

Manager:

F	Fatality: The person has been confirmed deceased (this must be doubled checked).
C	Critical: Normally relating to a life threatening condition where assistance is required NOW in order to stabilize the casualty to save life, limbs or eyesight. Normally requires treatment within no less than 1hr if possible.
U	Urgent: A seriously sick or injured person needing medical treatment immediately – if treatment is not provided then the grading may decline to Critical if treatment is not administered (normally within 2-4hrs).
P	Priority: A sick or injured person whose condition is not life threatening but sufficiently serious to warrant immediate medical treatment – typically no later than 4-6hrs or the condition may become Urgent.
R	Routine: A sick or injured person whose condition requires general medical treatment to prevent infection or the condition becoming a priority – usually requires treatment within 24-72hrs.
