COOPERATIVE AGREEMENT BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND PARTNERS OF THE AMERICAS FOR THE PROVISION OF AGRICULTURAL COMMODITIES AND FINANCIAL AND TECHNICAL ASSISTANCE THROUGH THE MCGOVERN-DOLE INTERNATIONAL FOOD FOR EDUCATION AND CHILD NUTRITION PROGRAM

Preamble

The Government of the United States of America, acting through the Foreign Agricultural Service (hereinafter referred to as FAS), an agency within the United States Department of Agriculture (hereinafter referred to as USDA), and Partners of the Americas (hereinafter referred to as the Recipient);

In an effort to carry out school feeding projects that improve food security, reduce the incidence of hunger, and improve literacy and primary education, particularly with respect to girls, and maternal, infant, and child nutrition projects, and thereby contribute to more self-reliant, productive societies;

Desiring to set forth the understandings that will govern the provision of agricultural commodities and financial and technical assistance to the Recipient for use in Honduras under the McGovern-Dole International Food for Education and Child Nutrition Program, which is authorized by section 3107 of the Farm Security and Rural Investment Act of 2002, as amended;

Agree as follows:

PART I
TERMS OF DONATION

A. FAS agrees to donate to the Recipient the agricultural commodities, and quantities thereof, specified in Part I, Paragraph C, (hereinafter referred to as the "donated commodities") for assistance in Honduras and, to the extent specifically included in Part III, Items I and III, provide financial and technical assistance, pay ocean transportation and other costs associated with providing the donated commodities, and provide funds to the Recipient for the procurement and transportation of qualified commodities, as specified in Part II, Paragraph B(2), (hereinafter referred to as the “procured commodities”). This donation is not for research and development.

B. The Recipient agrees to use the donated commodities, any procured commodities, and any amount specified in Part III, Item III, Paragraph A, only in accordance with this agreement and the approved Plan of Operation, Attachment A, which is attached hereto and made a part of this agreement.

C. The donated commodities to be made available under this agreement are as follows:

List of Standard Commodities

Commodity	Maximum Quantity Metric Tons (MT)	Commodity Usage	Packaging	Estimated Arrival At U.S. Port(s)
Yellow Corn	210	Direct Feed	50 kg bag	02/01/2026
Vegetable Oil	70	Direct Feed	4 ltr can	02/01/2026
Small Red Beans	330	Direct Feed	50 kg bag	02/01/2026
Fortified Rice, 5/20 Long Grain, Well Milled	280	Direct Feed	50 kg bag	02/01/2026
Corn-Soy Blend Plus	780	Direct Feed	25 kg bag	02/01/2026
Yellow Corn	250	Direct Feed	50 kg bag	10/01/2027
Vegetable Oil	90	Direct Feed	4 ltr can	10/01/2027
Small Red Beans	390	Direct Feed	50 kg bag	10/01/2027
Fortified Rice, 5/20 Long Grain, Well Milled	350	Direct Feed	50 kg bag	10/01/2027
Corn-Soy Blend Plus	950	Direct Feed	25 kg HP bag	10/01/2027
Yellow Corn	250	Direct Feed	50 kg bag	10/01/2028
Fortified Rice, 5/20 Long Grain, Well Milled	350	Direct Feed	50 kg bag	10/01/2028
Vegetable Oil	90	Direct Feed	4 ltr can	10/01/2028
Small Red Beans	390	Direct Feed	50 kg bag	10/01/2028
Corn-Soy Blend Plus	950	Direct Feed	25 kg HP bag	10/01/2028
Yellow Corn	190	Direct Feed	50 kg bag	10/01/2029
Vegetable Oil	70	Direct Feed	4 ltr can	10/01/2029
Small Red Beans	290	Direct Feed	50 kg bag	10/01/2029
Fortified Rice, 5/20 Long Grain, Well Milled	260	Direct Feed	25 kg bag	10/01/2029
Corn-Soy Blend Plus	710	Direct Feed	25 kg HP bag	10/01/2029
Yellow Corn	120	Direct Feed	50 kg bag	10/01/2030
Vegetable Oil	70	Direct Feed	4 ltr can	10/01/2030
Small Red Beans	200	Direct Feed	50 kg bag	10/01/2030
Fortified Rice, 5/20 Long Grain, Well Milled	170	Direct Feed	50 kg bag	10/01/2030
Corn-Soy Blend Plus	470	Direct Feed	25 kg HP bag	10/01/2030

Yellow Corn	60	Direct Feed	50 kg bag	10/01/2031
Small Red Beans	110	Direct Feed	50 kg bag	10/01/2031
Fortified Rice, 5/20 Long Grain, Well Milled	90	Direct Feed	50 kg bag	10/01/2031
Corn-Soy Blend Plus	240	Direct Feed	25 kg HP bag	10/01/2031
Total	**8,780**			

Each type of commodity included in the donated commodities will comply with the specifications for such commodity in Commodity Specifications, Attachment B, which is attached hereto and made a part of this agreement. FAS may, at its option, substitute packaging of a different size or type or both. FAS may, but is not required to, provide extra bags for donated commodities that are packaged if the Recipient requests them at the time that the Recipient submits its order for delivery of such donated commodities.

D. FAS will endeavor to provide to the Recipient the maximum quantity of each of the donated commodities specified above. FAS may, however, provide a quantity of a commodity that is less than the maximum quantity, to the extent that in FAS's estimation the total cost of commodities, transportation, and any financial and technical assistance provided by FAS under this agreement would exceed $40,000,000.00. For FAS's financial management purposes, costs associated with this agreement will be obligated against budget fiscal year 2025 funds.

E. The Recipient will provide a cost sharing or matching contribution of $406,980.00, resulting in a total Federal award amount of $40,406,980.00. If the Recipient fails to comply with this requirement, FAS may take action in accordance with 7 CFR section 1599.16 and 2 CFR section 200.339. This includes, but is not limited to, withholding further Federal Funds for this or future projects.

F. This agreement is subject to the availability, during each fiscal year to which this agreement applies, of the necessary commodities and funds.

G. This agreement is subject to the terms and conditions set forth in 7 CFR part 1599 and the Office of Management and Budget guidance at 2 CFR part 200, as supplemented by 2 CFR part 400 and 7 CFR part 1599. In addition, except as otherwise provided in 7 CFR part 1599, other regulations that are generally applicable to grants and cooperative agreements of USDA, including 2 CFR parts 25, 170, 175, 180, 182, 415, 417, 418, 421, and 422, apply to the McGovern-Dole International Food for Education and Child Nutrition Program.

H. The Assistance Listing Number and program title for the McGovern-Dole International Food for Education and Child Nutrition Program is 10.608, Food for Education.

PART II

PROCUREMENT OF COMMODITIES

A. The Recipient will use funds provided by FAS under this agreement and designated for this purpose to make a local procurement or regional procurement, or both, of approved qualified commodities to distribute in Honduras in accordance with this agreement. Qualified commodities, as defined in 7 CFR section 1599.2, must be produced in a country (the "country of origin") that is either Honduras or a developing country in the target region under this agreement, and must meet each nutritional, quality, and labeling standard of Honduras for such commodities, as well as the criteria specified in 7 CFR section 1599.6(b). Section 6 of Attachment A sets forth the applicable nutritional, quality, labeling, and food safety standards for each qualified commodity to be procured by the Recipient under this agreement. The Recipient must comply with these standards and 7 CFR section 1599.6(b) when procuring commodities with funds provided under this agreement.

