Accounts Payable Quick Reference

Setup/Preferences

Lead time preferences and how they impact payables

- Payables Preferences
  - A reminder to pay a bill will be sent six (6) days before a bill's due date based on the Lead Time setting
  - On the Pay page, the Process Date will calculate as six (6) days in advance of the Due Date whenever possible
  - The Process Date can be edited manually for any bill payment that should be paid earlier or later than the default date posted
  - If a bill is not entered at least seven (7) days before a Due Date, the process date will be set as close as possible to the Lead Time date based on the Payables Preferences
  - For example, if the Lead Time is set to six (6) days and a billed is entered four (4) days prior to the Due Date, the Process Date will be calculated as three (3) days prior to the Due Date, allowing for the one (1) day required for bill scheduling.
- Vendor Preferences
  - Custom Lead Times can be set by Vendor. If a Vendor Lead Time is left blank, the Lead Time calculation will default to the Payables Preferences setting.
  - To update a vendor's custom lead time, follow these steps:
    1. Log in to Bill.com
    2. In the left navigation pane, click Vendors
    3. Click the vendor you'd like to update
    4. Click Edit
    5. Click the toggle tab next to Additional Information to extend the category
    6. Enter a number for the number of Lead Time Days for that vendor only
    7. Click Save

Vendor Management

Adding new vendors

- Adding a new ePayment vendor
  - Click Vendors in the left navigation pane
  - Click Add Vendor
  - Enter vendor name
    - Possible network connections will be presented, if there are no matches proceed with the following steps, or attempt Advanced Search
  - If no matches are found in the Network, enter in the vendor's email address, physical address, and select your Vendor's bank location
    - Vendor bank location field will default to the same country selected in the vendor's address
    - This field must be set to United States to send ePayments. If you want to set up International wires for a foreign vendor, please see the steps to set up an international vendor below
    - Note: vendor bank location field will not appear on vendors connected through the Network

- Select to pay vendor via ePayment in one of two ways:
  - ePayments — I want to invite my vendor to manage their own free Bill.com account (recommended)
    - Click View and edit email invitation to preview or customize the invitation
  - ePayments — I have my vendor's bank account info and I'll manage it myself for now
  - Enter the vendor's bank info
- Enter additional vendor details
- Click Add vendor and send invite

Adding a new check vendor

- Click Vendors in the left navigation pane
- Click Add Vendor
- Enter vendor name
  - Possible network connections will be presented, if there are no matches proceed with the following steps, or attempt Advanced Search (detailed article linked below)
  - Note: connecting to a vendor within the Network will change the payment method to ePayments automatically if the connected vendor has a valid bank account. This is the recommended method of payment, but you can disregard the Network matches and continue adding as paper check vendor if you'd like
- If no matches are found in the Network, enter in the vendor's email address, physical address, and select your Vendor's bank location
  - Vendor bank location field will default to the same country selected in the vendor's address
  - This field must be set to United States to send paper checks. If you want to setup International wires for a foreign vendor, please see the steps to set up an international vendor above. Paper checks are not available non-US vendors
  - Note: vendor bank location field will not appear on vendors connected through the Network
- Select Pay this vendor with checks sent in the mail
- Enter additional vendor details
- Click Save

Additional contacts for vendors

Adding a contact

- In the left navigation pane, click Vendors
- Click the Vendor to add contacts for
- Click Contacts
- Click +Contact
- Add new contact's details
- Click Save

Editing a contact

- In the left navigation pane, click Vendors
- Locate the Vendor to add contacts for
- Click Contacts
- Click the more options dots
- Click Edit
- Edit details
- Click Save

Deleting a contact

- In the left navigation pane, click Vendors
- Locate the Vendor to add contacts for
- Click Contacts
- Click the more options dots
- Click Delete
- Click Yes to confirm

Things to know

- Payment notifications are only sent to the email address of the Vendor. It can not be sent to Contacts under a Vendor's record
- Deleted contacts can not be restored

Auto Pay for Vendors

Setting up Auto Pay for a vendor

- In the left navigation pane, click Vendors
- Click the Vendor name to set up auto pay for
- Click Edit or click More options then Edit Vendor
- Toggle Auto Pay Setup to On
- Enter the maximum amount to be paid
  - Maximum payment amount is the total amount that will be paid for each individual bill
  - By default, the amount is set to pay entire bill amount
- Enter number of banking days before due date to Process Payment
  - This is when the payment will be debited from the bank account, not when the payment will arrive to the vendor
  - If entering 0, the payment will debit from the bank account on the due date of the bill
  - Maximum allowed is 60, minimum allowed is 0
- Select the bank account to make the payment from
- Click Save

Turn off Auto Pay for a vendor

- In the left navigation pane, click Vendors
- Click the Vendor name
- Click Edit
- Toggle Auto Pay Setup to Off
- Click Save

Deleting (deactivating) a vendor

- In the left navigation pane, click Vendors
- Click on the Vendor's name
- Click More actions
- Click Delete vendor
- Click Confirm

Reactivate (restore/undelete) a deleted vendor

- Click Vendors
- Click the more options dots ⋮
- Click Show inactive
- Click the name of the Inactive Vendor
- Click Undelete

