on whether the threat is confirmed, whether it is still, and whether support is needed.

CIVIL DISTURBANCES: L2

Provide an Immediate Report

Recognize that disturbances can result from rallies, demonstrations, religious/patriotic gatherings, which are violent, riotous (they include looting, rioting, damage to assets and facilities), and kidnapping and hostage taking. Disturbances may be triggered by criminal and terrorist, and include multiple police responses on the scene.

Identify clearly articulated threats to people and the facility – prevent further escalation.
Incident Commander identify reported internal and external disturbances.

Pre-Planned Response (PPR)

- ☐ confirm whether a planned, scheduled public gathering is occurring, or if it is planned
- ☐ confirm the agency, location, nature and purpose of the public gathering or event.
- ☐ confirm whether the gathering is government sanctioned, or if police response may be needed.
- ☐ determine whether existing procedures need to be changed, including with those having protocols.
- ☐ determine if additional facility security is needed, and whether a lockdown is required.
- ☐ notify management a public gathering or event, and request them to assist the area of recovery.
- ☐ obtain the best/fresh information, create a contact matrix – report on security threats (terrorism).
- ☐ account for the location, status and wellbeing of all staff, report on communication personnel.
- ☐ determine if laws, by-laws or ordinances are required, and whether assets need to be relocated.
- ☐ secure facilities and work areas if required – turn off lights and secure access points.
- ☐ if staff need to shelter in place, direct staff out away from windows and from unsecured rooms.
- ☐ determine whether the order to shelter in place or evacuate from an affected area.
- ☐ remove attractive items and assets from view, including vehicles and materials – if looking to flee.
- ☐ remove unneeded staff from the facility and remove, where appropriate, facilities security staff.
- ☐ high value or critical assets should be moved and out of view from access points and windows.
- ☐ information flows and movement they need to be restricted if widespread violence is likely.
- ☐ protect outdoors areas, and that staff, staff must wear face “mask period” before leaving in situ.

Reporting Guidelines (ICRMP Information)

- ☐ provide information as to whether the gathering or event is occurring, or when it is planned.
- ☐ report on the purpose and nature of the event, and the composition and professional status of the police.
- ☐ report whether there is a potential security situation for violence, and they agree to be affected.
- ☐ report on the location and status of staff, and that staff who are not essential to.
- ☐ immediately report injuries or a death scene – initiate response actions taken a safety threat.
- ☐ provide information on critical assets and information, notify negative feedback being collected.
- ☐ provide continual updates as to the spread of violence in relation to facilities and staff.
- ☐ report when the facility is secure, and what measures are being taken to protect it, and staff.
- ☐ report on what actions have been completed, what are planned, and what support is needed.

CYBER THREATS: LI

Provide an Immediate Report

Knowledge: Cyber threats can result from criminal, hostile government, commercial or semi-commercial entities that breach IT security protocols, steal sensitive information, disrupt operating systems, compromise the operations or plan physical attacks. They also include phishing, viruses, worms and other malicious software risks.

Priority: Identify immediate threats to people and the entity – prevent further risk. (Incident Event Management) Identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ☐ confirm the nature of the cyber threat – tactics, phishing, worm, virus etc.
- ☐ confirm what systems have been affected, the extent and the security affiliations.
- ☐ determine what information has been compromised, lost or stolen – and the implications.
- ☐ determine the identity and nature of the perpetrator, if known, and their likely agents.
- ☐ determine what information needs to be recovered – and how recovery can be implemented.
- ☐ determine if the threat remains, or how systems have secured.
- ☐ identify any capability – who was responsible for why and if it security protocols.
- ☐ conduct if information control, access, personnel and software system adjustments are required.
- ☐ conduct what internal stakeholders are affected, the implications and required course of action.
- ☐ identify organizational stakeholders, how they have been affected, and the engagement strategies.
- ☐ conduct the competency, capability and reliability of public IT operations.
- ☐ identify operational support matter and technical support required to manage the event.
- ☐ determine whether trade confidentially, third-party sensitive information is lost.
- ☐ conduct if technical and operations affected and what changes to prevent activities are required.

Reporting Guidelines (ITIRP Information)

- ☐ report as incident, internal report which was not post sent.
- ☐ confirm the nature of the threat – tactics, virus, worm etc.
- ☐ provide report details: identify, systems compromised, business and operational impacts.
- ☐ confirm the identity and agents of the perpetrator, if known, and the likely consequences.
- ☐ determine whether the threat remains – or whether the value ability has been secured.
- ☐ determine what measures stakeholders have been affected – extend the implications.
- ☐ identify externally affected stakeholders – determine the impacts and engagement strategies.
- ☐ report as appropriate incident – notify the IRIRP.
- ☐ confirm what management actions are being taken, and what support is required.

EARTHQUAKES: L1

Provide an Immediate Report

Identify earthquakes occur with no warning and cause structural damage to buildings, including fire colleges, so training a higher-ranking staff people, training various systems, fire, water and power systems, security, electronic systems, furniture and bridges can be damaged in colleges, and a loss of services, facilities and other resources.

Identify identify structural threats to people and the safety – prevent further damage.
Incident/Event Management identify repeated structural and system disturbances.

Pre-Planned Response (PPRs)

- ☐ ensure staff immediately take shelter, or those not yet sheltered take a break during the earthquake.
- ☐ Account for all staff, including their status and location – report to any command post for staff.
- ☐ turn off electrical and gas supplies with the building fire heat department and shut off gas.
- ☐ start out of "after shock" mode, return of some facilities and prepared for secondary shocks.
- ☐ instruct staff to stay away from windows, the doors of living heavily, and of electronic risks.
- ☐ advise staff not to use bathroom bridges with those have been impacted and confirmed unsafe.
- ☐ start out of the threat that they, finally some location of water supplies, and have the staff are impacted that they not have shelter for the night, or the school and student status.
- ☐ identify any injured staff in time that and important the injury severity (PPR).
- ☐ identify if staff (parents) who have been trapped in college buildings – make immediate assessment of facilities, and continue with water to use of utility failure, or water contamination.
- ☐ change electronic items, including phones and laptops while the power remains operational.
- ☐ look at any phone use to receive power (that) – use testing of some networks and lines.
- ☐ advise students not to use food, machines, water and beds for a while after earthquake.
- ☐ identify the requirement and have no need to use staff facility, structure of safety, equipment.
- ☐ remove water, food, machines and fuel supplies – remove and protect transport assets.
- ☐ determine whether a shelter in place or evacuation is required and how this would be done.

Reporting Guidelines (JITRP Information)

- ☐ report on what the earthquake occurred, where, how severe was it, and what was the severity.
- ☐ provide details on any injuries and facilities (using the appropriate PPR).
- ☐ provide details on those staff who have been seriously and quantify those who have not.
- ☐ inform JTRP staff how many trapped inside college buildings, that location and a count status.
- ☐ provide information on whether back and other transport systems are still functional.
- ☐ inform whether utilities are still functioning, and the extent of equipment damage.
- ☐ provide details on any electronic equipment and equipment.
- ☐ provide details on details for food and international staff – support with family engagement.
- ☐ report on the competence, capacity and response measures of emergency services.
- ☐ inform what management actions are being undertaken, and what support is needed.

ENVIRONMENTAL HAZARDS AND SPILLS: L3

Provide an Immediate Report

Identify/Report Environmental Hazards and Spills include any toxic contaminants which presents a danger to water sources, animals or plant life, or the health or safety of humans which results from leakage, flooding, failure or spills from industrial materials, whether it is created or has been.

Identify identify immediate threats to people and the safety – prevent further risk flow.
Incident Team Management identify reported internal and external stakeholders.

For Planned Response (PPR)

- ☐ confirm the location, time, date and nature of loss, nature and contents of the spill.
- ☐ confirm required immediate report on the potential impact, the severity and consequences.
- ☐ investigate whether the spill is static, or whether it is spreading – confirm the speed and direction.
- ☐ confirm any health and safety risks related to contamination exposure with the substances.
- ☐ confirm any situation health or safety risk associated with flooding or leaks.
- ☐ confirm any flammable or explosive hazards associated with the materials.
- ☐ provide details on any water borne contamination of waterways or surface water bodies.
- ☐ determine whether any vulnerable individuals or groups are within an affected area.
- ☐ confirm downward flow away and the speed and direction of pouring spills.
- ☐ determine whether burning, reactions or larger areas need to be contained – confirm destinations.
- ☐ establish whether acute and severe measures not covered and manage the response.
- ☐ determine if external professional emergency responders are required for response support.
- ☐ establish whether the source is contained or stopped – or whether continued flow was present.
- ☐ establish the cause of the spill and any culpability and response measures required.
- ☐ identify affected individuals, the area likely, machinery, plant, things and good exposure.
- ☐ determine whether media statements that – notify the media.
- ☐ determine whether areas that be isolated and access restricted – conduct a perimeter.
- ☐ establish an incident number (one) and emergency responders of the location.
- ☐ confirm with authority that water flows into using safe routes to water points.

Reporting Guidelines (NIRP Information)

- ☐ provide the date, time of the spill and the nature, severity, extent and consequences.
- ☐ confirm if the spill is static, or flowing and the nature, speed and direction of contamination.
- ☐ provide details on any impact to facilities from the appropriate PPRs.
- ☐ report if the site is being evacuated, staff are remaining in place, and areas affected.
- ☐ report on the location of the incident, location from spill and who is handling it – provide contact details.
- ☐ indicate if there are downward hazards, the direction of pouring spills or flows to be affected.
- ☐ confirm the competency, capacity, reliability responsiveness and written report by responders.
- ☐ report continuously and make statements the team – including points of contact.
- ☐ report on what activities have been completed, what was present and what support is needed.

EQUIPMENT AND PRODUCT FAILURE: L3

Provide an Immediate Report

Identify/Report equipment or product failure includes: mechanical failure, explosion resulting, shoring, or the malfunction of another operator which prevents entry to the safety environment, events, or results in critical functions and activities being disrupted which have significant implications for business and operations.

