1. Purpose

The purpose of this policy is to establish guidelines for the use of generative artificial intelligence (AI), such as ChatGPT, Bard, Bing, or other similar tools, by employees, contractors, temporaries, or other third parties, hereafter referred to as "Representative" of Partners. Generative AI platforms are trained to interact conversationally and perform tasks. To train generative AI platforms, they are fed massive data sets. These platforms can then be used to write clear, human-like text, produce computer code and scripts, answer some math and statistics problem sets, and more. Generative AI can present ideas, brainstorm, draft content, summarize research, and more.

This policy is designed to ensure that the use of AI is ethical, lawful, and in compliance with all applicable laws, regulations, and Partners' policies.

2. Scope

This policy applies to all Representatives with access to AI through Partners-owned or BYOD (bring your own device, meaning Representative uses their own device in lieu of company provided one) while conducting work for Partners.

3. Use, Restrictions and Guidelines

Representatives are authorized to use AI for work-related purposes. This includes tasks such as generating text or content for reports, data analysis, emails, presentations, images, and communications. Partners commits to using AI in a manner that avoids causing harm to individuals, communities, or society as a whole or in a way that may discriminate, perpetuate biases, or violate legal or ethical standards. Furthermore, Partners commits to using AI in a way that avoids plagiarism and proper cites resources used.

Potential benefits of using AI:

- AI can provide first drafts of written material that may help complete a task more quickly.
- AI may identify themes or data that the writer would not have considered otherwise.
- AI may facilitate writing in different styles (academic, corporate, personal) to increase our ability to communicate with diverse audiences.

Recognized challenges and shortfalls of AI:

- AI systems are trained on past information and may not have access to the latest research or analysis on a topic.
- AI can be wrong; it will still give you an answer, even if incorrect.
- AI may cite sources that are wrong or do not exist.
- AI is not as creative, nuanced, or imaginative.

1424 K Street NW Suite 700 Washington DC 20005 202.628.3300 www.partners.net

- AI does not know our organizational values or policies and may provide content inconsistent with our values/policies unless included in the prompt.

Guidelines for effective use of AI:

When AI is used for work-related purposes, representatives must adhere to the following guidelines:

- **Copyright:** Representatives must adhere to copyright laws when utilizing AI. It is prohibited to use AI to generate content that infringes upon the intellectual property rights of others, including but not limited to copyrighted material. If a representative is unsure whether a particular use of AI constitutes copyright infringement, they should contact the COO or CEO for guidance.
- **Accuracy:** Do not trust AI. AI relies upon algorithms to generate content. As with AI technology, there is a risk that AI may generate inaccurate or unreliable information. Representatives should exercise caution when relying on AI-generated content and always review and edit responses for accuracy before utilizing the content. All AI-generated information must be reviewed and edited for accuracy before use. Any content that any staff, consultant, or intern uses that was generated or supported by AI must be thoroughly reviewed by the representative for correctness. <u>You as Partners representative are responsible and accountable for the content you present on behalf of Partners.</u>
- **Confidentiality:** Confidential information must not be entered into an AI tool, as information may enter the public domain. This can release non-public information and breach regulatory requirements, customer or vendor contracts, or compromise trade secrets. When using AI, representatives must follow all applicable data privacy laws and Partners policies. This includes but is not limited to personally identifying information (PII), trade secrets, intellectual property, financial information, or any other sensitive data. Furthermore, staff must not insert confidential details on programs, proposals, stakeholders, donors, beneficiaries, chapters, and any information that could compromise the privacy and security of Partners representatives and stakeholders.
    - For example, if you want ChatGPT to draft a thank you note to a donor, use a fake name in the prompt. “Thank Wonder Woman for her $500 donation to Partners of the Americas.”
- **Ethical Use:** AI must be used ethically and in compliance with all applicable laws, regulations, and Partners policies and values. Representatives must not use AI to generate discriminatory, offensive, or inappropriate content. If there are any doubts about using AI in a particular situation, representatives should consult with their supervisor, the COO, or the CEO.
- **Label and Source:** Content produced via AI must be labeled or footnoted as containing AI information. AI content is not a primary source. If you cite facts/data produced by

1424 K Street NW Suite 700 Washington DC 20005 202.628.3300 www.partners.net

Generative AI tools data, you need to find the primary sources it uses and confirm the cited materials exists and is correct.

