Working Out Loud

Working Out Loud sessions enable us to build a community of practice and spread our knowledge and skills about how you run a successful learning function.

Regardless of your proficiency level on the topic, you can participate!

The more of us who participate the better the outcome will be.

Be open, be honest, be inquisitive and brave.

We don't record the session* or who said what.

Thanks to Julian Stodd for the inspiration and introducing us to "Working Out Loud"

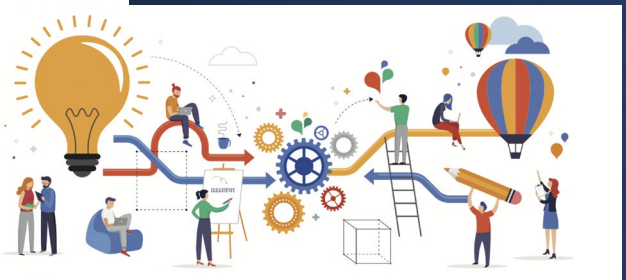
Now. Let's Work Out Loud!

In what ways have you used AI?

Plenary Discussion

AI use – Summary

- Search Engines
- Navigation Systems
- Smart Cars
- Facial Detection/Recognition
- Google Assistant/Siri/Alexa
- Smart Homes and Devices
- Auto Correct
- Social Media
- Chat bots
- ePayments
- Games – AI bots playing against us



In what ways do you think AI will make your work easier?

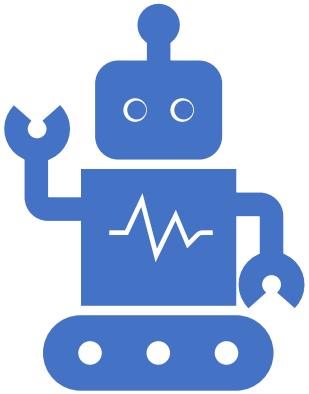
Discuss in groups of 5

What are some of the ethical issues around working with AI?

- Discuss in Groups

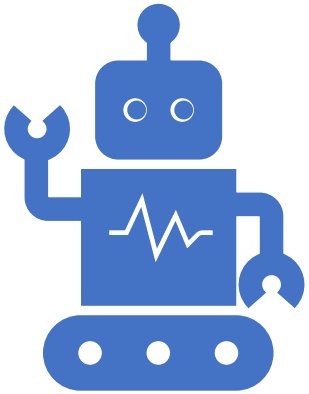
What are some of the ethical considerations around working with AI?

- Bias – AI is as bias as the data set used in training it
- Transparency – full disclosure about AI use in content creation or processes
- Ownership – who owns the content created by AI is it the code bearer or the commissioner? E.g deep fakes, propaganda, emergent AI properties, hallucinations
- Accountability – what measures are in place to address negative consequences?



What are some of the ethical considerations around working with AI?

- Privacy – What measures are in place to protect sensitive/private data
- Challenges of control – Moral agency – who is responsible for decisions taken by AI
- Environmental Impact – Power Hungry Cloud Computers?



What are some of the Legal concerns around working with AI?

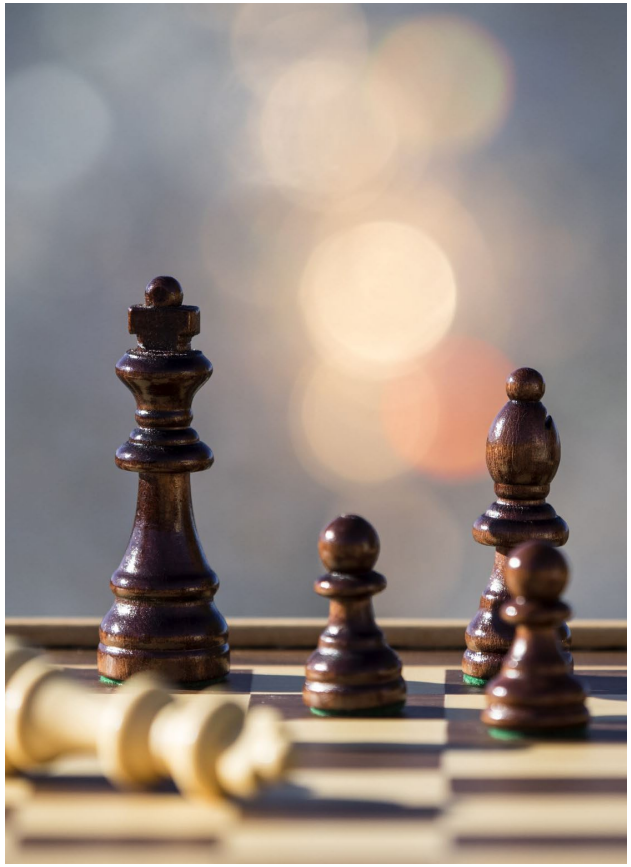
Summary - Legal concerns around working with AI?