B. (1) The Recipient will make a local or regional procurement, or both, of each qualified commodity in the table in subparagraph (2) from the country(ies) of origin specified for that commodity in such table. For the purposes of this agreement, the country of origin and the purchase country, as defined in 7 CFR section 1599.2, will be the same. The Recipient will not use FAS-provided funds to procure commodities from any country other than as specified in subparagraph (2).

(2) FAS approves the following types and quantities of qualified commodities for procurement by the Recipient under this agreement:

List of Locally or Regionally Procured Commodities

Commodity	Total Quantity Metric Tons (MT)	Commodity Usage	Packaging	Estimated Arrival To Destination Country	Country Of Origin
LRP - Fresh Vegetables	1,310	Direct Feed	Bulk	10/01/2026	Honduras
LRP - Fresh Fruits	260	Direct Feed	Bulk	10/01/2026	Honduras
LRP - Eggs	3,660	Direct Feed	Bulk	10/01/2026	Honduras
Total	**5,230**				

(3) The Recipient may make a change to packaging or an estimated arrival at destination country specified in the table in subparagraph (2), or increase or decrease the total quantity of a commodity in the table by less than 10 percent of such total quantity. The Recipient may increase or decrease the total quantity of a commodity in the table by 10 percent of such total quantity or more only if it has obtained written approval of such change from the Senior Director, International Food Assistance Division (IFAD), FAS, prior to making the change. If the Recipient seeks to change any of the other information in the table, this agreement must be amended. The Recipient will submit a written request for such an amendment to the Senior Director, IFAD.

C. FAS has determined that, if the Recipient complies with the applicable procurement standards in 2 CFR sections 200.318 through 200.327, it will be presumed to have procured qualified commodities at a reasonable market price. If FAS later finds that the Recipient failed to comply with these

standards, and that this failure affected the price at which the commodities were procured, FAS may determine that such commodities were not procured at a reasonable market price.

PART III
TRANSPORTATION, DAMAGE OR LOSS, AND PAYMENT OF COSTS

Item I – Transportation of Donated Commodities and Procured Commodities

A. The Recipient will arrange for the transportation of the donated commodities from the place at which the ocean carrier receives the donated commodities from the commodity supplier to the initial storage site(s), in accordance with 7 CFR section 1599.8(b)(2), using a through bill of lading. The Recipient will arrange for any transportation of the procured commodities in accordance with this agreement and 7 CFR section 1599.8.

B. The Recipient agrees to arrange for ocean transportation in accordance with 7 CFR section 1599.8(a) and 48 CFR part 47, subpart 47.5 – Ocean Transportation by U.S.-Flag Vessels.

C. The Recipient will submit any proposed invitation for transportation bids to FAS and obtain the approval of FAS prior to issuing such invitation. The Recipient will submit any bid that it proposes to accept to FAS and obtain the approval of FAS prior to entering into a contract for transportation based upon such bid. The Recipient will provide to FAS a copy of each contract for transportation. FAS will pay the costs, consistent with the terms of the applicable contract, of transporting donated commodities from the place at which the ocean carrier receives them from the commodity supplier to the initial storage site(s) by reimbursing the ocean carrier for such costs.

D. The Recipient will include payment instructions in each contract for transportation. The Recipient will require that each request for payment under a contract for transportation of donated commodities be sent to FAS's automated payment system via the Web-Based Supply Chain Management (WBSCM) system. The Recipient will also ensure that the documents specified in 7 CFR section 1599.7(a)(1) – (6) are maintained on file and made available to FAS.

E. If the Recipient uses the services of a freight forwarder, the Recipient will provide to the Senior Director, IFAD, the name of and contact information for the freight forwarder and the certification required by 7 CFR section 1599.8(f) prior to submitting its initial order for the delivery of donated commodities under this agreement.

Item II – Damage to or Loss of Donated Commodities or Procured Commodities

A. FAS will transfer the title to, and the risk of loss of, the donated commodities to the Recipient at the time and place at which the ocean carrier receives the donated commodities from the commodity supplier. The Recipient will be responsible for any procured commodities following the transfer of title to the procured commodities from the commodity vendor(s) to the Recipient.

B. The Recipient will report damage to or loss of donated commodities or procured commodities to which it has title as follows:

(1) If the Recipient has title to donated commodities or procured commodities that have been damaged or lost, and the value of the damaged or lost commodities is estimated to exceed $20,000, the Recipient will notify the Senior Director, IFAD, in writing immediately after becoming aware of such damage or loss, in accordance with 7 CFR section 1599.11(b)(1);

(2) If the Recipient has title to donated commodities or procured commodities that have been damaged or lost, and the value of the damaged or lost commodities is estimated to exceed $1,000 but not to exceed $20,000, the Recipient will notify the Senior Director, IFAD, in writing within 15 days after the date that the Recipient becomes aware of such damage or loss, in accordance with 7 CFR section 1599.11(c); and

(3) If the Recipient has title to donated commodities or procured commodities that have been damaged or lost, and the value of the damaged or lost commodities is estimated not to exceed $1,000, the Recipient will notify FAS in the first semiannual performance report that is due after the date that the Recipient becomes aware of such damage or loss, in accordance with 7 CFR section 1599.11(c).

The Recipient will take all steps necessary to protect its interests and the interests of FAS with respect to any damage to or loss of the donated commodities or procured commodities that occurs after title has been transferred to the Recipient. Failure to use donated or procured commodities, sale proceeds, FAS-provided funds, interest, or program income (including failure to exercise reasonable care with commodities) in accordance with the agreement may amount to noncompliance under 7 CFR 1599.16. If FAS finds a Recipient in noncompliance with the agreement, FAS may impose additional conditions or take one or more actions set forth in 2 CFR 200.339, including initiating a claim as a remedy.

C. In accordance with 7 CFR section 1599.10(c) and (d), the Recipient will be responsible for arranging for an independent cargo surveyor to inspect the donated commodities, and any procured commodities transported by ocean, upon discharge from the ocean carrier and to prepare a survey or outturn report. The Recipient may request through FAS that the Agricultural Marketing Service (AMS) provide an independent cargo surveyor in order to meet this requirement. When donated commodities or procured commodities are shipped on a through bill of lading, the Recipient must also obtain a delivery survey. When procured commodities are transported overland, the Recipient will ensure that the overland transportation contract includes a requirement that a loading and offloading report be prepared and provided to the Recipient. The Recipient will provide a copy of discharge and delivery survey reports, as well as loading and offloading reports, to FAS upon request. FAS will reimburse the Recipient for the reasonable costs of these services, as determined by FAS.

D. (1) Part III, Item II, Paragraph C, 7 CFR section 1599.10(c) - (i), and 7 CFR section 1599.11 will not apply with respect to any donated commodities if the Recipient notifies FAS, prior to the receipt of the donated commodities by the ocean carrier, that the Recipient has sold the donated commodities in accordance with this agreement on terms that require full payment based upon bill of lading quantities.

(2) Part III, Item II, Paragraph C, and 7 CFR section 1599.10(c) and (e) will not apply with respect to any donated commodities, or any procured commodities transported by ocean, if the Recipient notifies FAS, prior to the receipt of the donated commodities or procured commodities by the ocean

carrier, that the Recipient has purchased insurance against marine cargo loss and damage (including general average losses) for at least the value of the commodity acquisition, transportation, and related costs incurred by FAS with respect to such donated commodities or procured commodities, as well as such costs incurred by the Recipient and obligated to be paid by FAS under this agreement.