Priority: identify immediate threats to people and the safety – prevent further risk flow.
Incident Response Management: identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ___ confirm the date, time and location of the equipment or product failure.
- ___ confirm what equipment or product failed – provide the details of the nature of the failure.
- ___ confirm whether staff were injured or killed – provide the appropriate PPR.
- ___ confirm whether the incident under control – is whether the event is still ongoing.
- ___ confirm the status of the equipment or product – event is substantiated / done.
- ___ confirm any secondary hazards associated with the event – assess the risk safety of staff.
- ___ determine if the equipment or product was critical – what impacts are associated with the event.
- ___ determine if equipment, assets or materials need to be moved away from the area of risk.
- ___ confirm what internal agencies are required to respond to the event – engage them as needed.
- ___ determine whether a risk (potential area or whole area) assessment needs to occur.
- ___ establish an incident control team (ICT) – notify staff and external stakeholders and respondents.
- ___ confirm the competency, capacity and responsiveness of respondents – report on activities.
- ___ determine whether incident response is done – done with the ICT.
- ___ identify external stakeholders internal – families, media, community, and business interests etc.
- ___ identify any regulatory and the legal, reputational and commercial implications.
- ___ determine what system requirements are needed identify sources, costs, distributions.

Reporting Activities (RTEP Information)

- ___ Report on the date, time and location of the event, and who owns the location.
- ___ provide details on any injuries or fatalities – provide the appropriate PPR.
- ___ confirm who owns the equipment, what equipment failed and the consequences of the event.
- ___ Report on whether the event is under control and the ongoing.
- ___ Report on what activities and secondary hazards are – and what is being done to respond.
- ___ Report on whether the event site has been evacuated and how the team controlled.
- ___ confirm the competency, capacity and responsiveness of local emergency responders.
- ___ provide details of any external stakeholders, their interests and any meetings held, or planned.
- ___ Report on any regulatory, other a factor and the potential, or known, implications.
- ___ provide details on any damaged high value or critical materials, assets or infrastructure.
- ___ Report on what staff have been trained completed, what are planned, and what support is needed.

ESPIONAGE: L1

Provide an Immediate Report

Knowledge: Espionage is the acquisition of confidential or sensitive information (PI or PII) through illegal means. It can be perpetrated by commercial competitors, criminal groups, hostile governments, or terrorists. Methodologies include covert, overt, social media tapping, hacking, wiretapping, document theft and surveillance (must be covert), or mail.

Priority: Identify immediate threats to people and the entity – prevent further damage.

Incident Event Management: Identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ☐ confirm the nature of the espionage – electronic, human, physical, and if a response or response.
- ☐ confirm the law; this verification of the incident provides the basis of the incident.
- ☐ identify the details of the perpetrator (if known) – not known, government, criminal, or internal.
- ☐ determine their agenda: financial, technical, information, espionage, and all threats.
- ☐ determine whether the event is part of a trend, or a one-time event. For this happened before?
- ☐ establish those being targeted, vulnerable people, and whether staff are at physical risk.
- ☐ determine if internal stakeholders are part of the problem, and whether evidence supports this.
- ☐ establish whether there is any evidence to confirm the threat – financially, others, without all.
- ☐ confirm the originating agency and identity of police – are they complete part of the problem?
- ☐ determine whether vulnerability exists – are the sources of action required to address this?
- ☐ determine when information has been stolen or accessed, about the objects of the loss.
- ☐ establish the impacts to external stakeholders and other engagement strategies are required.
- ☐ conduct a security audit or practices used to be vulnerable reflect the state of information loss.
- ☐ identify potential legal issues – notify the FBI.
- ☐ determine if possible launch a cyberwar strategy – if a digital security breach is involved.
- ☐ determine support the business continuity plan.

Reporting Guidelines (RTEP Information)

- ☐ provide details on the type and nature of the perpetrator, if known.
- ☐ report on how the information is being collected, and what evidence shows there is a threat.
- ☐ determine who is at risk, what has they done, and the severity of the threat against people.
- ☐ report on any information lost or stolen, and the implications and business disruption.
- ☐ confirm the originating agency and identity of local police, and are they part of the problem?
- ☐ determine response support, and what additional security measures are needed.
- ☐ report on whether the problem is resolved, or whether the vulnerability and the business.
- ☐ report on media release, and whether evidence supports this – provide the evidence.
- ☐ report on what will the business completed, when it is closed, and what support is needed.

EXTERNAL STAKEHOLDERS: L1 / 2 / 3

Provide an Immediate Report

Need/Effect: External stakeholders can impact our business and activities either directly or indirectly, their actions whether intended or unintended, can substantially impact our reputation and savings resulting in costly mathematics, stakeholders may also be subject to this post their engagement with our organization.

Priority: Identify sensitive groups to people and life/safety – prevent further risk flow.
Stakeholder Management: Identify impacted internal and external stakeholders.

Pre-Planned Responses (PPRs)

- ☐ confirm the identity of the external stakeholders and their association with our organization.
- ☐ confirm the role, this association of the incident provides the details of the incident.
- ☐ identify the details of the perpetrator (if known) – last known geographical location or travel.
- ☐ determine their agenda, savings, financial, environmental, kidnapping, etc. all threats.
- ☐ determine whether the event is part of a threat, or action taken – for this happened before?
- ☐ establish the nature the stakeholders events severity and immediacy of the threat.
- ☐ establish the nature the organization and the severity and immediacy of the threat.
- ☐ establish whether there is any evidence to confirm the threat – documents, video, witness etc.
- ☐ confirm the competing urgency and severity of police – are they compromised of the problem.
- ☐ determine whether vulnerability exist and the nature of action – responses address those.
- ☐ determine when information flow best should be received, about the subjects of the risk.
- ☐ establish what details, support and resources are required.
- ☐ confirm if events a threat or potential need for vulnerability reflect the risk.
- ☐ identify potential media interest – notify the extent of a risk and a state.
- ☐ determine if potential interest are needed.

Reporting Guidelines (RTEP Information)

- ☐ provide latest notification immediately and what action is needed they are engaged with.
- ☐ report the details of other stakeholders is defined their nature and engagement with our team.
- ☐ determine what this external stakeholders live and the severity and urgency of the threat.
- ☐ determine what information best flow and the severity and urgency of the threat.
- ☐ release the competing urgency and severity of local police, and are they part of the problem.
- ☐ release response needed support is needed.
- ☐ report on whether the problem is resolved, or whether the vulnerability and risk remains.
- ☐ report specifically on any government/legal program, media, and security risks.
- ☐ report on whether there have been compliance, release of the team, and when support is needed.

EXTORTION, INTIMIDATION AND COERCION: L1

Provide an Immediate Report

Immediate extortion uses features of extortion and coercion, but extortion results another person fearing for their safety. Extortion is marked by what targets something through intimidation (usually property or otherwise) gains. Extortion is starting a person act in a manner against their will including providing sensitive information.

extortion directly threatens through to people and life safety – present further risk that: **Extortion Management** identify reported extortion and extortion perpetrators.

Pre Planned Response (PPR)

- determine the nature of the threat, or whether it is a combination of threats.
- determine if the threats extortion is effective and potentially what impacts would result.
- confirm the individual or group at risk, or the business, which they are being extorted.
- provide the names, ages, roles, genders and other pertinent information on the victims.
- determine the identity, age, sex and relationship of the perpetrator to the victim.
- establish whether it is extortion versus persecution.
- establish whether victims seek to prove that a crime is occurring, and legally actionable.
- determine the immediate threat to the safety – what measures required to protect people.
- confirm internal and external resources needed to investigate the matter (e.g. police assistance).
- determine what actions should be taken against the perpetrators and who implements these.
- confirm the competency, capacity and reliability of local law enforcement – is it they complete.
- confirm whether there have been losses, and what legal proceedings might result.
- if not law the perpetrator, consider responses or measures based on credible evidence.
- determine whether the victim needs to be removed from the threat – including means of removal.
- establish if local security forces are adequate to meet the threat – are there resources needed.
- determine whether there maintenance risks – notify the RSM.
- establish the impacts to external stakeholders, operations and reputation – have they been notified.

Reporting Activities (RTRP Information)

- provide the victim, roles, ages a combination of those being threatened.
- provide the specifics on the threat and how these were made.
- report on the identity of the perpetrator – their relationship with the victim and their age, sex.
- confirm if there are immediate internal people – what role is present and what might happen.
- provide any evidence if it is going to substantiate the event, confirm if it is legally viable.
- if not law the perpetrator, indicate if the competency, responsiveness or otherwise are present.
- if external group is the perpetrator, indicate their relationship a potential source of threat.
- provide details on the competency, capacity, identity responsiveness and activities of the police.
- confirm if there are financial consequences of the event – provide details.
- report on any legal maintenance – notify the RSM.
- report on what with the threat has completed, what is planned, and when report is made.

FACILITY BREACHES: I.3

Provide an Immediate Report

Knowledge: Facility breaches are the unlawful and/or intentional entry by individual or groups with the intent to steal, injure, damage, destroy, disrupt, take hostages or otherwise. Perpetrators include criminals, terrorists, vandals, special interest groups, community groups, labor unions, or military organizations.

Priority: Identify intruders through to people and life safety... prevent further risk flow. **Knowledge Management:** Identify reported intruder and obtain instructions.

Pre-Planned Response (PPR)

- ☐ confirm whether staff were alerted, and the extent of any impact (use the appropriate PPR)
- ☐ confirm intruders are still on site and whether the area has been kept secure from access
- ☐ confirm what facility got into what was there then and the areas affected got off access to
- ☐ confirm the date and time of the breach, and if possible, how many were involved
- ☐ confirm the identity of the intruder(s) if known, their agenda, and if they were armed (with what)
- ☐ ensure all security personnel are instructed and are in place, and notify the police authorities
- ☐ secure staff, visitors and critical areas (areas lost to police), and identify all lost parties
- ☐ determine whether an experienced person (manager) required, available will provide this
- ☐ determine if any sensitive information was stolen or at risk, or if other items were damaged
- ☐ secure and account for the location and status of all staff... report an unconscious for staff
- ☐ conduct a risk analysis. Intruders are on site... consider answering using safe routes
- ☐ use all the available intruder detection systems to track and record events... provide to the police
- ☐ conduct an inventory of critical assets, resources and information... report on missing items
- ☐ establish an incident control team (ICT) and control where the breach is happening regardless
- ☐ confirm the competence, reliability and responsiveness of responding police authorities
- ☐ determine if additional security resources are required (their functions, placement and status)
- ☐ determine whether areas are "hot or warm"... control off these areas for the police
- ☐ determine a requirement to report to the authorities... that means a requirement to

Reporting Guidelines (GIFMP Information)

- ☐ provide the location of the breach, the date, date, time, and the specific areas involved
- ☐ report on whether the intruders departed and they are still on site or present a threat
- ☐ provide an update on the identity, equipment, agenda, where, where, where, where and weapons
- ☐ provide information on the location and status of staff and report on whereabouts for staff
- ☐ report on any stolen or damaged information, assets, materials or information... and the impact
- ☐ release the competent reporting and experience of police... and any other notes
- ☐ confirm if the area has been swept for intruders and exposed to security, and all safe
- ☐ report on the business and operational impact of the event... and what work resources
- ☐ report on what will be, has been, will be, what is, is, and what... report if lost all
- ☐ have you notified the local authorities... when and who did you notify

FATALITIES AND REPATRIATIONS: L1

Provide an Immediate Report

Reportable fatalities are events where a person (or group) has been killed in a work-related incident, an industrial fire/fatality, an auto-deployment away from their place of residence, resulting from natural causes, an accident, or through a act of violence. Repatriation is the transportation of the deceased remains for burial.