Sending a note to a vendor

- General message for vendor
  - In the left navigation pane, click Vendors
  - Click the vendor's name
  - Click Notes
  - Enter the message in the "Start writing your note here" section
  - Click the toggle next to "Visible to vendor"
  - Click Save
- Adding a Note to a specific bill
  - In the left navigation pane, click Bills
  - Click the Bill #
  - Click Add Notes on the top right, above the Bill Summary section
  - Click the toggle next to "Make this note visible to vendor"
  - Click Save

Set up a vendor for ePayments

- Invite when adding a new vendor
  - When adding a new vendor into your Payables account in Bill.com, all the vendors in the Bill.com network matching that name will appear on the vendor pick list. Choose a vendor from the list and automatically send an invite to network when the vendor is saved. Click View and edit email invitation to see the email the vendor will receive. When saving the vendor, all company details entered by the vendor in their own Bill.com account will populate the vendor record in your account. Be sure the vendor on the list matches your vendor! When the vendor accepts the invitation, the connection is complete.
- Invite when adding an email address for a vendor
  - When adding an email address to the Vendor's details, we send them an invitation to network with your Bill.com account. Click Preview invite to see the email the vendor will receive. This will enable them to be paid faster with electronic payments. If they do not already have a Bill.com account, they can open a free Receivables account where they can receive payments from Bill.com users, manage customers and invoices, and connect with other businesses using Bill.com.
- Enter vendor bank information manually in Bill.com: If the vendor provides their bank information, it can be manually entered into their vendor record within your Bill.com account.
  - In Bill.com, locate the vendor
  - Click more options
  - Click Edit Vendor
  - Select ePayments — I have my vendor's bank account info and I'll manage it myself for now
    - Select Invite my vendor to join Bill.com and manage their own bank info if you'd like to also invite your vendor to create a free basic account to manage their info in the future
  - Enter the vendor's bank account information in the Vendor Bank Info section that just opened up
    - Bank Account Holder's name (may or may not be the same as the vendor name, but should be the actual bank account holder's name)
    - Routing Number
    - Account Number
    - Re-enter Account Number
  - Click Save
- From the Network banner
  - Once a vendor record is saved, if no invitation has been sent already, a banner will be displayed:
  - Click Set up ePayments and we will display potential matches within the Bill.com Network
    - If one of the potential matches is your vendor, click Request to ePay and we'll send then a request to connect. Once they accept, your account will immediately be connected to theirs.
    - If none of the potential matches are your vendor, click I don't see a match for my vendor and send an invitation for your vendor to accept to create an account connected to yours
- Enter the vendor's Payment Network ID
  - If the vendor is already using Bill.com to receive payments electronically, ask them for their Payment Network ID and enter it manually onto their vendor record to connect.
  - In Bill.com, locate the vendor
  - Click More actions
  - Click Enter PNI
  - Enter your vendor's Payment Network ID and click Search
  - Click Connect & Pay
  - Click Confirm
- Send invites to multiple vendors at once
  - Click the Network icon
  - Click Access additional network features here
  - Next to Invite, click View All to see all vendors available to invite
  - Uncheck the boxes for the vendors you do not want to invite
  - Click Next
  - Verify the names and email addresses on the invites and edit as needed
    - Click Customize invite if you'd like to customize and preview the invitation before sending
  - Click Invite now

Unlink vendor

- Click Vendors in the left navigation pane
- Select the vendor to disconnect
- Click More actions
- Click Unlink

Vendor Management

Updating or inactivating a vendor's bank information

- Inactivating a vendor bank account
  - Click Vendors in the left navigation menu
  - Click the vendor name
  - Click More Actions
  - Click Edit Vendor
  - Click Remove bank account in the Vendor Bank Info section
    - A popup will appear at this stage, letting you know that the bank information will be removed permanently. If a new bank account is going to be added, we strongly recommend verbally confirming the new bank information with your vendor, as Business Email Compromise (BEC) is a rising threat (click Learn More here or in the popup for more detail on BEC)
  - Check the box indicating you have confirmed the change with your vendor, and click Remove Bank Account
  - Click Save
- Once the previous bank account has been inactivated, you can add the new bank account:
  - Click More Actions
  - Click Edit Vendor
  - Select ePayments — I have my vendor's bank account info and I'll manage it myself for now
    - Select Invite my vendor to join Bill.com and manage their own bank info if you'd like to also invite your vendor to create a free basic account to manage their info in the future
  - Enter the vendor's bank account information in the Vendor Bank Info section that just opened up
    - Bank Account Holder's name (may or may not be the same as the vendor name, but should be the actual bank account holder's name)
    - Routing Number
    - Account Number
    - Re-enter Account Number
  - Click Save

View payment history for a vendor

- Click Vendors in the left navigation pane
- Click the vendor's name
- Click the Payments tab
  - Payments can be sorted by:
    - Process Date
    - Pay Method
    - Status
    - Amount

View vendor ePayment information

- In the left navigation pane, click Vendors
- Click the name of the vendor
- Click edit