- Disclosure in any written materials: Representatives must disclose the use of AI by citing the specific tool or technology used.
  - When referencing AI in written documents as a source, use the following citation: (OpenAI, personal communication, month, day, year).
  - When using AI for an internal draft to other staff, such as an email, note "content supported by ChatGPT search with prompt [x]" (e.g., *Draft ethical guidelines for using ChatGPT at work.*)
  - If used for a final external product, cite the AI and your prompts. For example: "Some sections of this blog post were drafted with support by ChatGPT, with the prompt *Write a blog post about how International Volunteer Day is celebrated worldwide."* Partners requires staff to review, edit, and check facts or data produced by generative AI platforms.
  - No attribution is required if used as a draft generator only (eg., for a thank you letter to a donor).

- **Language & Bias:** Review content relative to our language guides and usage and be aware of bias.
  - Language: AI may say "disabled people," but we say "people with disabilities." Similarly, on AI translation you must ensure the translated materials are correct and edit as necessary. You are accountable for the language you use, not the AI. Representatives must follow Partners communications guidelines.
  - Bias: AI may produce biased, discriminatory or offensive content. Representatives should use AI responsibly and ethically, in compliance with Partners policies and applicable laws and regulations. ChatGPT and other AI systems are not trained in our DEI principles or the ethos of Partners, so keep this in mind
- **Prohibited Activities:** Representatives must not use AI for any activities that may be illegal or unethical, including but not limited to spreading false information, engaging in cyberbullying or harassment, or attempting to gain unauthorized access to any systems or networks.
- **Acceptable Conduct:** Representatives should conduct themselves professionally and respectfully while using AI. This includes refraining from using any profanity or engaging in any discriminatory behavior.
- **Detailed Prompts:** Use clear prompts—the more specific the prompt, the higher quality of the result.
- **Security:** Be mindful of the content entered into AI, as it may store sensitive data and information, which could be at risk of being breached or hacked.

Additional Resources:

To learn more about high-risk AI uses and tools, you can reference Annex A: European Commission's AI Act 2021. For further information on the recommendation ethics of AI, reference Annex B: UN Recommendations on AI Ethics.

4. Data Privacy and Security

Partners adheres to the highest standards of data privacy and security. All representatives must comply with Partners' Privacy & Personally-Identifying Information Policy.

5. Compliance

Any violations of this policy should be reported to the Chief Operating Officer (COO). For employees and contractors, failure to comply with this policy may result in disciplinary action, up to and including termination of employment. For vendors, any violation of this policy will follow contract non-compliance proceedings.

6. Training and Acknowledgment

Representative of Partners using AI are recommended to take trainings on how to use it effectively and ethically, including understanding the limitations of the technology and the potential impact on their work.

Partners recommends that all Partners AI users complete the following training found on LinkedIn within 60 days of hire or launch of the official policy:

1. Ethics in the Age of Generative AI- 38 minutes
    a. Required videos:
        i. Introduction – watch Generative AI and Ethics, the Urgency of Now
        ii. Developing the Skill of Ethical Analysis in AI – watch all three videos and complete the Chapter Quiz
        iii. Preparing Your Organization to Address Ethics in AI – watch at least one video, the most relevant for your work
        iv. Conclusion – watch Setting an Intention of Continual Questioning

2. How to Research and Write Using Generative AI Tools – 1 hour 15 minutes
    a. Required videos:
        i. 1. Overview of Working with AI - watch all three videos
        ii. 2. Using AI to Improve Your Research – watch at least one video, the most relevant for your work
        iii. 3. Using AI to Improve Your Writing – watch at least one video, the most relevant for your work
        iv. Conclusion – watch Summary and Next Steps

1424 K Street NW Suite 700 Washington DC 20005 202.628.3300 www.partners.net

Partners may require additional training as the technology advances and more information becomes available.

Additionally, for all staff that complete the trainings, they will sign the AI training confirmation in PandaDoc to confirm receipt and understanding of the guidelines established in this policy. By using AI, representatives acknowledge that they have read and understood this policy, including the risks associated with using AI. Representatives also agree to comply with this policy and to report any violations or concerns to the COO.

7. Accountability and Responsibly

This policy will be reviewed periodically, but at a minimum annually, and updated as necessary to ensure continued compliance with all applicable laws, regulations, and Partners policies. The COO, and President and CEO are responsible for approving any updates to this policy.