Priority: identify resources through telephone and in-person – present further risk-free. (Ministerial Management) identify reported incident and submit documentation.

Pre-Planned Response (PPR)

- confirm if staff/off are at risk – initial actions are required to protect them – account for all staff
- confirm the time, nationality age, gender, religion and department of the deceased
- confirm where the death occurred (off/duty site) – provide the specific location details
- confirm if the event resulted from work-related activities – on site, during travel or at meetings
- confirm if the event resulted from non-work related activities – home, holidays or social events
- confirm if the death was a result of violent crime – assault, firearms, gunshot, kidnapping, riots etc.
- confirm the police is aware of the incident – request support (investigation and documentation)
- if resources are, locate and engage families and provide the deceased remains for transportation
- identify the resources needed for family notification – the report, friends, family, the police etc.
- confirm the need of an advocate – family law services, engage with them for family management
- identify grief resources including support for the family, and staff who witnessed the event
- offer personal effects – items on clothing, photograph, wallet, keys, and consider sending it to create a sense of closure
- provide an inventory of documents – passport, ID, death certificate and military file etc.
- confirm religious and cultural requirements – restrictions, religious, withholding etc.
- confirm burial, cremation and transportation arrangements (speaking with the family)
- identify an event who will accompany the deceased to their final resting place, or the family
- confirm what autopsy and embalming requirements exist – family approval and cost are needed
- consider taking a statement or taking take photographs or video for the family
- conduct an investigation – identify, ongoing, this, fatality, repatriation, bodies, deceased objects

Reporting Guidelines (STEP Information)

- confirm the time, nationality age, gender, religion, last department of the deceased
- provide the location, day, time and cause of death – open body, auto or non-accident related
- confirm if the event resulted from natural causes, an accident, negligence or intentional violence
- confirm if there is a witness available to discuss the details to law for the records – on site
- confirm what staff details and the last person / agency to engage with the family
- confirm what documentation is present, and what information or documents are needed
- confirm if a criminal investigation is required and who will conduct the investigation
- confirm funeral arrangements have engaged and are responding
- report on what actions have been completed, what are planned, and what support is needed

FOREST AND BUSH OR WILD FIRES: L2

Provide an Immediate Report

Remember: Every forest and wild fire incident has a high chance of serious incidents, injury and fatalities and dry weather results in a rapid spread of fire with a major forest fire outbreak. There is no such thing as a safe emergency response and the effort and attention that can result in secondary combustion threats may result.

Priority: Identify structures through to people and life safety... prevent further risk from the fire incident. Manage the incident, identify reported material and contain the incident.

Pre-Planned Response (PPR)

- ☐ Account for all staff, their status and location... provide details on any missing staff
- ☐ Confirm the location of the fire, and the direction and speed of extension
- ☐ Determine whether local government or public bodies are providing instructions and directions
- ☐ Consider the window of opportunity within which to respond, before the fire reaches facilities
- ☐ Identify the most vulnerable people who may require to be evacuated early, or who need assistance to evacuate to places of safety, recently materials at risk
- ☐ Identify structures at high value and at risk points... find any changes to the fire location
- ☐ Confirm structures at high value and at risk points, or place under shelter
- ☐ Confirm when non-essential staff should be released from work, or what all staff should do
- ☐ Turn off gas or other machinery or any activities which could present a risk of extension
- ☐ Fully external combustibles at the risk of being set alight... fuel, gas, non-flammable supplies
- ☐ Move any flammable or combustible materials away from facilities at high value assets
- ☐ Fully shut away from the extension area of the fire... to ensure that no more burning or smoke
- ☐ Determine emergency response capacity and competence... determine what resources that give
- ☐ Provide details on any injured personnel, implement the appropriate PPR
- ☐ Test down roads and the surrounding area if possible to reduce combustion risk
- ☐ Set back, isolate, back and other measures underway to cut with the lighting
- ☐ Have buildings and nearby the management of your various and future plans

Reporting Guidelines (GEM Information)

- ☐ Provide details on the location, direction and speed of the fire in relation to the facility
- ☐ Provide details on the status of staff... report on any missing staff
- ☐ Report on any reports of fire that (using the appropriate PPR)
- ☐ Consider details of any potential secondary threats which might result... report these fully
- ☐ Provide details on any critical data or material, equipment and the risk requirements
- ☐ Report on emergency response actions... what other competencies, capacity and resources
- ☐ Provide information on any damage which has occurred and the implications of that damage
- ☐ Report on any media interest... provide details on the point of contact and associated status
- ☐ Confirm evacuation, back and other points, a little longer for all affected
- ☐ Report on what activities have been completed, actions are planned, and what support is needed

FRAUD AND CORRUPTION EVENTS: L2

Provide an Immediate Report

Identified fraud and corruption events are offences where individuals deliberately deceive others or unlawfully obtain property, services or benefits. Fraud can be thought of as any (false or internal) deception. Fraud includes both internal and external, indirect and employment/fraud, bribery, embezzlement, false billing and advertising and losses.

Identify directly connected through to people and its safety – prevent further risk from. (Global Anti-Corruption) Identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ☐ determine the nature, size, location, nationality, influence and complexity of the perpetrator(s).
- ☐ establish whether other employees, managers or external stakeholders are involved.
- ☐ identify other individuals, groups, activities, locations or products at risk.
- ☐ determine whether the issue involves the organisation directly or indirectly.
- ☐ determine the scope, direction and goals of the perpetrator(s).
- ☐ define the scope of the problem, its size, and the spread of the issue.
- ☐ establish the potential for direct impact upon people, whether be internal and regulated.
- ☐ determine whether involving third parties, especially with external stakeholders.
- ☐ protect any individuals, groups, products, activities or facilities at risk.
- ☐ determine whether security investigations and legal resources to respond to the incident.
- ☐ establish the legal and industry restrictions of the issue – determine the impacts the organisation.
- ☐ determine whether an organisational policy has been broken or threatened.
- ☐ determine whether prior support is required – and whether this is then provided to it.
- ☐ establish whether others may be at risk – and how and what should then be the threat.
- ☐ control documents and information the risk to a risk protect any investigations being undertaken.
- ☐ further assistance for potential criminal prosecution, or disciplinary responses.
- ☐ engage with legal resources establish the legal risk and appropriate response measures.
- ☐ review working practices – the need for improvements (prevent staff) or time off (external threat).

Reporting Guidelines (GRIEP Information)

- ☐ provide the facts, position and representation of those involved.
- ☐ provide details of known facts about the incident and assumptions and beliefs.
- ☐ determine whether prior support is required and whether this is then provided to it.
- ☐ confirm whether the perpetrator(s) knows they have been "discovered" at this point.
- ☐ confirm whether people are at risk – and who and what risk.
- ☐ explain the nature and severity of the incident the threat to the organisation and the situation.
- ☐ offer professional opinion of the implications of the incident – to security, legal and impacts.
- ☐ confirm if information, assets and issues have been secured to prevent further loss.
- ☐ confirm whether third authorities are aware of the incident, and if they, has responded.
- ☐ provide details of what actions are being taken, by whom and when.

HIBERNATION, RELOCATION OR EVACUATION: L2

Provide an Immediate Report

Immediate information situations are used where the safer to relocate or location, rather than waiting to know hibernation occur where this and the security or safety conditions permit a movement time, before emergency response. Movements are typically faster moving, being response to a rapid deterioration in security conditions.

Priority: clearly structure through to people and if safety – prevent further risk first. **Incident Response:** clearly reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ☐ determine the nature of the threat, how imminent it is, and what areas will be affected.
- ☐ confirm what the “nature of opportunity” is where a decision not to take and implement.
- ☐ determine whether the safer to hibernate, relocate or evacuate.
- ☐ clearly communicate staff – determine whether a staged relocation or evacuation is required.
- ☐ determine if non-essential essential personnel not work functions, or otherwise relocate.
- ☐ determine changes to working practices – such as order hibernation and working from home.
- ☐ track government and regional reporting alerts, national and local action.
- ☐ clearly trigger what situation is a danger response – ensure these triggers are identified.
- ☐ confirm with teams a relocation options – share these locations with managers and staff.
- ☐ determine the capacity for movements, including vehicles and assets.
- ☐ clearly protect those trigger for reports, facilities and parts – and the organisations.
- ☐ confirm the staff have account for all staff and consider leaving movements and activities.
- ☐ confirm major communications using staff with police before reporting.
- ☐ clearly state back up emergency and what critical and high-risk assets should be moved.
- ☐ provide briefing for staff a critical national facility, members, as well as local staff.
- ☐ have communications, provide reporting protocols for staff.
- ☐ determine whether a “key contact party” is required to secure and protect the facility.

Reporting Facilities (RFRP Information)

- ☐ confirm the nature of the threat, when it will occur, and how much time is available to plan.
- ☐ provide the details of all staff their location and status providing details on moving staff.
- ☐ provide information on government and national alerts, warnings and instructions.
- ☐ confirm the location of major parts, with teams and location moving points.
- ☐ confirm if a staged relocation will occur and what triggers are in place to control the process.
- ☐ have and confirm emergency communications systems – report when this action.
- ☐ provide information on emergency alert required and how government will be able.
- ☐ confirm what operations the has for operations and business – have communications back nothing.
- ☐ confirm what critical data backup and transfer are required, and whether that work is critical.
- ☐ confirm the staged plan for relocating or moving staff from an affected areas a point of safety.
- ☐ report on what with the movement completed, what is planned, and what support is needed.