Approvals

Approving and denying bills

- Review and approve
  - Click Approvals in the left navigation pane
  - Click on the Invoice # to approve
  - Review bill details
  - Click approve
    - Tip: Have more than one bill to approve? Click on a bill, approve/deny it, then click Next Bill to move to the next bill or click Previous Bill to go back to a previous one.
- Approve without review
  - Click Approvals in the left navigation pane
    - If there is a note on the bill, there will be a note icon
      - Hover over the note icon or click into the bill to see the note
    - If there is a document associated, there will be a document icon; click this icon to display a preview of any associated bill documents
  - Select the bills to approve
  - Click Approve
- Denying bills
  - Click Approvals in the left navigation pane
  - Click on the Invoice # to approve
  - Review bill details
  - Click More actions
  - Click Deny
  - Select the appropriate option:
    - Needs review
    - Duplicate bill
    - Incorrect bill detail
  - Notify the bill creator why the bill was not approved
  - Click Submit

Approval groups

As part of your Bill.com payables workflow, you can use approval groups to ensure the validity of bills before payment, while not risking payment delays, should any one approver be unavailable. Approval groups are a designated group of approvers you setup and assign to bills or policies, then any one of those approvers in the group can approve the bill. Once one approver from the group has approved, the bill is routed to the next approver/approval group, or is marked as approved if no more approvers are listed.

- Creating an approval group
  - Click Settings
  - Click Approval Groups
  - Click New
  - Enter the approval group Name
  - Enter an optional Description
  - Click Save
  - Check the Select box for all approvers you'd like in the approval group
  - Click Save

Fix or delete denied bill

If an Approver denies a bill, an email notification will be sent to the bill creator. This email notification is triggered by a bill being tagged needing review by an approver. Denied status can also be viewed on the Bills page, in the Approval Status column, and a notification will be in the to do list of any users who have edit bills permissions.

- Edit and reassign
  - From the Overview page, click on the invoice # showing a denied status
  - Review notes entered by approver Payables - Approvals - Fixing or deleting a denied bill - edit and reassign option
  - Click Edit & reassign
  - Make necessary edits
  - Click Save
    - The bill will automatically be reassigned to all approvers, re-starting with the first approver.
- Duplicate Bill
  - From the Overview page, click on the invoice # showing a denied status
  - Review notes entered by approver
  - Click More actions
  - Click Delete Bill

Bill Management

Enter a new bill

- **There are 3 places in Bill.com to begin bill creation:**
  - From the Left Navigation Pane:
    - Click Bills in the left navigation pane
    - Click Enter bill on either the Unpaid Bills tab or All Bills tab
  - From an individual Vendor record:
    - Click Vendors in the left navigation pane
    - Click the Vendor name
    - Click Create bill on the Bills tab
  - From the Inbox
- **Bill Summary**
  - Note to Payers or Approvers — a note typed here is visible in the Notes section on the Bill details page and is available to all users who have create/ edit bill permissions. Click "@" followed by a username to tag a user in the note, who will then receive notification of the note via email
  - Vendor Name — the company or person to be paid
    - After selecting a vendor, hover over the vendor name to see details such as payment method, payment address, pay to, payment terms, autopay setting, 1099 status, tax ID, and primary email address
    - Click Last 5 Bills to see recent bills for the vendor
  - Invoice Number — any numbers or letters to help the vendor identify the bill
  - Payment Terms — how soon the vendor expects payment
    - Will default to the vendor's payment terms if selected, but you can scroll or type and search to select alternate payment terms, or click the magnifying glass and Add New Payment Term
  - Invoice Date — the day the vendor created the invoice
  - Due Date — specific date the vendor expects payment
    - Filled automatically if Payment Terms have already been selected
  - Amount — the total amount of the bill that needs to be paid
    - You can either manually enter the bill total, or leave this blank if you will be splitting the bill into line items, and the system will calculate the total for you.
  - Description — statement that explains what the bill is for (for internal purposes only)
- **Expense Details**
  - Split this amount — toggles the ability to enter more than one expense line item
    - Not available on basic accounts
  - Account — details about the expense or other type of account applicable to the purchase or service received
    - If the account does not already exist, click Add new account
    - To code the bill to more than one Chart of Account toggle Split this amount to on
    - Negative line items are allowed as long as the balance due is greater than or equal to $0
  - Expense Description — optional field to enter a description that differs from the Bill Description.
    - Check the "Use Bill description" box to copy the Bill description to this expense description.
      - Expense Description will be locked if this box is checked, so if you want to copy the Bill Description, and then add or edit, check the box, then uncheck and the copied description will remain for editing.
  - To use the following categories, they will need to be enabled first:
    - Department — the Department related to the bill, generally for billable line items
    - Location — the Location related to the bill, generally for billable line items
    - Customer — the customer related to the bill, generally for billable line items
    - Billable — toggles the billable status of the bill
    - Item — details about the product or service the vendor is invoicing
      - Only available if Split this amount is toggled on