Item III – Payment of Other Costs

A. FAS will provide to the Recipient not more than $27,530,200.00 for internal transportation, storage, and handling costs incurred by the Recipient after delivery of the donated commodities to the initial storage site(s); the costs of the procurement, transportation, storage, and handling of any procured commodities; the costs of administering and monitoring food assistance programs undertaken by the Recipient; and the costs of activities that would enhance the effectiveness of the program.

B. The Recipient will arrange for any internal transportation, storage, and handling of the donated commodities following their delivery to the initial storage site(s) by contracting directly with the suppliers of such services. The Recipient will also arrange for any transportation, storage, and handling of any procured commodities from the designated point and time at which title to the procured commodities passes to the Recipient by contracting directly with the suppliers of such services. The Recipient will be responsible for the payment for any of these services that are not covered in Part III, Item III, Paragraph A.

C. (1) The budget approved by FAS for this agreement consists of the Budget Summary, Attachment C-1, which is attached hereto and made a part of this agreement. The Budget Narrative, Attachment C-2, will be attached to and made a part of this agreement when the parties amend this agreement in accordance with Part I. The Recipient will expend any funds generated from a sale of the donated commodities that is otherwise permitted under this agreement (hereinafter referred to as the "sale proceeds"), FAS-provided funds, and funds provided as voluntary committed cost sharing or matching contributions, only for costs as specified in the line items in Attachment C-1. The Recipient may expend such funds only up to the amounts specified in the line items in Attachment C-1; except that, in accordance with 7 CFR section 1599.12(h), the Recipient may make adjustments between direct cost line items in Attachment C-1 without further approval, subject to the limitation in 7 CFR section 1599.12(h)(2), provided that: (a) the total amount of such adjustments does not exceed ten percent of the Grand Total Costs, excluding any voluntary committed cost sharing or matching contributions, in Attachment C-1, and (b) regardless of the total amount of adjustments, the Recipient must obtain prior approval from FAS for any adjustments that involve actions that require prior approval pursuant to 2 CFR part 200.

(2) Both Attachment C-1 and Attachment C-2 must be amended if the Recipient seeks to make adjustments between direct cost line items greater than ten percent of the Grand Total Costs, excluding any voluntary committed cost sharing or matching contributions, in Attachment C-1. In Attachment C-2, as amended, the sections corresponding to the adjusted line items will show the adjusted line item totals and any changes in amounts within the sections that contributed to the adjusted line item totals. In addition, Attachment C-2, as amended, will include any changes in the narrative that are required to make it consistent with the adjusted line item totals.

(3) Of the funds provided by FAS to the Recipient pursuant to Part III, Item III, Paragraph A, the Recipient may not spend more than $4,000,000.00 for the local or regional procurement, or both, of qualified commodities in accordance with Part II and for costs directly associated with such procurement, as specified in Attachment C-2. Notwithstanding Part III, Item III, Paragraph C(1), the Recipient may not make any adjustment that would involve a line item under the category of "Commodity and Food Purchases (LRP only)" in Attachment C-1.

D. (1) Any amounts specified for indirect costs in Attachment C-1 and C-2 are based upon a provisional rate contained in a Negotiated Indirect Cost Rate Agreement (NICRA), unless the Recipient has elected to charge a *de minimis* rate of fifteen percent of modified total direct costs pursuant to 2 CFR 200.414(f). In the event that the final NICRA rate for a particular period is lower than the provisional rate, the Recipient: (a) in the case where FAS-provided funds were used to pay indirect costs, will return the difference to FAS; and (b) in the case where sale proceeds were used to pay indirect costs, will retain the difference and use it for one or more direct costs identified in Attachment C-1. In the event that the final NICRA rate for a particular period is higher than the provisional rate, the Recipient may request FAS to amend this agreement to permit the Recipient to shift an amount of funds provided by FAS or sale proceeds equal to or less than the difference from direct costs to one or more indirect costs identified in Attachment C-1.

(2) Unless the Recipient has elected to charge a *de minimis* rate of fifteen percent of modified total direct costs pursuant to 2 CFR 200.414(f), the Recipient must make all reasonable efforts to obtain its final NICRA rate from the Federal agency responsible for negotiating the rate with the Recipient (hereinafter referred to as the "cognizant Federal agency") prior to the completion of the closeout of this agreement. If the final NICRA rate is not available when the last of the financial and performance reports required by this agreement is due, the Recipient must submit the following information in writing to FAS: (a) a statement that the final NICRA rate is unavailable, (b) the name of, and a point of contact at, the cognizant Federal agency, and (c) the status of the Recipient's final NICRA rate determination, including a timeline for the submission of its proposed final NICRA rate to the cognizant Federal agency and the completion of the final annual single audit or program-specific audit required by 2 CFR part 200, subpart F.

(3) The Recipient must notify FAS immediately, in writing, if the Recipient receives the final NICRA rate prior to the completion of the closeout of this agreement. If the Recipient has already submitted its final financial report to FAS, the Recipient will have 30 days from the date of its notification to FAS of the final NICRA rate to submit a revised final financial report that is based on the final NICRA rate; provided, however, that FAS will complete the closeout of this agreement within one year after the end date of the period of performance, using the approved provisional rate if the Recipient has not submitted the revised financial report within sufficient time, as determined by FAS, for FAS to apply the final NICRA rate, and FAS will not authorize any further payments.

E. (1) FAS will pay all costs for which it is obligated under this agreement to the Recipient through advance payments, unless the Recipient requests the payment of a cost through reimbursement.

(2) In accordance with 7 CFR section 1599.7(f)(3), the Recipient must fully disburse funds from the preceding advance before it submits a new advance request under this agreement, with the exception that the Recipient may request to retain a reasonable (minimal) balance of any funds that have not

been disbursed and roll it over into a new advance request if the new advance request is made within 90 days after the preceding advance was made.

(3) In accordance with 7 CFR section 1599.7(f)(7), the Recipient must maintain funds advanced by FAS in an insured bank account located in the United States; provided, however, that when such funds are needed for the payment of approved expenses under this agreement, the Recipient may transfer the funds to a bank account in Honduras.

F. The Recipient shall apply, and shall ensure any subrecipient apply, the general cost principles in 2 CFR part 200, subpart E, as applicable, and the specific cost principles in 2 CFR 200.475 to travel funded, in whole or in part, under this agreement or a subrecipient agreement.

G. Unless FAS authorizes an extension, the Recipient must liquidate all obligations incurred under this agreement and submit its final financial report no later than 120 days after the end date of the period of performance of this agreement specified in Part V, Paragraph B. The Recipient must refund to FAS any FAS-provided funds or sale proceeds that it has not expended by the time that it submits its final financial report to FAS under this agreement.

PART IV
RECIPIENT'S RESPONSIBILITIES

Item I – General

A. The Recipient will distribute the donated commodities provided under this agreement within Honduras or, if approved by FAS, sell the donated commodities within Honduras at the earliest practicable time, in accordance with the terms of this agreement. The Recipient will not sell or transship the donated commodities or any procured commodities to any location outside of Honduras, or use the donated commodities for other than domestic purposes, for as long as the Recipient has title to such donated commodities or procured commodities. The Recipient will not use any commodities for any purpose other than food assistance.