- Data Protection; Intellectual Property and Liability
- Source of data and open access
- Accuracy and Fairness; As accurate as data fed. Think about HR functions, legal proceedings (profiling), facial detection etc
- Working with 3rd Party service providers of AI
- Sector Specific concerns – Medical, high frequency trading, Finance, Legal etc
- Guidelines for use of AI

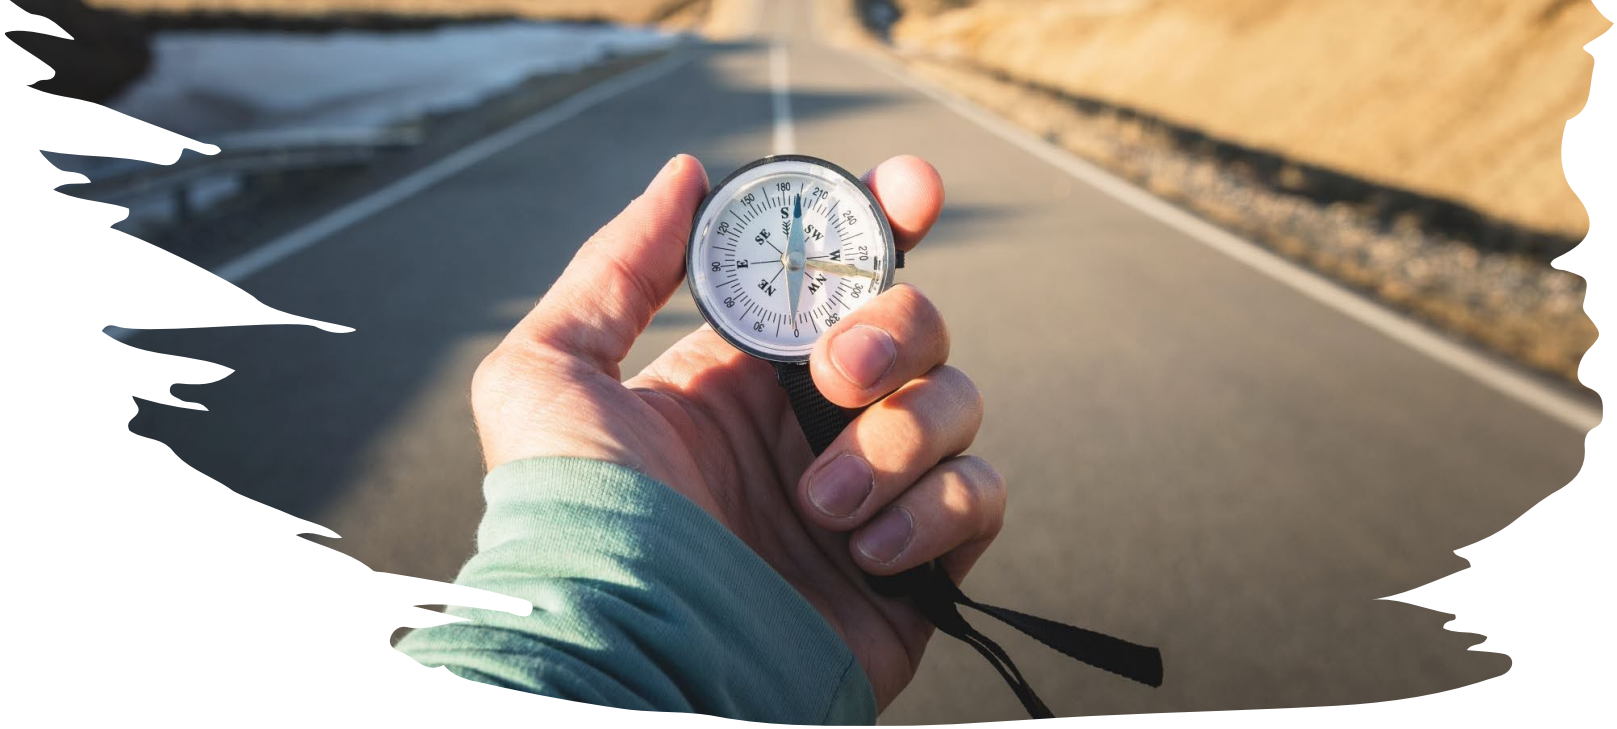
What questions should we be asking as we increasingly adapt working with AI?

Realities of AI

- Some jobs will decline, some jobs will increase, some jobs will change
- It will affect many facets of our lives from recreation, personal, social.
- Transforming civilization just like fire, agrarian revolution
- It is as ‘good’ and as ‘evil’ as human nature allows
- AI Is not aware of itself even when it mimicks human intelligence and sometimes emotion – they build patterns from their learning and language models



What is your takeaway from your discussions?



What else should we explore?

Thank you!