Enter bill with document

- **Click the document you'd like to use in your Inbox**
  - If this is your first multi-page document or you have not set a default, you will see a popup to set your preference to attach all pages by default, or just the first page. You can set your selection to be the default, and this can be changed later.
- **You can manually override the default page inclusion by clicking All or None next to associate to bill to include all/ none, or check the box per page to select individual pages**
  - Check Associate to bill for each page you'd like to include
  - Any pages not included will be available to use later
- **Click Enter bill**
- **Enter the bill summary, including:**
  - Note to Payers or Approvers — a note typed here is visible in the Notes section on the Bill details page and is available to all users who have create/ edit bill permissions. Click "@" followed by a username to tag a user in the note, who will then receive notification of the note via email
  - Vendor — the company or person to be paid
    - After selecting a vendor, hover over the vendor name to see details such as payment method, payment address, pay to, payment terms, autopay setting, 1099 status, tax ID, and primary email address
    - Click Last 5 Bills to see recent bills for the vendor
  - Invoice Number — numbers and/or letters to help the vendor identify the bill
  - Payment Terms — how soon the vendor expects payment
    - Will default to the vendor's payment terms if selected, but you can scroll or type and search to select alternate payment terms, or click the magnifying glass and Add New Payment Term
  - Invoice Date — the day the vendor created the invoice

- Due Date — specific day the vendor expects payment, automatically calculated when Payment Terms is selected
- Amount — the total amount of the bill that needs to be paid
  - You can either manually enter the bill total, or leave this blank if you will be splitting the bill into line items, and the system will calculate the total for you.
- Bill Description — statement that explains what the bill is for (for internal purposes only)
- Split this amount — toggles the ability to enter more than one expense line item
  - To make this easier, click undock to open the attached document in a new tab and expand the multi-expense grid
- Account — details about the expense or other type of account applicable to the purchase or service received
- Expense Description — optional field to enter a description that differs from the Bill Description
  - Check the "Use Bill description" box to copy the Bill description to this expense description.
    - Expense Description will be locked if this box is checked, so if you want to copy the Bill Description, and then add or edit, check the box, then uncheck and the copied description will remain for editing.
- To use the following categories, they will need to be enabled first:
  - Department (if enabled) — the Department related to the bill, generally for billable line items
  - Location (if enabled) — the Location related to the bill, generally for billable line items
  - Customer (if enabled) — the customer related to the bill, generally for billable line items
  - Billable — toggles the billable status of the bill
    - If the bill is split into multiple line items, this toggle becomes a check box on each line item
  - Item — details about the product or service the vendor is invoicing; only available if Split this amount is toggled on

Edit and existing bill

- Click Bills in the left navigation pane
  - If the bill to be edited is not listed, it may not be an unpaid bill
  - To see all Bills, change Payment Status drop down to All
- Click the Invoice Number of the bill to be edited
  - Hover over the vendor name to see details such as payment method, payment address, pay to, payment terms, autopay setting, 1099 status, tax ID, and primary email address
- Click More actions
- Select Edit bill
- Edit the bill information as needed
- Click Save

Deleting a bill

- Click Bills in the left navigation menu
  - Alternatively, click Vendors, and click the vendor's name
- Click the bill's invoice number
- Click More actions
- Click Delete bill

Recurring bills

- Click Bills in the left navigation pane
- Click Recurring Bills in the top left menu; or click the more options icon and click Recurring Bills
- Click New
- Enter the schedule information for the recurring bill:
  - Next Due Date: The due date for the next bill to be created for this vendor.
    - The Bill Date (GL Posting Date) is calculated based on the Due Date minus the vendor's Payment Terms. If there are no payment terms set for the vendor, the Bill Date will be equal to the Due Date
  - Create: How many days in advance the bill should be created By default this is set to 30, Any value between 1 and 365 is allowed
  - Frequency: How often the bill should be created
  - Ends On: The date this recurring bill will cease to be scheduled. Alternatively, select No End Date. The end date should be at least one day after the date that the last bill is created to ensure that the final bill is generated
- Enter the bill information:
  - Vendor: Select the vendor for the bill. Select an existing vendor, or select Add New to quickly enter a new one
  - Description: Open field to add information for others reviewing and/or paying the bill. This field isn't required, but providing information is a good practice
  - Account: The account used for coding the bill
  - Amount: Enter the total bill amount if there are no splits, otherwise, click "+ More"
  - Line Items: For more splits/line items, click "+ More"
  - Description: More details about the line item
- Enter Approvers (optional):
  - Select the required approvers
  - To add more than two approvers, click + Add More Approvers
- Click Save
- On the specified date, the recurring bill will be created with an invoice number that matches the bill due date. Any bills that are specified to be created today or earlier will be created within the next 30 minutes.

Calculate due date for recurring bills

- When creating recurring bills, Bill.com calculates the Bill Date (GL Posting Date) based on the Due Date minus the vendor's Payment Terms
- If there are no payment terms established for a vendor, the Bill Date will be equal to the Due Date
- To change the bill date, navigate to the vendor's page to edit the vendor's payment terms

Bill Statuses

- Unassigned
  - All new bills entered into the system will default to "Unassigned", until you assign at least one approver to it. Depending on your company's Approvals settings "Unassigned" bills can be processed, and paid without the involvement of another individual.