B. The Recipient will not sell or barter the donated commodities except as may be specified in Attachment A or otherwise specifically agreed in writing by FAS, or to dispose of damaged donated commodities in accordance with 7 CFR section 1599.10(g). The Recipient will not sell any procured commodities except to dispose of damaged procured commodities in accordance with 7 CFR section 1599.10(g).

C. If FAS has approved the sale of some or all of the donated commodities, the Recipient will submit a monetization plan for FAS approval that will include a draft invitation(s) for bids; payment terms; proposed sale price(s); and other information specified by FAS. FAS will not deliver commodities to be monetized to the Recipient until FAS approves the monetization plan and proposed sale price(s), and the Recipient notifies FAS, in writing, that the Recipient has entered into a contract with a buyer for the sale of such commodities. The Recipient will immediately deposit the sale proceeds into an account of a bank in sound financial condition. The account will be insured and interest-bearing, unless FAS agrees in writing that an exception provided for in 7 CFR section 1599.12(g) applies. The Recipient will supervise such account and maintain a full accounting of all funds under this agreement.

D. As provided in 7 CFR section 1599.12(e), the Recipient will not use any sale proceeds, FAS-provided funds, interest, or program income to acquire goods or services, either directly or indirectly through another party, in a way that violates any of the U.S. Government economic sanctions programs published by the U.S. Treasury Office of Foreign Assets Control at the following website: http://www.treasury.gov/resource-center/sanctions/Pages/default.aspx.

Item II – Reports and Document Submission

A. The Recipient will, within 30 days after both parties have signed this agreement, submit to FAS for approval an organizational chart identifying the names, positions, and responsibilities of all of the Recipient's key personnel. For the purposes of this agreement, the Recipient's key personnel will be managers with general responsibilities for implementation of the agreement, such as the country director, finance director, and chief of party, as well as critical technical staff for specific activities under the agreement. Following approval by FAS of the organizational chart, the Recipient will be required to obtain written approval from FAS before hiring any new key person and notify FAS within one week after the departure of any key person. Furthermore, in accordance with 2 CFR section 200.308(f)(3), the Recipient must obtain written approval from FAS prior to the disengagement from the project for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director.

B. The Recipient will, within 30 days after the export of all or a portion of the donated commodities or any procured commodities requiring ocean transportation, submit evidence of such export to FAS, in accordance with 7 CFR section 1599.14(e).

C. The Recipient will, within 60 days after both parties have signed this agreement, submit to FAS for approval its work plan. This work plan will include a detailed description of each activity, including estimated start and completion dates for each activity and other information specified by FAS. The work plan will cover the period from the beginning until the end of the period of performance of the agreement. The Recipient will submit to FAS for approval an annual update to the work plan in each subsequent Federal government fiscal year during the period of performance of the agreement, according to a schedule specified by FAS. The annual update for each fiscal year will provide any updated information needed to ensure that the work plan is current and accurate.

D. The Recipient will, within three months after both parties have signed this agreement, submit to FAS for approval a performance monitoring plan and an evaluation plan that comply with the requirements in 7 CFR section 1599.13 and with IFAD's Monitoring and Evaluation Policy located at: https://www.fas.usda.gov/sites/default/files/2019-06/fad_mande_policy_feb_2019.pdf. The Recipient will conduct performance monitoring and evaluations in accordance with the plans approved by FAS. Before making any changes to its approved performance monitoring plan or evaluation plan, the Recipient must submit the proposed changes to FAS and obtain FAS's approval in writing. Furthermore, within six months after both parties have signed this agreement, or a longer time period if agreed upon in writing by the Recipient and FAS, the Recipient must submit the results of any baseline study to FAS and request that the Performance Indicators, Attachment D, be updated to incorporate such results.

E. The Recipient will, within 120 days after both parties have signed this agreement, submit to FAS for approval a procurement plan for the procured commodities, in accordance with 7 CFR section

1599.6(c). The procurement plan will include time periods, broken down by month, for commodity procurement, delivery, and distribution. The procurement plan will cover the period from the beginning until the end of the period of performance of the agreement. The Recipient will submit to FAS for approval an annual update to the procurement plan in each subsequent Federal government fiscal year during the period of performance of the agreement, according to a schedule specified by FAS. The annual update for each fiscal year will provide any updated information needed to ensure that the procurement plan is current and accurate. The Recipient will comply with the procurement plan, as approved by FAS. The Recipient will not make any changes to the procurement plan without obtaining the prior written approval of FAS, except that the Recipient may make changes as permitted in Part II, Paragraph B(3), without prior approval. The Recipient must notify the Senior Director, IFAD, of any change made without prior approval, as permitted in Part II, Paragraph B(3), in the first semiannual performance report that is due after the Recipient makes such a change.

F. The Recipient will, within 120 days after both parties have signed this agreement, submit to FAS for approval the first annual market study. The Recipient will submit to FAS for approval an annual market study in each subsequent Federal government fiscal year during the period of performance of the agreement, according to a schedule specified by FAS. Each annual market study will provide current information to enable the Recipient and FAS to evaluate the capacity of the market in the country of origin to meet the procurement level for each procured commodity, and to consider the economic impact of donated commodities and procured commodities on the target country and, in the case of procured commodities, on the country of origin if it is different from the target country. The Recipient will use the annual market studies to prepare and update the procurement plan.

G. The Recipient will submit semiannual financial reports to FAS, in accordance with 7 CFR section 1599.14(b). The reporting periods will be April 1 through September 30 and October 1 through March 31. The Recipient must submit the report for each reporting period no later than 30 days after the end of the reporting period (i.e., October 30 for the April 1 through September 30 reporting period and April 30 for the October 1 through March 31 reporting period); provided, however, that if the first semiannual financial report would cover a partial reporting period and be due less than 60 days after the effective date of the agreement, the Recipient will be exempted from submitting a report for such partial reporting period, and the Recipient's first semiannual financial report will cover the period from the effective date of the agreement through the first full reporting period and be due no later than 30 days after the end of such reporting period. The Recipient must submit the final financial report no later than 120 days after the end date of the period of performance for this agreement.

H. (1) The Recipient will submit semiannual performance reports to FAS, in accordance with 7 CFR section 1599.14(c). The Recipient will also include in the semiannual performance reports the information required in 7 CFR section 1599.14(f)(1) and, where applicable, 7 CFR section 1599.14(f)(2). The reporting periods will be April 1 through September 30 and October 1 through March 31. The Recipient must submit the report for each reporting period no later than 30 days after the end of the reporting period (i.e., October 30 for the April 1 through September 30 reporting period and April 30 for the October 1 through March 31 reporting period); provided, however, that if the first semiannual performance report would cover a partial reporting period and be due less than 60 days after the effective date of the agreement, the Recipient will be exempted from submitting a report for such partial reporting period, and the Recipient's first semiannual performance report will cover the period from the effective date of the agreement through the first full reporting period and be

due no later than 30 days after the end of such reporting period. The Recipient must submit the final performance report no later than 120 days after the end date of the period of performance for this agreement.

(2) In each semiannual performance report, the Recipient will report its progress toward achieving the targets in the performance indicators contained in Attachment D. Each performance indicator will contribute to the achievement of one of the results outlined in the Project-level Results Framework, Attachment E. Attachments D and E will be attached to and made a part of this agreement when the parties amend this agreement in accordance with Part I. FAS will assess the Recipient's performance under the agreement by comparing, for each performance indicator in Attachment D, the annual targets with the outcomes or outputs achieved by the Recipient, taking into account any circumstances that might have affected performance, including any circumstances beyond the control of the Recipient.