SPECIAL INTEREST GROUPS: I3

Provide an Immediate Report

Need/When: Special interest groups include right and left wing activists, as well as animal and environmental rights groups who are not state and law-abiding citizens operating, or are under-represented forces staff working against us, and through work stop, or damage events, endanger the ability for the organization to operate.

Priority: Identify sensitive groups to people and life safety... prevent further risk first. (Incident Response Management) Identify reported interest and environmental threats.

Pre Planned Response (PPR)

- ☐ confirm the name of the organization, the nature and agents of the special interest group.
- ☐ determine if the group is having jurisdictional groups (territories), names or threats.
- ☐ establish whether individuals are working across the facility or grounds to cause disruption.
- ☐ identify the threat of future, either outside of the organization, or within buildings.
- ☐ establish whether members of the group are working to influence the site and gather information.
- ☐ determine whether the site and buildings should be "locked down" to prevent access.
- ☐ establish whether the threat is to "withhold" and provide an approved response.
- ☐ confirm if they have gained access into the facility and what access have been assessed.
- ☐ confirm if they present a physical or psychological threat to staff.
- ☐ notify security personnel to limit access, or to lock down the facility, and document any responses.
- ☐ notify local police authority to estimate a minimum monitoring of the response.
- ☐ identify potential media interest and notify the state.
- ☐ establish whether the disruption event requires a temporary change to working practices.
- ☐ identify any assets or knowledge which requires protection by the special interest group.
- ☐ establish whether any loss have been noticed, record events to gather prevent potential incidents.
- ☐ identify the consequences for the special interest group, providing any contact details.
- ☐ determine if additional security resources are required to manage the situation.

Reporting Guidelines (RTEP Information)

- ☐ Provide the name, type and known or suspected agents of the special interest group.
- ☐ identify any demands being made, and any associated deadlines.
- ☐ identify the additional interests of individuals involved with the special interest group.
- ☐ report on the operational state of the individuals... approved, valid, relevant force.
- ☐ report if individuals have locked access points, or gained access into the grounds or buildings.
- ☐ provide details on any activities or groups being negatively used the nature of the risks.
- ☐ report on if the grounds and buildings are locked down, and are they secure.
- ☐ provide details on the response, security requirements and activities being taken by police.
- ☐ provide details on the physical, operational, business and reputational risks.
- ☐ identify any media involvement including details, points of contact, questions and activities.
- ☐ report on what with this incident completed, what all file used, and what support is needed.

INVESTIGATIONS: L2

Provide an Immediate Report

Knowledge: Investigations result from incidents of thefts, fraud, workplace violence, reporting facilities, regulatory breaches, associations of individuals, or activities or important regulatory/regovernment processes/structures. Investigations may have started internally in partnership with internal agencies or by public authorities.

Priority: identify structures through to people and its safety – prevent further risk first. **Knowledge Management:** identify reported internal and external stakeholders.

Pre-Planned Responses (PPRs)

- ☐ determine the nature of the incident requiring investigation.
- ☐ identify those being investigated and those associated directly and indirectly with the incident.
- ☐ determine if people who are employees, subcontractors, partners, or government officials.
- ☐ determine the sensitivity level of the incident and the associated information control response.
- ☐ establish whether the incident was internal or external, starting as a combination of both.
- ☐ confirm what systems exist, what their status is, and whether it is formal or suggests it exists.
- ☐ determine whether those being investigated have been identified in the past – if not, tell about it.
- ☐ confirm whether organizational incidents have been identified or if they have been missed.
- ☐ if a breach has been broken that determines which level and the associated implications.
- ☐ establish the parameters in short as investigation measures – the contractual and legal constraints.
- ☐ determine and protect all evidence, whether physical, digital, verbal, and witness statements.
- ☐ identify witnesses at stake and other interviews in a legal or appropriate channel.
- ☐ determine who might be at risk from information or evidence, especially whistleblowers.
- ☐ establish whether a case of abuse, discrimination or legal violations required for reports.
- ☐ ensure the rights of reports are protected, with full support.
- ☐ identify appropriate supporting resources, including legal, investigative and multi-agency.
- ☐ determine the role the incident present in the organization and other stakeholders.
- ☐ determine whether the incident is part of a broader legal issue.
- ☐ establish the past, structure and outcomes of the investigation, fully appropriate strategies.

Reporting Guidelines (RTMP Information)

- ☐ inform the persons involved in the incident – the full formal, position and their organization.
- ☐ provide status information, scope and content of the incident.
- ☐ determine those known to be involved and those suspected to be involved.
- ☐ when was the situation identified, how long it has been occurring and where has it occurred.
- ☐ when regulations, standards or rules have been broken – what are the associated implications.
- ☐ determine what evidence is available and what further actions are needed.
- ☐ are individual at risk – their status, the role level and support resources employed.
- ☐ provide status information regarding activities, structures, resources and constraints.
- ☐ provide status information about other internal and external.
- ☐ provide status and some information on support resources being used.

LABOR AND COMMUNITY DISPUTES: L2

Provide an Immediate Report

Knowledgeable labor and community disputes can result over employment disagreements, share law enforcement, environmental hazards, political instability, industrial accidents, together with coverage, human death and work-related incidents, due to downgrading and termination, or from criminal outcomes.

Priority: identify structures through to people and its safety – prevent further risk-factors.
Knowledgeable Management: identify reported internal and external stakeholders.

Pre-Planned Responses (PPRs)

- ☐ determine whether the latest control points, grounds or facility needs to be taken down.
- ☐ make the date, time and location of the labor or community dispute.
- ☐ confirm the background of the dispute – compliance, agenda, there will be a structured timeline.
- ☐ confirm the spokesperson for the labor group or community – provide contact details.
- ☐ confirm whether the group requires or requires – protect the safety and wellbeing of staff.
- ☐ confirm whether the group has access to the site grounds or buildings.
- ☐ confirm they will have been informed – provide details using the appropriate PPR.
- ☐ confirm they may require access or refuse access has been taken into account – provide a report.
- ☐ determine if any critical activities or meetings are taking place, it will then – adjust accordingly.
- ☐ determine if additional security resources are necessary or whether police involvement is needed.
- ☐ determine whether any laws have been broken, and what actions might support or prevent.
- ☐ ensure PPR meetings and other strategy is needed to protect for use in critical proceedings.
- ☐ determine if more people or changes are needed – including waste a route and working from home.
- ☐ define the responsibility, capacity and effectiveness of the person – report on their activities.
- ☐ establish a location for community or labor union working meetings, make a meeting schedule.
- ☐ determine whether the site needs to be shut down, and how staff will safely exit the area.
- ☐ ensure meeting staff has day a way from specific area – access points, it is not appropriate the site.
- ☐ determine whether media requirements likely – engage with the media.

Reporting Guidelines (RTEP Information)

- ☐ report on the date, location, content of any incident or labor dispute activities.
- ☐ provide details on the incident, identify the content details of the spokesperson.
- ☐ report on the agenda of the group, and whether there is safety in their demands.
- ☐ report on the level of protesting and organizational threats to people, assets or facilities.
- ☐ confirm what disruption affects the activities of business, meetings or operations.
- ☐ report on if any security requirements have the needs or if additional support is required.
- ☐ report on any police involvement, their competence and activities and who is in charge.
- ☐ provide organizational and information what is available.
- ☐ provide details on any loss, which have been broken, and any potential legal outcomes.
- ☐ report on whether the business completed, activities planned, and what support is needed.

LANDSLIDES AND LANDSLIPS: L3

Provide an Immediate Report

Immediate establishes a relationship with others where there were no existing relationship; the making of the report, resulting in gathering further information. They are done over time, following heavy rainfall or the an earthquake, preventing future life safety structures, a state and movement, and secondary contamination and explore these life

Priority: identify structures through to people and life safety... prevent further risk that. **Disaster Event Management:** identify reported material and submit it. **Disaster Event**

Pre-Planned Response (PPR)

- ☐ confirm the specific location, in area, affected by the potential occurring threat.
- ☐ provide details on what evidence suggests a potential situation, if it has not occurred.
- ☐ when additional and efforts are being provided by non-governmental officials.
- ☐ account for all personnel... provide details of anyone who have not been accounted for.
- ☐ conduct a relocation or evacuation if required... confirm the location threat for entering a safe.
- ☐ turn off gas and power supplies... return the location to an.
- ☐ back up critical and essential data and remove high value assets... if it is safe to do so.
- ☐ notify management may away from the area until the "all clear" has been officially given.
- ☐ provide details on any structures at risk to the facility... provide images if it is safe to do so.
- ☐ provide details on any structural damage... provide a list with business and operational reports.
- ☐ confirm whether any visitors were on site and their location a relative.
- ☐ determine if secondary threats exist: gas pipes and fuel pipelines, water damage etc.
- ☐ identify an exposure to impact the further structural integrity... confirm if it is safe to occupy.
- ☐ where the responsibility is a responsibility of third emergency responders.
- ☐ confirm if anyone is in the area... use the appropriate PPR.
- ☐ confirm if there is maintenance... notify the state.
- ☐ confirm how business and operations are continuing including alternative work sites.

Reporting Facilities (RTEP Information)

- ☐ provide the specific location, area and facility, which is affected.
- ☐ confirm if there has been reported as the incident has actually occurred.
- ☐ report on whether any structural facilities have occurred... provide details.
- ☐ report that staff are accounted for, or where a missing... provide details.
- ☐ where if power, water or gas supplies were turned off, and if assets have been relocated.
- ☐ report on whether structural assets have occurred and the resulting impacts.
- ☐ where any changes to work procedures and alternative work sites.
- ☐ where any media interest, the contacts and the relevant points of contact.
- ☐ report on the additional, efforts and efforts being taken by third emergency responders.
- ☐ where the impact is a structural and stability and the appropriate strategy managed.
- ☐ report on whether efforts have been completed, efforts are planned, and when support is needed.