Bill Management

- Assigned
  - The bill has been routed for approval, but the first person on the approver list has not approved it.
- Approving
  - The bill has been approved by at least one approver, but has not yet been approved by all assigned approvers.
- Approved
  - The bill has been approved by all approvers assigned to the bill.
- Denied
  - The bill has been denied for payment by at least one approver. The person responsible for managing bills in the company will receive an email alert that a bill has been denied, and will need to review the bill either to correct any errors and re-route it for approval, or deactivate it.

Multi-Currency

Setup international vendor for foreign currency bills

- Setting up an existing vendor to enter foreign currency bills.
  - If a bill has not yet been created for a vendor, you can edit their bill currency. Once a bill has been created for a vendor, the currency cannot be changed. If another type of currency is needed for an existing vendor with previous bills, a new vendor record will need to be created.
    - Click Edit or More Options then Edit Vendor on the International vendor's record
    - Select the bill currency from the list of default currencies shown based on the vendor's country (edit the vendor's country to change the default currencies offered)
      - Bills can be in USD and payments in a foreign currency if desired, but bills in a foreign currency can only be paid in the same currency
      - Select Show all currencies if you need to enter bills in a currency that is not local to the country selected, but keep in mind, payments can only be sent in the default currencies offered
    - If you have it, you can also enter bank information for International wires at this point. See the International Wires article at the bottom of this page for more information
    - Click Save
  - Create a new multi-currency vendor
    - Click Vendors in the left navigation pane
    - Click Add Vendor
    - Enter vendor name
      - Possible network connections will be presented, but vendors connected through the Network cannot be international/multi-currency, so ignore these matches and continue entering information manually
    - Enter in the vendor's email address and physical address, including the country applicable to the currency of the bills they will have
    - Select your Vendor's bank location
      - Vendor bank location field will default to the same country selected in the vendor's address, but can be changed by selecting another country from the drop-down
    - Select the currency you'd like to use for this vendor's bills
      - Bills can be in USD and payments in a foreign currency if desired, but bills in a foreign currency can only be paid in the same currency
      - Select Show all currencies if you need to enter bills in a currency that is not local to the country selected, but keep in mind, payments can only be sent in the default currencies offered
    - If you have it, you can also enter bank information for International wires at this point. See the International Wires article at the bottom of this page for more information
    - Enter additional vendor details
    - Click Save

Enter foreign currency bill: Once the foreign vendor record has been setup for foreign currency bills, enter the amount in the local currency of the vendor.

- From the Vendor's record, click +Bill
- Enter bill details
  - Exchange Rate — enter an estimated exchange rate
  - Invoice Number — any numbers or letters to help the vendor identify the bill
  - Payment Terms — how soon the vendor expects payment
  - Invoice Date — the day the vendor created the invoice
  - Due Date — specific date the vendor expects payment (filled automatically if Payment Terms have already been selected)
  - Total Amount — the total amount of the bill that needs to be paid
  - Description — statement that explains what the bill is for (for internal purposes only)
  - Account — Chart of Account to code the bill to
    - If the account does not already exist, click Add new account
    - To code the bill to more than one Chart of Account check the box for Split this amount
  - Any other classifications if enabled
- Assign approvers if necessary
- Click Save

Pay foreign currency bill: When scheduling payment for foreign currency bills, the US dollar equivalent for foreign currency bills will be seen by selecting the bill. The US dollar amount is valid for that day only.

- Click Review & pay next to the bill on the Bills tab
  - Process date for foreign currency bills can only be the next business day
    - The system will provide an error when selecting a future date
  - Payment amount is based on amount field on the bill. For partial payments, please enter the part of bill amount that you would like your vendor to receive.
- Click Pay
  - Your account will be debited via ACH in US dollars
  - The funds will be sent via International wire and will arrive as indicated by the "Arrives by date"

Paying Bills

Creating a vendor credit

- **Using the Inbox, with a document**
  - Click Inbox in the left navigation pane
  - Locate the document
  - Under Create a New, click Vendor Credit
- **Using a specific vendor, without a document**
  - Click Vendors in the left navigation pane
  - Click the vendor name
  - Click the Vendor credits tab
  - Click +Credits
  - Enter details
  - Click Save
- **From the Bills page**
  - Click Vendor Credits in the top left menu
  - Click New
  - Click Go to Inbox and follow the Inbox steps above or;
  - Click Enter vendor credit information without adding a document
  - Enter details
  - Click Save

Applying vendor credits

- **From the Bills tab**
  - Click Bills on the left navigation pane
  - Click the credits available link under the invoice amount of the bill you'd like to credit
  - Enter the amount of credit you want to apply or
  - Click Customize to edit which vendor credit(s) will be applied, and amount of each to apply. If you choose not to customize, the oldest credit is applied first.
  - Click Apply
- **From the Bill itself**
  - Click the Invoice number of the bill
  - Click the credits available link in the Bill Summary
  - Enter the amount of credit you want to apply or
  - Click Customize to edit which vendor credit(s) will be applied, and amount of each to apply. If you choose not to customize, the oldest credit is applied first.
  - Click Apply