I. The Recipient will submit evaluation reports for the agreement to FAS, in accordance with 7 CFR section 1599.14(d) and IFAD's Monitoring and Evaluation Policy. The reports must be submitted in accordance with the timeline in the FAS-approved evaluation plan described in Part IV, Item II, Paragraph D.

J. The Recipient will enter into a written contract with each provider of goods, services, or construction work valued at or above the Simplified Acquisition Threshold, in accordance with 7 CFR section 1599.12(k). The Recipient will submit a copy of each such signed contract to FAS, by uploading the documents into FAIS at https://apps.fas.usda.gov/FAIS/webapp/.

K. The Recipient will consult FAS prior to the selection of any subrecipient. The Recipient will enter into an agreement with each subrecipient that will set forth the responsibilities of both parties. The Recipient will submit a copy of each subrecipient agreement to FAS within 60 days after signing the subrecipient agreement and prior to the transfer of any donated commodities, procured commodities, sale proceeds, FAS-provided funds, or program income to the subrecipient, in accordance with 7 CFR section 1599.15(a). The Recipient will submit a copy of each subrecipient agreement by uploading the documents into FAIS at https://apps.fas.usda.gov/FAIS/webapp/. The Recipient will obtain written approval from FAS before making any changes to any information regarding a subrecipient specified in section 4(d) of Attachment A.

L. The Recipient will inform FAS, in accordance with 7 CFR section 1599.13(c), of any problems, delays, or adverse conditions that materially impair the Recipient's ability to meet the objectives of this agreement. This notification must include a statement of any corrective actions taken or contemplated by the Recipient, and any additional assistance requested from FAS to resolve the situation. The Recipient must make this notification by sending an e-mail message to the Senior Director, IFAD, at PPDED@fas.usda.gov within 30 days after the date on which the Recipient becomes aware of such a problem, delay, or adverse condition.

M. If the Recipient uses funds under this agreement to establish a Federal interest in real property, such as through construction, the Recipient will submit to FAS a Standard Form 429, Real Property Status Report. The Recipient will submit this form to FAS before it uses funds under this agreement to acquire, improve, furnish, or dispose of any real property in which there is a Federal interest and

will continue to submit the form on an annual basis, beginning on a date specified by FAS, until the disposition of the property by the Recipient in accordance with 2 CFR section 200.311.

N. Except as otherwise provided in this agreement or communicated by FAS to the Recipient in writing, the Recipient will submit any reports, information, or requests required by or related to this agreement, and any other submissions required in 7 CFR part 1599, to the Senior Director, IFAD, through the Food Aid Information Service (FAIS). The Recipient will consult FAIS at https://apps.fas.usda.gov/FAIS/webapp/ for required forms and instructions. If questions arise related to this agreement, the Recipient may send a message to PPDED@fas.usda.gov to seek assistance.

O. The information collection requirements contained in this agreement have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and assigned OMB Number 0551-0035 (expires April 30, 2027). Persons are not required to respond to a collection of information unless it displays a currently valid OMB control number.

Item III – Certification and Compliance Requirements

A. The Recipient asserts that it has taken action to ensure that any donated commodities that will be distributed to beneficiaries, and any procured commodities that will be obtained through regional procurement, will be imported free from all customs, duties, tolls, and taxes; and all donated commodities and procured commodities will be distributed free from all customs, duties, tolls, and taxes. The Recipient has submitted information to FAS to support this assertion.

B. The Recipient asserts that, to the best of its knowledge, the importation, if applicable, and distribution of the donated commodities and procured commodities in Honduras will not result in a substantial disincentive to or interference with domestic production or marketing in Honduras. The Recipient has submitted information to FAS to support this assertion.

C. The Recipient asserts that, to the best of its knowledge, any sale or barter of the donated commodities will not displace or interfere with any sales of United States commodities that would otherwise be made to or within Honduras . The Recipient has submitted information to FAS to support this assertion.

D. The Recipient asserts that adequate transportation and storage facilities will be available in Honduras at the time of the arrival of the donated commodities, and any procured commodities obtained through regional procurement, to prevent the spoilage or waste of such commodities. The Recipient has submitted information to FAS to support this assertion.

E . The Recipient will comply with the Terms and Conditions Regarding the Acknowledgment of USDA Funding, the Use of the USDA Logo, and Communications to the Public, Attachment F, which is attached hereto and made a part of this agreement.

F. The Recipient will comply with the audit requirements in 7 CFR section 1599.19.

G. The Recipient will disclose to FAS all violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting this agreement. The Recipient must make this disclosure by sending an e-mail message to the Senior Director, IFAD, at PPDED@fas.usda.gov within 30 days after the date on which the Recipient becomes aware of such a violation.

H. During the agreement closeout process, the Recipient will submit a tax certification letter on company letterhead indicating that it has paid in full all taxes for its employees working in Honduras to implement this agreement. The Recipient will also submit the equipment disposition form required by FAS. Both the tax certification letter and equipment disposition form must be submitted no later than 120 days after the end date of the period of performance. In accordance with 7 CFR section 1599.14(i) and 2 CFR section 200.334, the Recipient must retain records related to this agreement for a period of three years from the date of submission to FAS of the final performance report.

I. As a condition of this cooperative agreement, the Recipient assures and certifies that it is in compliance, and will comply during the course of this agreement, with all applicable laws, regulations, and Federal Executive Orders. The Recipient will also comply with the FAS General Terms and Conditions for Grants and Cooperative Agreements, as applicable, found at General + Nat'l Policy T&Cs Update 12-19-2023.pdf (usda.gov); provided, however, that if such an award term or condition is inconsistent with a provision of this agreement or a provision of a statute or regulation applicable to this agreement, the order of precedence will be: first, the applicable statute or regulation; second, the provision of the agreement; and third, the award term or condition.

PART V

FINAL PROVISIONS

A. This agreement will enter into force upon the date of the last signature. The Federal award date for this agreement, for the purposes of 2 CFR part 200, will be the date that it is signed by the authorized representative of FAS.

B. The period of performance and the budget period of this agreement start on the date on which the agreement enters into force and end on 09/30/2031.

C. The Recipient may object to an action taken by FAS in response to a failure of the Recipient to comply with this agreement, as provided in 7 CFR section 1599.18, by submitting its objection in writing to the Senior Director, IFAD, within 30 days after the date of FAS's written notification to the Recipient of the action.

D. The Federal award may be terminated, in whole or part, as outlined in 2 CFR 200.340 and 7 CFR 1599.17, including:

(1) By FAS if the Recipient or subrecipient fails to comply with the terms and conditions of the Federal award;

(2) By FAS with the consent of the Recipient or subrecipient, in which case the two parties must agree upon the termination conditions. These conditions include the effective date and, in the case of partial termination, the portion to be terminated;

(3) By the Recipient or subrecipient upon sending FAS a written notification of the reasons for such termination, the effective date, and, in the case of partial termination, the portion to be terminated. However, if FAS determines that the remaining portion of the Federal award will not accomplish the purposes for which the Federal award was made, FAS may terminate the Federal award in its entirety;

(4) By FAS pursuant to the terms and conditions of the Federal award, including, to the extent authorized by law, if an award no longer effectuates the program goals or agency priorities;

(5) By FAS if the continuation of the assistance provided under the agreement is no longer necessary or desirable; or

(6) By FAS if storage facilities are inadequate to prevent spoilage or waste of the donated commodities, or distribution of the donated commodities will result in substantial disincentive to or interference with domestic production or marketing in the target country.