LOSS OF SENSITIVE INFORMATION: L1

Provide an Immediate Report

Recognize the loss of sensitive information (see coverage) recover through backing or recovery of other systems, the theft of documents, e-mails, computers and files stored through the theft of paper documents, or destruction intelligence activities they are perpetrated by internal, governmental groups, hostile governments, competitors and so on.

Identify identify sensitive things to people and identity – prevent further risk flow.
Minimize Damage identify reported incident and contain stakeholders.

Pre-Incident Response (PIIR)

- ☐ confirm the nature of the information loss – electronic, e-mail, text copy, or something in writing.
- ☐ determine where the information was stored or lost.
- ☐ confirm the specific location, system, time and date of the information loss.
- ☐ confirm if the information was actually stolen, or has it been lost or deleted.
- ☐ confirm the identity of the perpetrator (if known), then update a written record of action.
- ☐ confirm the information sensitivity and importance – both internal and external stakeholders.
- ☐ determine who are the owner of location of the information – provide the correct details.
- ☐ determine the information was accessed or stolen, and if any stakeholders still have
- ☐ strategies to use if recovery, recovery, or systems were lost that, or if they were not in place.
- ☐ determine if internally, groups or organizations are impacted – define associated sources of action.
- ☐ confirm what incident action need to be started to the information loss and the impact to them.
- ☐ determine the immediate risks – people, assets, operations, business, reputation, sensitivity
- ☐ determine what action of business and assets function need to be started to the information loss.
- ☐ determine the competitive, regulatory and reputational – and why compliance of policy approach.
- ☐ determine what operational resources are needed to contain the situation.

Reporting Guidelines (RTMP Information)

- ☐ provide details on the nature, extent, system and reason for information loss – and time and date.
- ☐ confirm the nature of the information, its sensitivity and the impact associated with the loss.
- ☐ report on the extent and location of the information – provide the points of contact.
- ☐ confirm if risks and vulnerabilities still exist, and what measures are being used to manage them.
- ☐ provide details of steps that internal and external stakeholders – and if they are aware of the loss.
- ☐ report on any internal activity and system responses as well as any police responses and activities.
- ☐ confirm if the loss presents a real and immediate risk to people, operations, a businesses.
- ☐ report on what action has been taken or planned, what are planned, and what support is needed.

MASS CASUALTY EVENTS: L1

Provide an Immediate Report

Need/Effect: A mass casualty event is where there are multiple injuries and potentially fatalities, resulting from a human-made event (bomb, riot, or shooting, an industrial accident (fire, explosion or collapsing), or a natural disaster (earthquake, flood or tsunami). Mass casualty events often require an immediate first responder response.

Priority: Identify casualties through to people and life safety – prevent further risk/fat. **Incident/Event Management:** Identify reported incident and extent of involvement.

Pre-Planned Responses (PPRs)

- confirm the date, time, circumstances of the incident, and the type of event which has occurred.
- communicate the nature, ages, genders, injuries, threat factors and roles of the emergency or facilities.
- confirm if the threat remains, or whether the area is now safe enough for all staff.
- determine if secondary threats exist, such as fires, explosion hazards or significant toxic releases.
- confirm the competency, capacity and responsiveness of local responders.
- determine whether the responding resources, or agencies are sufficient to manage the event.
- confirm who is in charge of the emergency response – provide the incident details.
- identify which resources and stakeholders are being alerted to the incident.
- determine whether responding providers have the “right capacity” to treat all participants.
- establish whether medical transport and resources are needed to support medical evacuations.
- identify where facilities will be temporarily closed, and where the facilities will then be managed.
- confirm the first details – engage local and international facility management personnel.
- confirm whether the site is hazardous to the general community, account for all staff (especially students).
- report the details of missing staff – important the appropriate Missing Persons (MP).
- ensure staff is away from affected areas, if a threat is to exit the site.
- identify an institutional trust (ITP) where emergency responders can be sent and managed.
- determine stakeholder interest: media, donors, the community and others.

Reporting Facilities (RFP Information)

- provide the full names, ages, genders, injuries, threat factors and roles of participants.
- confirm the date, time and specific location of the event – and when specifically happened.
- establish whether the danger is real or whether there is a threat, including any secondary risks.
- inform emergency responders competency and responsiveness – identify actions needed.
- confirm the location of the incident control team (ICT) – confirm the contact details for responders.
- provide structurally external stakeholders – media, government, community, family and others.
- provide details on lost or damaged critical assets, materials or critical items.
- confirm if the threat lasting has been evaluated, and if operations are partially or fully stopped.
- confirm if there is any body capacity and facility issues – confirm the risks.
- report on whether the facilities completed, what are planned, and what support is needed.

MISSING PERSONS: LB

Provide an Immediate Report

Knowledge: People go missing for various reasons – administrative, mental health issues, through illness or injuries, as a result of an accident, from a family home or care, arrests, if they have been taken hostage, or have been kidnapped or taken “offshore” (missing) when an appointment is missed and they cannot be contacted.

Priority: Identify structures through to people and if safety – prevent further risk from. **International Management:** identify reported incident and obtain information.

Pre Planned Responses (PPRs)

- ☐ confirm the name, age, race, gender and contact details of the missing person.
- ☐ try all means of communication to contact the person (including social media) – home telephone.
- ☐ confirm if there is a history of attendance or availability at all early morning medical conditions.
- ☐ confirm who was the last person to see or speak with them, and their intended plans (if at all noted).
- ☐ contact all potential places where they could be – work, family, friends, or social contacts.
- ☐ contact hospitals and emergency services if they have been treated at an accident.
- ☐ contact the police to see if they have been treated or arrested, or have been arrested.
- ☐ contact medical team who confirm to determine whether they have been seen/health treatment.
- ☐ meet staff near front entry, hotel, courts or elsewhere (from the person about party staff).
- ☐ confirm whether the missing person has lost rights, or other modes of transport.
- ☐ have someone check to see if the person's government or car, lost work, or visa failed.
- ☐ contact the authority of international staff has gone missing – alert them of the situation.
- ☐ have staff members share known travel routes to look for vehicle accidents.
- ☐ ensure staff engage with the family together family and phone, on the missing person.
- ☐ determine whether the person are vulnerable, high profile and the nature of any known threats.
- ☐ identify where investigation is under for support with finding the missing persons.
- ☐ working with missing person details – consider using the media to seek support.

Reporting Facilities (RTEP Information)

- ☐ provide the name, age, gender, height, weight, ethnicity, and any known medical conditions.
- ☐ provide all contact details – mobile and home phone, email, address, social media, addressable.
- ☐ provide the last known date, time and place associated with the missing person.
- ☐ confirm any known problems with administratively mental health issues or availability patients.
- ☐ explain whether the person was vulnerable, high profile or had been threatened recently.
- ☐ provide the contact details of the last person to be in contact with the missing person.
- ☐ confirm the work or social agencies, or date with services of the missing person.
- ☐ confirm how long the person has been missing (if at all seen or possible).
- ☐ explain what activities have been conducted, and what resources are planned, and for what.
- ☐ confirm what locations have been checked, and what have been left to be checked.
- ☐ confirm the response from medical services, the police, government and appropriate agencies.

NEGATIVE MEDIA EVENTS: L1

Provide an Immediate Report

Remember: Together, malfeasants can result from an individual's conduct, failure or community inquiry, leading to an investigation, from fear and corruption, racism, sexism and discrimination, regulatory breaches or events. Negative media may also be motivated by competition, jealousy, or due to political friction and government agendas.

Priority: Identify immediate threats to people and life/safety – prevent further risk/fear. **Incident Response:** Identify reported incident and contain it, investigate.

Pre-Planned Response (PPR)

- ☐ confirm the event the media are reporting on, provide specifics according to the appropriate PPR.
- ☐ confirm the media outlet name and their potential motives.
- ☐ confirm the date, time, a summary of any media engagement or with this.
- ☐ determine whether the media group has a negative agenda and whether they are harassing you.
- ☐ determine what facilities are associated with news releases, and the media room for reporting.
- ☐ assign staff members and approach for engagement and release from the team.
- ☐ media that wishes to talk they will be approached by the media or response protocols.
- ☐ ensure that staff are sitting with the media room to or around the media.
- ☐ verify staff of the identity of the organization's spokesperson.
- ☐ ensure the PPR and engagement and approach whether media interest.
- ☐ report on whether any thing has gone wrong, where, where and when was fixed.
- ☐ confirm what information the media have, and whether the media they are seeking.
- ☐ confirm whether the media have, if they, access to the facility, grounds or buildings.
- ☐ establish a location and address where the media can be located.
- ☐ confirm whether the media are still present, if they have left, and what they will return.
- ☐ report on specific questions presented by the media and where has planned to answer these.

Reporting Facilities (RFP Information)

- ☐ media about confirmation the media are covering, provide the appropriate PPR.
- ☐ provide the name of the media outlet, and the point of contact for the reporters.
- ☐ media about location, where and what time the media engagement was held.
- ☐ media about contact information the media has, and what questions are being asked.
- ☐ report on whether the media have access to the site grounds or buildings.
- ☐ confirm if thing has gone wrong, where, where and what was fixed.
- ☐ confirm where media are sitting and how plans, and any additional things go.
- ☐ report on the approach and level of reporting or proximity with each media group.
- ☐ confirm what information has been shared, a release provided the other parties.
- ☐ confirm that all managers a release have been appropriately located.
- ☐ report on whether the media have been completed, whether are given back, and when support is needed.

PANDEMICS AND EPIDEMICS: L1

Provide an Immediate Report

Identify/offer functions and systems (where infection disease) not affected regions, countries, or sub-national or groups. These present a serious risk to life saving but can also result in over-reaction, waste of resources/supplies, health care system collapse, and other major loss and harm to individuals and groups.