Combining or separating bill payments to the same vendor

- **Combined payments preference:** By default, payments to the same vendor with the same process date scheduled at the same time will be combined.
  - Change preference for all vendors
    - Click Settings
    - Click Preferences under Payables
    - Select Yes or No next to Combine Payments
    - Click Save
  - Change preference for individual vendors
    - Click Vendors in the left navigation pane
    - Click the Vendor name
    - Click Edit or click More actions and Edit Vendor
    - Select Yes or No from the drop down for Combine Payments
    - Click Save
- **Scheduling payments**
  - Combining payments
    - Click Bills in the left navigation pane
    - Check the box for the invoice numbers to be paid
    - Click Review and Pay
    - Edit Payment Amount for each bill as needed
    - Edit Pay From on each bill selected
      - Edit Pay From for multiple bills at once by checking the box for each and selecting the bank account under Bulk Updates
    - Click the Pen Icon to edit the Process Date
    - Click Next
    - Edit email Address
    - Edit Memo
    - Click Submit Payments
      - The vendor receives one payment for the total and one confirmation email. There is one transaction fee.
  - Sending separate payments
    - Click Bills in the left navigation pane
    - Click Review and Pay for the applicable bill
    - Enter the Payment Amount
    - Select the Payment Process Date
    - Select the Payment Account
    - Enter a Memo
    - Click Pay
    - Repeat for each bill for the same vendor.
      - The vendor receives separate payments and a confirmation for each bill. There will be a transaction fee for each payment.

Connecting to the Large Biller Network

- **Most big billers are already set up to receive payments electronically through the Large Biller Network.** We recommend connecting with your billers that are credit card, utilities, insurance, cable and other service providers. Go to the Vendors page and click one of a large biller names such AT&T, Verizon, Visa, Aetna, and more. Click the Review & Connect banner to see the available matches.
- **Add your Account Number to the vendor record as it appears in the bill.** This is how your large billers know how to apply your payment. Large billers require your account number to get you set up for electronic payments.

Determining a payment's process date

- **Setting the system-wide payment lead time**
  - Click Settings
  - Under Payables, click Preferences
  - In the Lead Time field area, enter in the general preference
    - This field refers to the number of days before a bill is due that payments will be scheduled to be issued. We recommend at least six days before the bill's due date, to allow for mail and processing time.
  - Click Save

- Setting a vendor-specific payment lead time
  - Click Vendors in the left navigation pane
  - Click the vendor you'd like to update
  - Click Edit
  - Toggle the switch to expand the Additional Information section
  - In the Lead Time Days field, enter the vendor-specific lead time
  - Repeat Steps 1-5 for each vendor where the system-wide payment lead time days does not apply

Get authorized to pay bills

- Click Settings
- Under Your Company, click Bank Accounts
- Click the Account Number of the bank you want to nominate use of in Bill.com
- Scroll to view the current Authorized Users
- Request an Authorized User to nominate you or another user(s) to become an authorized user of that bank account
  - After being nominated, a Nominated User will be sent an email with the next steps to complete their authorization process.

Mark bills as paid with an offline payment

- Click Bills in the left navigation menu
- Check the box for the invoice number(s) to be marked as paid
- Click Mark as paid
- Enter offline payment details
  - Payment Amount: By default, the full amount is pre-populated
  - Payment Date: Select the date the payment was made
  - Chart of Account:
    - This field will auto-fill with the account designated in sync preferences field "Default Checking Account in Accounting Software." Edit as necessary.
      - The only options available will be bank type or credit card type accounts
  - Sync: Should this payment sync to the accounting software to mark the same bill as paid?
    - If the payment has already been manually recorded in the accounting software, uncheck this box
  - Reference Number:
    - QuickBooks Online: This field should be left blank when syncing with QuickBooks Online and paying multiple bills with one offline payment to avoid sync errors
  - Memo: This field defaults to the invoice number of the bill being paid and account number of the vendor (if applicable) after the payment is submitted
    - This may be edited as necessary, up to a character limit of 170
- Click Submit

Pay without a bill

- From the Payments Out page
  - On the Payments Out tab from the left navigation menu, click Pay a vendor
  - Select an existing vendor or click Add new vendor
    - Existing vendor: default payment method will be current payment method for vendor
  - Enter additional vendor details if necessary
  - Enter Payment Amount
  - Select Process Date — the day the funds are debited from the bank account
  - Select bank account for the funds to be debited from
    - Scroll or type and search to find a bank account
  - Turn on Set up Electronic Payments to set up electronic payments for a check vendor or skip to step 10
  - Add vendor's bank account
    - We will send a test deposit of a penny to verify the bank account can receive payments
    - For the first payment after manually adding a vendor's bank account, the earliest process date that can be selected is 2 business days after the date the bank was added. This is to ensure the test deposit completes successfully.
  - Click Review Enter payment details
  - Click Send Payment
- From the Vendor record
  - Click Pay vendor on the vendor's record
  - Pay vendor on vendor record
  - Enter Payment Amount
  - Select Process Date - the day the funds are debited from the bank account
  - Select bank account for the funds to be debited from
    - Scroll or type and search to find a bank account
  - Enter additional payment information if necessary
  - Turn on Set Up Electronic payments if wanting to pay the vendor electronically or skip to step 9 Payables - Paying Bills - Pay a vendor feature - Pay a vendor - check vendor
  - Add vendor's bank account
    - We will send a test deposit of a penny to verify the bank account can receive payments
    - For the first payment after manually adding a vendor's bank account, the earliest process date that can be selected is 2 business days after the date the bank was added. This is to ensure the test deposit completes successfully.
  - Click Review
  - Click Send Payment