In witness whereof, the representatives of the parties, duly authorized for the purpose, have signed this agreement.

Honduras

3. PROJECT DESCRIPTION

Anticipated activity completion date: September 30, 2031

(a) Project Objectives

Partners of the Americas (POA) will, over a period of approximately six years, use the U.S. agricultural commodities, purchased from U.S. farmers, and any funds provided by FAS to implement a school feeding project in Honduras focused on achieving the following objectives:

- Increase student enrollment and attendance and reduce the incidence of hunger through the provision of school meals;

- Strengthen access to quality education and improve literacy outcomes for school-aged children by training teachers, administrators, and community members on pedagogy and quality instruction;

- Improve health and reduce health-related absenteeism among school-aged children by improving water and sanitation infrastructure and training students, teachers, parents, and community members on nutrition, food safety, and hygiene practices; and,

- Support the Government of Honduras and stakeholders to sustain benefits to children's education, enrollment, and attendance gained through quality school feeding and education programming by

leading capacity building workshops, coordinating stakeholder engagement, joint planning and implementation, and facilitating the development of financial strategies to expand their existing school feeding program.

(b) Project Implementation

As referenced in Part IV, Item II, Paragraph C, POA will provide additional details of each activity within the submitted Work Plan. In addition to providing further activity details, POA will also provide a Gantt chart illustrating scheduled activities, as well as defining the intended beneficiaries, geographic targeting, classification of intended procurements, including contracts and grants, and classification and responsibilities of any subrecipient(s).

Provide School Meals

Partners of the Americas (POA) will work with the Government of Honduras (GOH) to provide nutritious school meals that reduce short-term hunger, increase enrollment and attendance, and improve learning outcomes. Using U.S. provided commodities consisting of fortified rice, beans, corn, vegetable oil, and Corn Soy Blend Plus (CSB+), POA will supplement the national program to guarantee 180 feeding days for more than 96,000 students in preschool through 9th grade in 1,953 schools in La Paz and Intibucá. Rations will cover approximately 33% of daily caloric needs, about one-third of protein needs, and essential micronutrients through meals prepared by trained parent volunteers under standardized recipes and food safety protocols.

To strengthen dietary diversity and provide students with complete, nutritious meals, POA will procure local/regional eggs, fruits, and vegetables.
School meals will consist of **Ration 1**, provided two days per school week, and **Ration 2**, provided three days per school week. Rations will vary between grade levels, with older students receiving larger portions.

For **Preschool–Grade 3 (ages 3-8)**, Ration 1 will include 115 grams (g) of U.S.-provided CSB+ supplemented with one 55g egg procured through LRP. Ration 2 will consist of 30g of fortified rice, 50g of red beans, 30g of corn, 10g of fortified oil, and one 55g egg procured through LRP. Ration 1 will also include 30g of seasonally available local fruits and vegetables, such as carrots, cabbage, chayote (pataste), and cucumbers.

For **Grades 4–6 (ages 9-11)**, Ration 1 will include 150g of U.S.-provided CSB+ and one 55g egg procured through LRP. Ration 2 will consist of 50g of fortified rice, 60g of red beans, 45g of corn, 15g of fortified oil, and one 55g egg procured through LRP. Ration 1 will also include 40g of seasonally available local fruits and vegetables, such as carrots, cabbage, chayote (pataste), and cucumbers.

For **Grades 7–9 (ages 12-14)**, Ration 1 will include 200g of U.S.-provided CSB+ and one 55g egg procured through LRP. Ration 2 will consist of 70g of fortified rice, 90g of red beans, 45g of corn, 20g of fortified oil, and one 55g egg procured through LRP. Ration 1 will also include 50g of seasonally available local fruits and vegetables, such as carrots, cabbage, chayote (pataste), and cucumbers.

POA will provide parent volunteers with monthly take-home rations from March to August from Year 1 through Year 3, which will consist of 450 grams of U.S.-provided fortified rice, 450 grams of CSB+, and 225 grams of small red beans. Take-home rations will be provided to volunteer caregivers who support meal preparation, distribution, or related school feeding tasks. In addition, to promote early childhood enrollment, PoA will also provide monthly take-home rations from March to August (six total monthly distributions) for preschool students consisting of 0.9 kg of Corn Soy Blend Plus (CSB+), 0.9 kg of fortified rice, and 0.45 kg of small red beans. Children will need to attend 70% of school days in a month to receive the take-home ration.

School meal coverage will phase out as the Government of Honduras assumes responsibility. POA will manage supplementation with USDA commodities in Years 1–6, providing technical assistance to the government throughout the program to ensure quality graduation.

In the event of future unforeseen school closures or leftover commodities, POA will seek FAS approval via email to provide ad-hoc THRs to McGovern-Dole target beneficiaries if deemed necessary to avoid commodity damage or loss. These unanticipated THR distribution requests must be approved by FAS prior to distribution and include a justification and note amounts of each commodity to be distributed. All THR distributions will be reported in the next semi-annual performance report following the distribution.

Distribution: School supplies and materials

POA will improve student learning by distributing existing grade-specific books, teacher guides, and school supplies to more than 80,000 students and nearly 3,000 teachers across 1,953 schools in La Paz and Intibucá. POA will provide grade-specific learning materials for grades 1–9, with priority given to grades 1–3. Materials will align with Honduras' national literacy benchmarks and include existing literacy core activity materials like books, structured teacher guides, and remedial materials for struggling learners.

POA will coordinate closely with current literacy stakeholders like the Ministry of Education (MOE), municipal governments, and teacher training institutions to ensure relevance, avoid duplication with other education actors, and build on prior McGovern-Dole projects. POA will assess prior efforts to identify promising solutions and participate in the literacy stakeholder roundtables and coordination forums. POA will track the supplies that will be distributed through project records, with school-level monitoring to promote classroom use.

Over the life of the project, POA will gradually transition procurement and distribution of materials responsibilities to the MOE, municipalities, and private sector partners, ensuring long-term sustainability and graduation.

Training: Teachers and Administrators

POA will strengthen the capacity of nearly 3,000 teachers and more than 300 school administrators in approximately 1,052 target schools to deliver effective literacy instruction and improve school management. Training topics will emphasize practical, classroom-ready strategies such as targeted instruction, remedial support, structured use of learning materials, and integration of social-emotional learning.

POA will implement a cascade training model with master trainers, teacher coaches, and administrators, providing professional development to support school cohorts relying on existing Guia's GANE (Guía de Aprendizaje para la Nivelación de Español) manuals created by the Ministry of Education (MOE). Teacher training will occur once at the beginning of the school year, with two refresher trainings and follow-up sessions taking place in the same school year. Teacher, coach, and administrator training will occur once each school year, with refresher and follow-up training the next school year. POA will work with the Ministry of Education's National Professional Development unit to support the development and enhancement of the teaching curriculum. All training will be embedded into this unit to ensure the sustainability and scalability of McGovern-Dole interventions. POA will train Administrators to be equipped to oversee instruction, use assessment data to guide decision-making, and support teacher development. To achieve sustainability, POA will use existing teacher training platforms and integrate training and teaching materials into different Ministry of Education and Non-Government Organization (NGO) digital platforms, such as the Ministry's Educatrachos-Ibertel teacher training platform and the NGO FICOHSA's "Portal Educativo" Teacher Training Platform, where they will be hosted and accessible to teachers nationwide. Training content and supervisory practices will be embedded in government structures to ensure sustainability.