Identify clearly coordinate through to people and life safety – prevent further risk flow. **Minimise** Management's identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ☐ determine the source infection disease nature, the areas of infection and the infection period.
- ☐ confirm how the disease spread a little initially been associated with it.
- ☐ confirm if staff, visitors or other stakeholders have been reported (or confirmed) as infected.
- ☐ provide the nature location, position, age and gender of any reported cases of infection.
- ☐ identify if work practice changes are required – trigger work force, or work from home strategies.
- ☐ test to have testing centres/where possible – using self-testing options.
- ☐ confirm the competency, capacity and whether of local health system.
- ☐ confirm the status of international alerts, advisories and international response measures.
- ☐ determine whether sanitary and other health products are required facilities and work areas.
- ☐ determine whether travel restrictions and food of border areas are required.
- ☐ identify when resources are available for vaccination and treatment, define procedures health.
- ☐ define security threats – and identify level of risk of key important institutions, a liability loss.
- ☐ define if cases reported a non-material or chemical event – consider emergency requirements.
- ☐ determine whether the refer to other ongoing relevant is available.
- ☐ consider standing down activities and non-essential staff from work – provide update to staff.
- ☐ determine the capacity of medical infrastructure and the availability of medical supplies.
- ☐ clarify treatment status, their competence and capacity, and medical evaluations are needed.
- ☐ provide infrastructure resource planning, emergency control strategies, and reporting protocols.

Reporting Guidelines (GHRP Information)

- ☐ provide status information, infection level, infection period and infection area of the disease.
- ☐ report on areas of infection situation to work areas a liability loss.
- ☐ confirm position on reported infections, nature, position, role, requirements and locations.
- ☐ report on international infection control alerts, advisories and response activities.
- ☐ report on the competency, capacity and whether of local health system.
- ☐ report on when the options to business and operations the needed.
- ☐ identify vulnerable people and groups, work force practice and resources requirements.
- ☐ report on when natural and equipment need to be provided to control infection spread.
- ☐ report on likely or emerging secondary risks such as food distribution and the loss of utility.
- ☐ report on when activities have been completed, when are planned, and when support is needed.

PRODUCTION DISRUPTIVE EVENTS: L3

Provide an Immediate Report

Identified production disruptive events can occur for many reasons, including equipment failure, accidents, spills and/or contamination, legal or regulatory issues, labor disputes, terrorist threats, acts of terrorism, floods and storms, interruption of managers and work flows, and customer telecommunications.

Priority: identify immediate threats to people and life/safety... prevent further risk flow.
Incident Management: identify reported internal and external stakeholders.

Pre-Planned Responses (PPRs)

- ☐ confirm the nature, extent and status of the disruptive event.
- ☐ identify the possible perpetrators of the event; determine their goals and agenda.
- ☐ Account for all staff: reporting on any staff missing, injured, arrested or at physical risk.
- ☐ determine whether a site or facility lockdown is required (implemented as required).
- ☐ determine the legal implications of the event... engage with legal counsel.
- ☐ determine the security implications of the event... engage with security.
- ☐ determine any other implications of the event... engage with health and safety.
- ☐ determine any supplier implications... engage with suppliers (and information as required).
- ☐ determine any third party implications... engage with IT.
- ☐ determine any business impacts... engage with administration, security and operations.
- ☐ determine whether there's a need to respond... respond... take their report and implement needs.
- ☐ determine people who are impacted... identify alternatives if that people are absent/offsite.
- ☐ determine government needs... especially long term or high cost items or services.
- ☐ determine whether media interests likely... if that respond to the threat.
- ☐ identify impacts upon stakeholders and operations... notify them if a situation.

Reporting Guidelines (RIR/IRP Information)

- ☐ provide the date, time, location, and nature of the disruptive event.
- ☐ Report on whether the event is real or threatening... whether ongoing (continuing).
- ☐ Report on if that people's safety/location is seriously impacted for business operations.
- ☐ provide details of any external stakeholders who have been notified or who's aware of the event.
- ☐ Report on any threats made by perpetrators, including the group, time, date and circumstances.
- ☐ Report on if the facility has been locked and whether lockdowns are active and in place.
- ☐ Report business and operations implications and any responses... if that report to all stakeholders.
- ☐ Report on the consequences, statistics and responses a number of responding a authorities.
- ☐ Report on media enquiries, including the media point of contact, questions and agenda.
- ☐ Report on what actions have been completed, what are planned, and what support is needed.

RADIOACTIVE SOURCE LOSS: L2

Provide an Immediate Report

Remember: the loss of radioisotopes or radioactive materials represents significant operational, legal and security implications, whether from a local, national, international, or if acted by criminal, terrorists, these events of either causing the organization, or by terror groups seeking to use the source for "dirty bombs".

Priority: identify immediate threats to people and life/safety... prevent further risk from **Material Management** identify reported material and contain contamination.

Pre Planned Response (PPR)

- ☐ confirm whether the source has been stolen, it is just missing or lost or stolen (the correct all)
- ☐ identify the relevant government and regulatory agencies to be notified
- ☐ confirm the contact details of the person reporting the loss of a radioactive source
- ☐ confirm who has control and ownership of the source at the point and time of loss
- ☐ confirm the nature and quantity of the radioactive source which is missing
- ☐ identify the possible perpetrators for activity associated with theft or sabotage
- ☐ confirm the format of the packaging for the radioactive source and a by the type
- ☐ confirm if source containers have been searched; confirm areas have been properly swept
- ☐ confirm if containers have returned their status and whether or not to locate the source
- ☐ determine whether a site or facility lockdown is required; implement the lockdown policy
- ☐ conduct exit flow of vehicles and people leaving work area and facilities
- ☐ provide briefings to key receptionist or office managers... should lockdown reports be raised
- ☐ conduct an investigation to gather specific facts on the loss provide police reporting
- ☐ determine whether media elements likely; internal response to the IIRMT
- ☐ identify impacts upon stakeholders and operations... notify them if appropriate

Reporting Guidelines (RIRMP Information)

- ☐ provide the date, time, location, and amount of loss, and the loss event details
- ☐ provide details on who has control of the source, where stored; provide their contact details
- ☐ provide details on any packaging and the type of vehicle to transport the source
- ☐ provide details of any external contributors who have been notified or who a source of the loss
- ☐ Report on any threats made (if applicable) including group, time, date and statements
- ☐ Report when all work areas, roads and other have been swept and who conducted the search
- ☐ Report on if the facility has been locked and whether vehicles and people have been searched
- ☐ Report on the competence, reliability and response a number of responding authorities
- ☐ Report on media enquiries, including the initial point of contact, questions and agenda
- ☐ Report on what units have been deployed, what are the main, and what support is received

ROAD TRAFFIC ACCIDENTS (RTAs): LB

Provide an Immediate Report

Remember: Road traffic are the collision of a vehicle with another vehicle, structure, person or animal when it results in injury, death, damage and/or damage to any or damage to property. This are related to road vehicles, not performing work functions, or where deployed in that staff are injured, arrested or killed.

Priority: identify, instructive through to people and life safety – prevent further risk first. **Minimise Management:** identify reported incident and submit it. **Investigation:**

Pre-Planned Responses (PPRs)

- ☐ determine the nature and extent of any reports when these received.
- ☐ confirm where report will be taken from based on the specific location details.
- ☐ confirm if incident affect vehicles that the responsibility, or if further support is needed.
- ☐ confirm if road authorities are involved and whether negligence or criminal charges are likely.
- ☐ determine whether other parties that are either involved were injured or killed – confirm the facts.
- ☐ confirm the location of damaged vehicles, the severity of the damage, a contact status.
- ☐ notify the authority if structural staff involved that have been killed or arrested.
- ☐ determine whether high value of critical assets have been damaged and the impacts to business.
- ☐ create photographs of the accident scene, witness, damage to the vehicles.
- ☐ consider a road temperature that is required – if the driver is reporting, or if a physical threat exists.
- ☐ work with local law enforcement agencies as required.
- ☐ engage with law enforcement if criminal proceedings are likely.
- ☐ determine whether further risk exist – such as criminal acts, reports.
- ☐ request a copy of any Police Report – having the responsibility required.
- ☐ confirm any current incidents for various reports and facilities.
- ☐ confirm the location of any driver or passengers who have been detained or arrested.
- ☐ create a vehicle incident report which explains all facts and identifies potential witnesses.

Reporting Guidelines (NHP Information)

- ☐ notify the nearest person present of the incident as necessary.
- ☐ provide the date, time and specific location details of the incident.
- ☐ provide the name of the driver and the nature of the passengers.
- ☐ confirm if the driver holds a substance to operate the vehicle.
- ☐ confirm if the driver should have been operating the vehicle.
- ☐ provide the details of the accident, the cause, responsibility and impacts.
- ☐ provide the details of any injured or that involved parties – and their role of an incident.
- ☐ report on the severity of damage to vehicles, properties, and whether any animals were involved.
- ☐ send the details of any road traffic Report.
- ☐ confirm the potential charges associated with a any prosecution which might occur.

SANDSTORMS: L3

Provide an Immediate Report

Immediately notify the incident response center and those offices along with the media about a sandstorm, which may be associated with other risks (including heat or air pollutant matter) which present a threat to people (health issues and missing connectivity), as well as testing, movement (per unit policy) and processing of the incident machinery and electronics.

Priority: directly connected through to people and life safety – prevent further risk from Incident Management directly reported internal and external stakeholders.

Pre-Planned Response (PPR)

- ☐ Report to the incident and status of all staff – report on missing staff
- ☐ Confirm the extent, severity and duration of the sandstorm.
- ☐ Confirm what facilities, work rates and personnel will be affected by the sandstorm.
- ☐ Close all testing, services, displays, units and doors, and turn off air conditioning units.
- ☐ Determine whether staff should shelter in place or be sent home.
- ☐ Advise incident to send updates to staffs, closing outside air vents, turning off air conditioning
- ☐ Advise staff to cover the body/head, turn off radios, use eye protection, airtight room, replace air.
- ☐ Advise staff to cover exposed wounds or areas where contamination can cause infection.
- ☐ Protect sensitive equipment & technologies under plastic sheets or place into plastic bags.
- ☐ If staff need to move machines, consider safety then to prevent staff becoming sandstorm and lost.
- ☐ Charge phones and other electrical items while the power supply is still functional.
- ☐ Protect water and food supplies from contamination, provide emergency drinks as needed.
- ☐ Assess whether air filter, water waste system, air water cover
- ☐ Determine whether fire drills are required.

Reporting Guidelines (RIRREP Information)

- ☐ Report on the area affected, the severity, speed and duration of the incident's threat.
- ☐ Report on continuous facilities and activities which will be affected.
- ☐ Report on the incident and status of staff, and indicate when staff have returned associated for.
- ☐ Provide details on the measures used to protect sensitive and high value items.
- ☐ Indicate any damages and injuries which might result from the sandstorm.
- ☐ Provide details on any staff who are contacted while in threat, their location and status.
- ☐ Report on when the flow have been completed, what are the next, and when support is needed.