Payment Management

Payment statuses

- Pending Approval (only on accounts with payment approvals)
  - The bill payer has used the Bill.com system to pay this bill online, but funding for the payment hasn't been initiated yet. Bills with the "Scheduled" status can be canceled up until funding has been initiated (i.e., before the Process Date). When bills are scheduled to be paid online, the funds will be withdrawn on the Process Date, and then vendors are paid without further action on any individual's part (unless there are exceptions).
- Scheduled
  - The bill payer has used the Bill.com system to pay this bill online, but funding for the payment hasn't been initiated yet. Bills with the "Scheduled" status can be canceled up until funding has been initiated (i.e., before the Process Date). When bills are scheduled to be paid online, the funds will be withdrawn on the Process Date, and then vendors are paid without further action on any individual's part (unless there are exceptions).
- Processed
  - Funding has been initiated (meaning, we've sent a notification to the bank that funds are going to be withdrawn), and the scheduled bill payment can no longer be cancelled, even though the funds have yet to be withdrawn from your bank account. You can request a payment in Processed status to be voided. When you void a bill payment, you are requesting a stop payment. Stop payments are on a best-effort basis.
- Check Issued
  - A paper check payment has the status of "Sent" once we have mailed the check to your vendor, but it has not yet been cashed. A sent bill payment can no longer be cancelled. You can request a payment in sent status to be voided. When you void a bill payment, you are requesting a stop payment. Stop payments are on a best-effort basis.
- Uncashed
  - A paper check payment has the status of "uncashed" once we have mailed the check to your vendor, and it has not been cashed for over 20 days. A sent bill payment can no longer be cancelled. You can request a payment in sent status to be voided. When you void a bill payment, you are requesting a stop payment. Stop payments are on a best-effort basis.
- Expired
  - A paper check payment has the status of "expired" once we have mailed the check to your vendor, and it was not cashed within 90 days. An expired check payment can no longer be cashed. You will want to contact your vendor, tell them not to cash the check, and schedule a new payment. When the check expires, the funds will automatically remit to the originating bank account.
- Returned
  - A paper check bill payment that has been returned to Bill.com as undeliverable by USPS/FedEx/UPS will have the status of "returned." Returned checks are destroyed upon delivery back to Bill.com. The payer in your account will want to void the payment, confirm the correct address with the vendor, and schedule a new payment.
- Cleared
  - The payment has the status of "cleared" once a paper check has been cashed, or any other payment type has been successfully delivered to your vendor via the selected method. You can only request a void at this stage if there is suspected fraud or the payment was disbursed to the wrong account, not owned by the intended vendor.
- On hold
  - A bill payment may be on hold if your account is pending verification, if there is an issue with the bank account, or various reasons. If you see this status and have questions, feel free to contact Customer Support for details.
- Canceled
  - The bill had been scheduled for payment, but the payment was canceled before funds were withdrawn, and before the bill reached the Paid status. This bill will not be paid. The payment will have to be re-scheduled, or the bill should be deactivated (i.e., removed from your Bill.com queue).
- Void Pending
  - The payment had been made, but a void was subsequently requested. When an "online" bill payment is requested to be voided, it is contingent on a successful stop payment. Stop payments are on a best-effort basis, and will be in this status until the void request is completed
- Voided
  - The payment had been made, but was subsequently voided. When an "online" bill payment is requested to be voided, it is contingent on a successful stop payment. Stop payments are on a best-effort basis.
- Failed
  - Failed payments are payments of any type, other than paper checks, that were unable to be successfully delivered for various reasons; closed destination bank account, payment declined by destination bank, incorrectly entered bank information, etc. If you see this status and have questions, feel free to contact Customer Support for details.

Cancel a scheduled payment

- Cancel payments from the Payments Out list
  - In the left navigation pane, click Payments Out
  - On the line item of the payment, in the Actions column, click Cancel payment
  - Click Yes to confirm
- Cancel a payment from the payment confirmation screen
  - From the Payments Out tab on the Overview page, click the confirmation number
  - Click Cancel payment Cancel payment button
  - Click Yes to confirm

Customize Payment Memo field

- Click Review & pay on the line of the bill you are paying from the Bills to Pay tab on the Overview page
- Review the payment details, editing the fields of the amount, date, and issuing bank account for the payment being scheduled
- Enter the custom memo in the Memo field
- Click Pay

How to void a payment

- ePayment (ACH) or check
  - You can void an ePayment after the process date, but before it is deposited in the vendor's bank.
  - You can void a check payment after the process date, but before it is cashed.
    - In the left navigation menu, click Payments Out
    - On the same line item as the payment, under the Actions column, click Void
    - Select to Remit or Reissue
      - Remit - the funds will be returned to the originating bank account
      - Reissue - a new check using the same funds will be sent to the vendor
    - Enter a reason for the void
    - Click Submit Request
- Vendor Direct
  - You can void Vendor Direct payments before they are authorized, which means your vendor has entered the single use card number into their merchant system.
    - In the left navigation menu, click Payments Out
    - On the same line item as the payment, under the Actions column, click Void
    - Click Yes to confirm
      - After the payment has been authorized, it cannot be voided. You cannot reissue a Vendor Direct payment as part of the void process, you will need to reschedule .