Enrollment campaigns

POA will expand efforts to increase enrollment and reduce dropout in approximately 410 schools across La Paz and Intibucá. POA will expand the Early Warning System (Sistema de Alerta Temprana, SART) to identify and support students at risk of dropping out. POA will supplement ongoing Government of Honduras efforts targeting schools not currently covered by introducing the Early Warning System. POA will provide training to teachers, administrators, and PTA members on the use of the SART model in key areas such as monitoring attendance, referrals, and dropout prevention interventions.

POA will promote flexible education pathways for out-of-school youth, implement social and behavior change campaigns to encourage enrollment and retention, and improve pre-primary access through training and support for volunteer educators. POA will support enrollment campaign efforts, with preschools and lower secondary, in approximately 410 high dropout schools. POA will work with schools, Parent-Teacher Associations, community leaders, and municipal and national government authorities to implement these interventions. POA will embed practices into Ministry of Education systems and community structures, which will strengthen local ownership and ensure sustainability.

Building/Rehabilitation: Wells and water stations/systems

POA will assess needs at target schools and support the building, provision, or rehabilitation of equipment or food preparation, storage, and WASH infrastructure resources in approximately 500 schools. Infrastructure improvements, rehabilitation, and maintenance will be limited to water systems. Based on these assessments, POA will provide or rehabilitate essential food preparation and storage items (e.g., stoves, pots, storage containers, shelves) and repair or expand WASH facilities, with a particular focus on school water systems for cooking and handwashing. Where infrastructure was constructed under previous projects, POA will address maintenance and repair needs to keep

facilities operational throughout the project cycle. POA will procure equipment and materials, with communities and the local private sector providing in-kind labor to construct wells and water stations/systems.

POA will provide training and coordinate local stakeholders (e.g., municipalities, PTAs, and the private sector) to sustain infrastructure investments and maintenance after the project ends. To ensure functionality and sustainability, POA will engage parents and community volunteers to support small-scale maintenance, while municipal governments will co-finance larger repairs. POA will also provide refresher training for school staff and parent associations on equipment use, maintenance routines, and sanitation. POA will create maintenance protocols (e.g., cleaning schedules and inspection checklists) that communities and local water boards (juntas de agua) will be trained in for long-term management.

Training: Good health and nutrition practices

POA will strengthen community knowledge and practices in nutrition, food safety, and hygiene to improve student health and reduce illness-related absenteeism. POA will implement social behavior change (SBC) campaigns at the school-based level, promoting handwashing, hygienic food preparation, healthy eating, and illness prevention, as well as nutrition education for young children in grades K-3, educators, and caregivers. POA will provide training in 197 schools and use interactive approaches and practical demonstrations to reinforce positive behaviors at home, in schools, and in communities. POA will collaborate with the Government of Honduras to integrate nutrition, hygiene, and food safety content into annual national campaigns and the teacher professional development framework.

These efforts will be closely coordinated with water, sanitation, and hygiene (WASH) improvements and school feeding activities to ensure consistent messaging and application. POA will train Parent-Teacher Associations, school health clubs, and community leaders to sustain messaging, while the Ministry of Education and local partners will integrate practices into their systems for long-term adoption.

Training: Commodity management

POA will update existing food safety and commodity management training packets and create a School Food Handler Certification program. POA will conduct an assessment to support the institutionalization of a certification within the Government of Honduras. POA will modernize and expand a modular training course aligned with USDA food safety domains and National School Feeding Program (PNAE) standards. The certification, targeting Parent-Teacher Association (PTA) and School Feeding Committee (SFC) members, will build on the facilitator manual developed under the previous McGovern-Dole program. Content will include hygiene, safe storage, meal preparation, temperature control, and allergen management, all adapted to rural school conditions to ensure practical application.

POA will train 10,500 facilitators, including university students, municipal staff, and parent leaders, to deliver the certification at the school-network level. Food handlers will be certified, ensuring safe and consistent preparation of U.S. provided commodities and locally procured foods. POA will provide refresher training sessions, monitoring tools, and formal recognition for certified volunteers

to support long-term adoption of improved commodity management practices after USDA support ends. By Year 6, the certification program will be institutionalized within the national Government of Honduras entities and frameworks, ensuring sustainability.

Capacity Building: Local and Regional Level

POA will strengthen the capacity of municipal government, local producers, PTAs, and private sector stakeholders and other relevant actors. POA will host 4 annual workshops with multi-sector stakeholders (e.g., municipal governments, PTAs, producer groups, and private sector partners) that will identify and scale best practices in decentralized school feeding. POA will lead sessions at the workshops on school feeding budgeting, procurement, coordination, quality standards, nutrition requirements, and develop joint action plans to improve the sustainability and graduation of school feeding systems. POA will also establish and facilitate 2 stakeholder coordination platforms that meet semi-annually to align on school feeding priorities, coordinate local procurement of commodities, and strengthen overall management and accountability of school feeding programs. POA will integrate nutrition education into the national "Escuela para Padres" platform by adapting USDA-supported recipe manuals into practical modules for parents and caregivers, ensuring broad reach and long-term sustainability.

POA will support the Ministry of Education to digitize school meal monitoring in their existing system to track food deliveries, stocks, attendance, and meals served at the school level. POA will support the GOH transition from paper-based to a digital format via the development of a platform to be used at the school and community level. This system will improve transparency and accountability, be institutionalized into the MOE, and be scaled nationally over time.

POA will launch a volunteer recognition program to motivate and sustain community participation in school feeding. The program will highlight parent and community volunteers at local and regional levels through certificates, events, and public recognition, with costs shared by municipal governments and private sector partners. To ensure sustainability, POA will integrate the program into long-term school and PTA structures by establishing annual recognition events organized by PTAs, incorporating recognition criteria into PTA by-laws, and training school administrators and municipal officials to co-lead activities beyond the life of the project. Building on the previous McGovern-Dole project, recognition will also include take-home rations for volunteer caregivers who support meal preparation, distribution, or related school feeding tasks.

Capacity Building: National Level

POA will strengthen national systems to ensure the long-term sustainability of Honduras's school feeding program. POA will conduct cost analyses of different school feeding models to inform government planning and budgeting, including scenarios for decentralized procurement and integration of fresh foods. POA will share findings with key stakeholders such as relevant ministries, municipal government, private sector to support increased government investment in school feeding through graduation-focused workshops. POA will hold two graduation-focused workshops per year. The graduation-focused workshops will cover topics that strengthen national systems for the long-term sustainability of Honduras's school feeding program. Sessions will include cost analyses of different school feeding models to inform government planning and budgeting, including scenarios for decentralized procurement and integration of fresh foods. Findings from these analyses will be

shared and discussed with key stakeholders—such as relevant ministries, municipal governments, and private sector partners—to support increased investment in school feeding. The workshops will also provide a platform to strengthen planning, resolve implementation challenges, and monitor progress toward school feeding graduation.