SEVERE FLOODS: L3

Provide an Immediate Report

Emergency teams flooding prevention to people, assets, community facilities, materials and operations. Severe flooding can result from extensive rainfall, the overflowing of reservoirs to vulnerable areas, fast flood flows and waves (producing shear and turbulence) and various damaging and/or life-threatening events.

Priority: directly intervene through to people and life safety – prevent further risk flow.
Responsible Management: identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- Assess for at risk – those people and assets at higher ground, or in higher flooding flows.
- Determine the extent of the flooding and the speed of response.
- Determine when the protection will arrive and how much time is available for a response.
- Determine if there is time to evacuate those assets, or whether a shelter in place is required.
- Determine whether further actions (flooding) and fully understanding resources are required.
- Identify if necessary, critical resource assets and information resources for resources and equipment.
- Determine whether sufficient shelter in place is available, supplies used, food items prepared.
- Determine flood, wave and emergency waves on higher floors, fill areas and containers with water.
- Shut down or turn off all areas that are still operating, and conserve power and fuel.
- Protect staff to avoid areas which might contain flood water – such as gutters, stairwells etc.
- Advise the presence of trapped staff using doors, or with panic indicating the number of staff.
- Have high-rise or other shelter areas ready, or protect those in public places.
- Back-up critical data using cloud systems, transfer back drive, structured memory, storage.
- Advise staff to be cautious if moving through water – underwater hazards, loose material, animals.
- Advise staff of the risk of vehicles being swept away by fast moving (or shallow) water.
- Advise staff to only drive motorcars “forward to the safe” areas due to communication hazards.
- Be aware of vehicles, boats, gas leaks, water a lot closer with the higher electrical hazards.
- That for a loss of contact with services in areas – including telephone, airwaves.
- That are information products, equipment and resources, a critical stafffully.

Reporting Guidelines (RREP Information)

- Report on the extent of the risk, and whether the facility has been flooded or when it may flood.
- Provide the number of staff at the location, as well as areas exposed to staff assets.
- Advise whether staff will shelter in place or whether an evacuation will occur.
- Advise what other assets, material or information might be affected, and response measures.
- Advise what measures (if any) are being taken to protect the facility from flooding.
- Report on the competence, capacity and response measures of emergency responders.
- Advise the duty location staff will be evacuated to if they are in the facility.
- Advise flood or wave, and response or facilities have occurred – using the reporting code (RREP).
- Advise what management responses have and will be implemented, and what help is needed.

SEVERE WEATHER FRONTS: L3

Provide an Immediate Report

Weatherfront severe weather fronts include hurricanes, tornadoes and winter storms, which present wind hazards/flying debris/flooding rains, and cold-related injuries and accidents. Severe weather conditions often cause accidents, power, water and other utility loss, and often critical resource (fire, medical and police).

Priority: directly threatens people and life safety... prevent further risk/fat. **Incident Management:** identify reported threat and obtain critical resources.

Pre-Planned Response (PPR)

- confirm the nature of the weather event... event source or activity and conditions.
- confirm the event's speed and direction of travel and when the weather is expected to arrive.
- confirm any government alerts, notifications and exit orders... monitor them as they evolve.
- determine if emergency supplies are required... prepare them in advance of the event occurring.
- determine required changes to working practices... mitigate a event from being going as tested.
- assess high water levels under water conditions, those above water away from windows.
- determine whether a lot of flooding is present... implement the appropriate PPR.
- gather information on any resources or facilities... implement the appropriate PPR.
- clearly staff to be met... support the role the required nature of action, a utility provision.
- clearly plan movements and meetings... communicate activity as required.
- clearly critical activities... protect work around where possible.
- conduct check-ins up or point data... place additional barriers in place flags or other tags.
- handling and heavy equipment, those workers on a no point against glass related issues.
- assess staff and the event affecting a safety from windows and heights.
- stage electrical items while the power still functions, especially for water related devices.
- evacuate buildings from stages of personnel that factors prevent further problems.
- ensure safety people allow findings to staff including notification procedures and reporting.

Reporting Guidelines (NIFEP Information)

- determine the speed and direction of the weather conditions, and when it will impact the area.
- report the severity and anticipated duration of the weather conditions.
- report on whether a warning has been made to the public in place of what was the location.
- report if any critical events and other matters are critical, and resources available protect them.
- provide status on any government alerts, warnings and instructions.
- report on the competency capacity and status of emergency responders.
- confirm what has been required, staff a critical threat affecting all or part of.
- confirm what findings have been procedures staff when the was presented and who involved staff.
- report on any critical activities resources who found to be without around.
- report on what staff have been completed, others are planned, and what support is required.

SEXUAL ASSAULTS: L2

Provide an Immediate Report

Remember: Sexual assaults can affect both males and females, however, in this one stage typically women have been assaulted. Sexual assault is physical and psychological harm, requiring both medical treatment and mental health care. In addition, victims are always made very aware, giving the victim a further set of treatment, which includes:

immediately contacting through to people and the victim – prevent further risk from the perpetrator (management) identify reported criminal and victim at the incident.

Pre-Planned Response (PPR)

- determine the victim's age, gender, nationality, religion, position and other details of the victim.
- determine whether physical injuries have occurred, including potential other injuries or abuse risks.
- confirm whether immediate medical treatment is required, including psychological treatment.
- confirm if secondary threats exist – including religious, cultural or victim's past risks.
- confirm the nature and extent of exposures, including long-term injuries or exposures risks.
- establish whether necessary and/or potential witnesses are supported – or harmed – by the response.
- further details on the time taken and quality of the sexual assault.
- confirm if the perpetrator was known, the relationship and any ongoing threats which might exist.
- confirm if the perpetrator was a staff member – and disciplinary actions or demands required.
- confirm if the victim needs safety or subsequent support intervention or further assaults.
- establish if the victim requires legal aid and voluntary support.
- identify immediate level support structures for the incident victim and support of the victim.
- notify local family members if the victim consents to do so, engage them for intervention staff.
- determine whether the perpetrator will identify and any evidence and other information.
- determine whether legal should be involved for any prosecution requirements.
- confirm extensive information and support needed treatment requirements.
- identify family members or appropriate friends to provide victim support.

Reporting Guidelines (NHP Information)

- record the victim's name, age, gender, religion, position, their communication, and nationality.
- record the medical condition of the victim, and what gender and speciality help is needed.
- confirm whether counselling support and psychological treatment are required.
- record details on the medical and emotional condition of the victim.
- record the status of any family or friends who might be able to support the victim.
- record the status of the perpetrator, the victim and whether any threats still exist.
- record any other factors relating to if the perpetrator has been arrested and is identified.
- record details of any secondary threats – especially related to gender / cultural violence issues.
- confirm medical and other medical support needs, and any level status is available.
- if the assault occurred on any work – explain the nature of staff and security requirements.

STALKING EVENTS: L3

Provide an Immediate Report

Knowledge: Stalkers use a variety of personal resources (or an entity or organization) with access to and otherwise attributes. They may be motivated by anger, jealousy, mental health issues, or political or ideological issues. Their actions are only dangerous as well as serious when a stalker causes fear and uncertainty, a significant psychological.

Priority: Identify immediate threats to people and life safety... prevent further risk-factors.
Stakeholder Management: Identify impacted internal and external stakeholders.

Pre-Planned Responses (PFRs)

- ☐ Identify the stalker's beliefs/purpose... any organization it claims they represent... known address.
- ☐ Analyze the relationship link... ideologies, previous strategies, or any other threat connections.
- ☐ Determine the extent of the stalker... what activities they focused on, actively.
- ☐ Gather the specific facts of the situation... including recordings, emails, letters and other evidence.
- ☐ Analyze whether the stalker has a credible threat of their actions, or whether they are irrational.
- ☐ Define any known patterns associated with the stalker... are there trends and predictable ones.
- ☐ Analyze whether the stalker has known mental health issues... and what that is.
- ☐ Determine whether the stalker poses a direct threat, especially for violence.
- ☐ Define what about an observed threat... demand or requests have been made by the stalker.
- ☐ Review the harassment or persecution history... phone, in person, email or through other means.
- ☐ Gather all communications and documents for identifying purposes... steps to be taken.
- ☐ Determine who/what is at risk, and whether others may be indirectly hit.
- ☐ Analyze whether any laws have been broken... what are those, and what are the implications.
- ☐ Obtain a description of the stalker including a photograph, if possible.
- ☐ Notify appropriate staff of the stalker's identity and the actions to take (usually phone/call/text).
- ☐ Consider providing training for management and staff on communication and personal security.
- ☐ Consider if a key driver or situation who brought about a point of threat risk.
- ☐ Assess the probability and impacts of various outcomes being carried out.
- ☐ Consider how being aware by the individuals at risk, or having their work from home.
- ☐ Notify the police or other stakeholders of the situation... request support for witness details.
- ☐ Consider enhancing office or website security measures.
- ☐ Identify media interest, inquiries, the stalker's intent and notify the press.

Reporting Guidelines (RFRP Information)

- ☐ Providing a known details on the stalker... including their stated or inferred threats.
- ☐ Provide details on those at risk, including their psychological wellbeing.
- ☐ Provide information relating to safety and security measures being implemented.
- ☐ Report whether police are involved, and what actions and actions they are being.
- ☐ Provide an assessment on the probability and impact of potential risks being a threat.
- ☐ Report on any media interest... provide details on the point of contact and associated outlet.
- ☐ Provide all numbers 2 of the situation for a subject and potential legal action against the stalker.

VIOLENT ASSAULTS: L2

Provide an Immediate Report

Immediate violent assaults can result in physical and psychological harm, including lacerations, injuries, sexual assaults and ultimately death. Assaults can be from strangers, family members, work colleagues and community groups. Violent assaults may result from religious, workplace violence, or as part of intimidation/retaliation activities.

Priority: Identify immediate threats to people and life safety – prevent further risk from escalation. Management: Identify reported internal and external stakeholders.