Unapplying a vendor credit

- Click Bills in the left navigation pane
- Locate the bill the vendor credit is applied to
- Click the credits applied link under the invoice amount
- Edit the amount of credit(s) to apply (change to $0 to remove the credit completely)
- Click Apply

International Wires

Setting up an International vendor for wire transfer

- Setting up an International vendor manually
- Click Vendors in the left navigation pane
- Click Add Vendor
- Enter vendor name
  - Possible network connections will be presented, but vendors connected through the Network cannot be sent international wires, so bypass these matches and continue entering information manually
- Select the vendor type; business or individual
  - This is especially important if this vendor will be sent international wires
- Enter in the vendor's email address, physical address, and select your Vendor's bank location
  - Vendor bank location field will default to the same country selected in the vendor's address.
  - If your vendor's bank is in a different country select the other country from the drop-down
- Enter the vendor's bank information excluding dashes and spaces
  - Enter International bank branch identifier
    - Looking to enter a swift code? Just enter it, if we can't locate a matching bank we'll pop the international bank search so you can enter additional information for us to find the correct bank
    - Alphanumeric bank branch identifiers (IBAN) are case sensitive. All letter(s) must be in uppercase
    - Account Number: Bank Account Number of the vendor
    - Re-enter Account Number: to confirm account number
  - Account/Beneficiary name must match the name on the bank account being entered or payment may be delayed/ held by the recipient bank
  - Some recipient banks do not check to see that the name on the account matches the account number. At the other extreme, some recipient banks will not deposit the money into the account if the name on the money transfer is not exactly the same as the name on the bank account.
- Select the currency you'd like to pay this vendor in
  - The options available will be based on the country selected under Vendor bank location, with United States always available
  - We will always debit in USD
- Select Purpose of Payment, which is required on International wires
- Enter Beneficiary Contact Information
- Enter additional vendor details
- Click Save

Paying an International vendor

- From Overview
  - Single Pay
    - Click Review & pay next to the bill
    - Select the bank account, if more than one bank account has been added
    - Ensure the process date (the date the bank account is debited) is accurate
    - Add a memo if applicable (70 character limit)
      - By default, the memo will contain Invoice # and account #, if available on vendor's record
    - Select Purpose of Payment, if it has not been setup at the vendor level yet
    - Click Pay
  - Bulk Pay
    - Select the bills to pay by checking the box next to the Vendor and Invoice #
    - Click Review & Pay
    - Select the bank account, if more than one bank account has been added
    - Ensure the process date (the date the bank account is debited) is accurate
      - Process date for foreign currency bill can only be the next business day
    - Add a memo if applicable (70 character limit)
      - By default, the memo will contain Invoice # and account #, if available on vendor's record
    - Click Pay
      - Note: Purpose of payment is required for all International vendors. If this field has not been setup at the vendor level yet, you will be prompted to do so when selecting bills for International vendors.
- From bill
  - Click the invoice #
  - Click Review & pay
  - Select the bank account, if more than one bank account has been added
  - Ensure the process date (the date the bank account is debited) is accurate
  - Add a memo if applicable (70 character limit)
    - By default, the memo will contain Invoice # and account #, if available on vendor's record
  - Click Pay
    - The account will be debited via ACH in USD
    - Payment method will display Wire, as the funds will be sent via international wire
    - Payment will arrive as indicated by the Arrives by date
    - Indicative amount of what the vendor will receive if selecting to pay them in local currency
      - Note: This amount can change if selecting a future process date as exchange rates fluctuate constantly

Tracking a payment: If your vendor has not received payment by the 5th banking day, and Administrator users have not received an email notifying them of a delay, you can obtain the payment trace details in your Bill.com account.

- Click Payments out in the left navigation menu
- Click the payment confirmation number for the payment you want to trace
- Click Payment trace details
- What can I do with these details?
  - Confirm Payment Information: Using the payment trace details page, you will first want to confirm the payment information in the top Confirm payment information section against what your vendor provided to ensure it was entered into Bill.com correctly.
    - If you find an error in the payment information, you can void the payment if it does not show as cleared/disbursed yet. You can then correct the vendor's payment information, and schedule a new payment.
    - If the payment information is correct, move to the next option below.
    - If the payment shows as disbursed but your vendor still has not received it in the expected account, move to the next option below.
  - Trace the Payment: If you do not see any issues with the payment information, the Trace the payment section has additional details that you can give to your vendor. Your vendor can then provide those details to their bank to locate and deposit the payment. This solves the vast majority of missing or delayed payments.
    - If the vendor's bank successfully locates the payment using the trace details, your vendor should ask the bank if there is a way to prevent the delay in the future (additional info, corrected info, etc.)
    - If the vendor's bank is unable to locate the payment with the trace details, please contact Customer Support