Pre-Planned Response (PPR)s

- ☐ determine the victim's age, gender, ethnicity, religion, position and other details of the victim.
- ☐ determine whether physical injuries have occurred (see **Assessing an IIR**).
- ☐ confirm whether immediate medical treatment is required, including counselling support.
- ☐ confirm if secondary threats exist – including physical, legal or cultural risks.
- ☐ confirm the nature and extent of exposures, are injuries long term or life threatening.
- ☐ determine the accuracy and veracity of all information in the incident.
- ☐ gather details on the time, time zone and location of the assault.
- ☐ confirm if the perpetrator was known, the relationship and any ongoing threats which might exist.
- ☐ confirm if the perpetrator was a staff member – are the policy actions in place and required?
- ☐ confirm the nature and information on assets – and the severity and extent of the risk.
- ☐ determine whether the risk remains or if the incident is over.
- ☐ identify any long term medical treatment requirements (see the **Report and Assess Incident (RAI)**).
- ☐ notify local law enforcement if the victim is unable to do so, engage them for investigation staff.
- ☐ determine whether the perpetrator is violent and any evidence and change information.
- ☐ determine whether legal should be initiated for any prosecution requirements.
- ☐ confirm extensive collection and support medical treatment requirements.
- ☐ thank family or appropriate thanks to provide better support.

Reporting Guidelines (RTEP Information)

- ☐ provide the victim's name, age, gender, religion, position, their current location and nationality.
- ☐ provide the medical condition of the victim, and what general and specialist help is needed.
- ☐ determine if any counselling support, legal aid or security support is required.
- ☐ provide details on the nature and emotional condition of the victim.
- ☐ provide the details of any family or friends who might be able to support the victim.
- ☐ provide the details of the perpetrator the victim and whether any threats still exist.
- ☐ provide any information relating to if the perpetrator has been a threat and is currently.
- ☐ provide details of any secondary threats – especially related to gender or cultural violence issues.
- ☐ provide the details and risk implications of violent acts, materials or threats.
- ☐ if the event occurred at a busy site – explain the nature of staff and security requirements.
- ☐ explain what management activities are being taken, and what support is required.

WORK RELATED INJURIES: LB

Provide an Immediate Report

Remember: Work related injuries can result from slips, falls, machinery failures, road traffic accidents, explosives and environmental hazards, and hot and cold weather related injuries. They may be minor, serious or even result in death. They may be an only, while in transit, or while at an external (non-work) location.

Priority: Notify someone through a phone and life safety – prevent further risk first. (Incident Management) Notify regional internal and external stakeholders.

Pre Planned Response (PPR)

- ☐ Identify whether a safety issue is a significant issue they represent – internal only or
- ☐ Identify the stakeholders – all employee service strategies, all other about connections.
- ☐ Determine the cause of the incident – who or what are they focused on, and why.
- ☐ Gather the specific facts of the situation – including knowledge, primary factors and other evidence.
- ☐ Identify whether the safety issue is critical – have all their efforts to address the issue been exhausted.
- ☐ Gather any known patterns associated with the issue – are there trends and/or identifiable risks.
- ☐ Identify whether the safety issue is a critical health issue – and what those are.
- ☐ Determine whether the incident has a criminal/civil liability for victims.
- ☐ Gather what direct or indirect threats, demands or requirements have been made by the incident.
- ☐ Assess the likelihood of potential escalation – public, is public, what is through other means.
- ☐ Gather all data from the incident for the incident – report it to the relevant
- ☐ Determine who is directly at risk and whether there are any individuals at risk.
- ☐ Identify whether any have been harmed – what evidence, and what are the implications.
- ☐ Assess the impact of the incident – including a photograph, if possible.
- ☐ Verify appropriate staff of the incident and the status of the incident (non-physical).
- ☐ Consider providing training for the region with staff involved in the incident and personal safety.
- ☐ Consider any any other conditions which might present a risk to the incident.
- ☐ Assess the potential and impact of any of resources being limited and.
- ☐ Consider increasing any staff to the incident at risk or having that staff from the incident.
- ☐ Verify the status of other stakeholders of the incident – report support (perhaps other).
- ☐ Consider a follow up effort to verify safety measures.
- ☐ Identify the incident – report on the incident and the status of the incident.

Reporting Guidelines (NTPP information)

- ☐ Provide the name, age, ethnicity, gender and religion of all injury victims of any incident.
- ☐ Provide the location, address and the incident (date, time, location, contact has requested).
- ☐ Confirm if the incident, however, it is not a case for the incident, whether it is a threat.
- ☐ Provide a summary of the incident, including a summary of the incident, including a summary of the incident.
- ☐ Confirm any potential future conditions for the incident, and the incident is requested.
- ☐ Confirm what the incident has been provided to the incident, what type of incident and the incident.
- ☐ Report all any incident, threats and what has been reported – there are, there are, there are.
- ☐ Provide the current details of any incident as they can be contacted.
- ☐ Provide the current details of any incident, including a summary of the incident, including a summary of the incident.

WORKPLACE VIOLENCE: I3

Provide an Immediate Report

Immediate: Workplace violence may be physical, or psychological in nature. It can include harassment/bullying, coercion, seduction, or assault. It may be perpetrated by other members of staff, visitors, suppliers, family members (joining the site), or by criminals, against internal groups or individuals.

Priority: Identify immediate threats to people and life/safety – prevent further risk/fear.
Workplace Management: Identify reported internal and external stakeholders.

Pre-Planned Response (PPR)

- determine potentially vulnerable people or groups – it includes the details of targeted individuals.
- confirm the name, age, role, gender and position of vulnerable or target people.
- determine the identity and any relationship between the perpetrator and the victim.
- confirm the nature of the threat – physical, verbal/bullying, intimidation, or harassment.
- confirm whether any history or record of workplace violence exists.
- confirm this perpetrator is known – whether a staff member or an external stakeholder.
- confirm this person has weapons, if known, and whether a history of violence exists.
- confirm the perpetrator's emotional or mental status, and if alcohol or drugs are being used.
- confirm whether security resources are present and that are they required to support.
- confirm those police authorities are required and their identity and response time.
- look to diffuse the situation further that is evident if, removing victim away from the threat.
- limit the area of responsibility person/s perpetrator/s, the area/s in the office/s.
- ensure that officers are not necessary the perpetrator/s, ensuring that no one is harmed.
- secure the area if building and prevent the perpetrator from returning after they have exited.
- determine whether (and when) disciplinary measures are required and who will implement them.
- determine if a crime has been committed and if police involvement required.
- written evidence and witness statements if disciplinary actions or legal proceedings are required.

Reporting Evidence (RTEP Information)

- provide the perpetrator's name, age, gender, religion, position, employer details and nationality.
- provide the victim's age, gender, position a reference and physical status of any victim.
- provide the situational context including the location, why history and the personalities involved.
- explain whether the situation is ongoing, or a one time.
- explain the nature of the incident – verbal, physical, harassment, and were weapons involved.
- provide details on the mental and emotional state a statement of the perpetrator.
- explain what disciplinary measures or internal changes are associated with the event.
- confirm if the victim/s is safe and if required the victim, their location and the medical response.
- explain what security or police responses, officers and involvement occurred.
- explain required disciplinary actions, or other factors and report police/court proceedings.
- explain what actions have been taken, and what actions are still required.

YOUTH RELATED INCIDENT: L1-2

Provide an Immediate Report

Remember: Youth incidents are related to other young people who are visiting an educational facility, or are being treated during an on or off site event. Incidents present physical and psychological risks to young people, as well as stressors for the facility, and require the organization to implement operational and legal risk.

Priority: Identify immediate threats to people and life safety – prevent further risk first. **Incident Management:** Identify reported incident and obtain information.

Pre-Planned Responses (PPRs)

- ☐ confirm the name, age, gender and cultural factors of the reported young person.
- ☐ confirm the nature of the incident – physical, illness, verbal, bullying, missing, cultural or legal.
- ☐ determine the identity and any relationship between the perpetrator and the victim.
- ☐ determine whether any other young people are at immediate risk – take protective measures.
- ☐ confirm whether any historical trends are associated with the event.
- ☐ confirm if the perpetrator is known – whether a staff member or an external individual.
- ☐ confirm if the facility has notified of the situation – is this event of the incident.
- ☐ engage with the family and provide timely and accurate reporting.
- ☐ confirm the young person's emotional and mental status – provide a safe exit.
- ☐ provide counseling and other appropriate support to others within the group.
- ☐ confirm if local police and medical services are required – who takes primary for a response.
- ☐ ensure that interviews are conducted in an appropriate manner and are witnessed.
- ☐ determine whether any organizational responsibility, liability, consent legal.
- ☐ determine an whether further investigations has occurred or is likely to occur.
- ☐ confirm whether supportive resources are present, and if so, are they appropriate support?
- ☐ further actions and witness statements if disciplinary actions or legal proceedings are required.
- ☐ determine whether (or what) disciplinary or legal measures are required.

Reporting Guidelines (RTEP Information)

- ☐ provide the name, age, gender, nationality and mental and physical status of any victims.
- ☐ provide the details and status of other members of the youth group.
- ☐ provide the situational context, including the location, location, history, and circumstances of the event.
- ☐ explain whether the incident is ongoing, or is over but the young people will be.
- ☐ explain the nature of the incident verbal, physical, missing, legal, harassment.
- ☐ provide the details of any known or suspected perpetrators.
- ☐ explain what disciplinary measures or internal changes are associated with the event.
- ☐ confirm if the victim(s) is safe and if required, the victim, their family and the medical response.
- ☐ explain what police involvement, responses, and witness are involved – if any required.
- ☐ explain reported disciplinary or legal actions, including sharing associated police reports.
- ☐ explain what actions have been taken, or what actions are still required.

THE PRE-PLANNED RESPONSE GUIDE SAFETY AND SECURITY THROUGH KNOWLEDGE AND PLANNING

The manager's guide to the Planned Response (PRG) is designed to support leaders at the point of an emergency situation, and responsible for risk management with emergency response functions, to confidently and effectively deal with the first minutes and hours of a critical incident... "the golden hour".

An emergency situation is the early, critical, unique factors which require immediate and effective responding to protect people, assets, facilities, information, culture, reputation and organisational business interests.

The guidance helps define the role and responsibilities of the senior-most management team (SMT), and the Crisis Management Leadership Team (CMLT) to define incident categories (from a low to severe) and establish how various situations of emergency present different periods for a response, identifies proven methodologies by which to take action through pre-defined sources of action, and importantly a communications plan to enable effective communication and decision making to occur.