In partnership with the Association of Honduran Municipalities (AMHON), POA will coordinate Government of Honduras agencies to identify and develop a decentralization model for school feeding via mancomunidades. Approximately 70 municipal officials will be trained in planning, budgeting, procurement, and oversight, creating a roadmap for phased local management of school feeding services.

To consolidate learning, POA will document best practices from USDA-supported school feeding in Honduras, producing toolkits, planning templates, and policy briefs that inform national strategies and guide future replication. POA will convene presentations with central-level stakeholders to advance policy dialogue and graduation planning, with timing and frequency determined in consultation with the Government of Honduras. Presentations will highlight best practices in decentralized school feeding and share lessons learned from USDA-supported programs that can be applied to strengthen the PNAE. These efforts will contribute to government adoption of sustainable policies and financing mechanisms that support graduation from donor reliance.

Develop Public-Private Partnerships to Support School Feeding Sustainability

POA will coordinate public and private investment to create an effective and sustainable school feeding model in Honduras. At the national level, POA will convene and coordinate with government, corporate, and philanthropic stakeholders to co-design a co-investment mechanism that blends resources for long-term financing of McGovern-Dole statutory objectives of improved literacy and nutrition.

Locally, POA will work with AMHON to engage municipalities and mancomunidades to identify partnership opportunities in food delivery, storage, and nutrition-sensitive supply chains. POA will develop model partnership agreements and recognition strategies to encourage business participation. POA will provide technical assistance to municipal staff and private partners on structuring and managing partnerships.

POA will also activate corporate social responsibility platforms to connect businesses with school feeding needs, such as cooking equipment, hygiene kits, and learning materials. In addition, POA will engage the Honduran diaspora to channel contributions directly to school feeding priorities, diversifying financing sources and promoting community ownership. POA will establish partnerships that contribute significant co-investment and reduce reliance on external aid.

Expand Use of US Commodities in Honduras School Feeding Program

POA will strengthen the nutritional value and sustainability of Honduras's school feeding program by supporting the integration of U.S. commodities, particularly Corn Soy Blend Plus (CSB+), into national frameworks. POA will pilot models in selected schools that are not in La Paz and Intibucá departments to demonstrate how CSB+ can complement local rations, leading to improvements in literacy and nutrition. POA will select pilot model schools outside of La Paz and Intibucá by

conducting an assessment on schools' likelihood to adopt CSB+, existing school feeding operations, capacity to integrate new commodities, accessibility for distribution and monitoring (i.e., near project target regions), and local PTA and community commitment to co-manage new school feeding activities. POA will select approximately 85 schools for the pilot. POA will determine the grade (i.e., pre-primary, primary, lower secondary) and location of the pilot schools in coordination with USDA, the Ministry of Education, and local communities.

In the 85 pilot schools, POA will train food handlers and parent volunteers in CSB+ preparation, food safety, and menu adaptation, ensuring safe and appealing meals for students. POA will also support the design of sustainable procurement and logistics systems for U.S. commodities, aligned with government standards and adapted to rural school contexts. POA will conduct a dedicated study to assess nutritional and educational impacts, generating evidence to inform national policy and long-term procurement decisions.

4. PROGRAM DESCRIPTION

(a) Method of Choosing Beneficiaries

POA will carry out activities under this agreement in the Departments of La Paz and Intibucá in 1,953 schools in 36 municipalities that provide pre-primary, primary, and lower secondary education. POA will also implement the pilot activity on expanding CSB+ use in Honduran schools in 85 pilot schools outside of La Paz and Intibucá. These 85 pilot schools are in addition to the 1,953 schools in Laz Paz and Intibucá. Over the life of the project, POA will provide daily school meals to approximately 96,000 school-aged children, and benefit approximately 105,607 direct beneficiaries.

(b) Program Administration

POA will dedicate POA will dedicate 48 in-country staff personnel and five headquarters staff personnel to implement this agreement. in-country staff personnel and headquarters staff personnel to implement this agreement.

(c) Expected Contribution

POA will provide in-kind cost-share valued at approximately $406,980. Cost share will be used for municipal warehouses, workshop venues, and community contributions for programmatic activities. The cost share includes:

- Government of Honduras/municipal entities will provide $162,000 in warehouse fees to store U.S.-provided commodities;
- Local communities will provide $25,000 in transportation of U.S. provided commodities;
- Local communities and private sector partners will provide $182,500 in labor and equipment to construct and rehabilitate facilities necessary for food preparation and handwashing;
- Government of Honduras entities will provide $11,500 for events and management of Annual Volunteer Recognition Events;
- Government of Honduras entities will provide $21,000 in venue and audio/visual equipment for validation and CSR Activation events; and

• Government of Honduras entities will provide $4,980 in venue space for a U.S. commodity analysis event.

(d) Subrecipients

POA may select one or more subrecipients from among local and international organizations. To be eligible for selection as a subrecipient, an organization must have:

- Experience working in the targeted region;
- Experience working with POA ;
- Experience in school feeding, education, or nutrition; and
- Experience in managing financial matters.

POA will enter into an agreement with each subrecipient that will set forth the responsibilities of both parties. POA will consult FAS prior to the selection of any subrecipient and provide a copy to FAS of each signed agreement with a subrecipient.

(e) Governmental or Non-governmental Entities

POA will work directly with the following entities:

Government Entities:
• Honduras Ministry of Education (MOE)
• Honduras Ministry of Social Development (SEDESOL)
• Honduras National School Feeding Program (PNAE)
• Honduras Ministry of Agriculture (SAG)
• Honduras Ministry of Finance (SEFIN)
• Honduras Municipal governments and local education directorates in Intibucá and La Paz

• Honduras Association of Municipalities of Honduras (AMHON)

Non-Governmental, Academic, and Private Sector Entities:
• Fundación para la Educación Ricardo Ernesto Maduro Andreu (FEREMA)
• Academic institutions such as Zamorano University or comparable accredited institutions.
• Teacher training institutions, including the Universidad Pedagógica Nacional Francisco Morazán
• Parent-Teacher Associations (PTAs) and School Feeding Committees (SFCs)
• Civil society organizations and community leaders

• National Cooperation Network for Education

5. USE OF FUNDS OR GOODS AND SERVICES GENERATED

N/A

6. HANDLING OF DONATED COMMODITIES

(a) Internal Transportation

Partners of the Americas will manage internal transportation of U.S. provided commodities from the Port of Puerto Cortés to regional warehouses and then to schools in La Paz and Intibucá.

Freight Forwarder & Bill of Lading
U.S. provided commodities will be shipped using through-bills-of-lading, in required containerized cargo, from the U.S. port to POA's main warehouse in Siguatepeque, Honduras. Ocean freight will be arranged and coordinated with USDA by POA through its contracted USDA-approved freight forwarder, BKA Logistics. The freight forwarder will issue a bill of lading, which will serve as the official record of shipment and receipt. This document will be used to track the movement of commodities from the point of origin in the U.S. to the Port of Puerto Cortés.

Port Operations – Puerto Cortés
Puerto Cortés, Central America's largest deepwater port, has a container handling capacity of 1.4 million Twenty-foot Equivalent Units (TEUs) per year. A recent expansion has further increased the terminal's annual throughput capacity by 50 percent, strengthening its ability to accommodate large-scale shipments. The port can handle up to 10 vessels simultaneously along more than 4,000 feet of docking space and includes a secure vehicle yard for container staging. Operating 24 hours a day, Puerto Cortés is equipped with advanced container facilities for dry bulk, liquid bulk, and refrigerated storage. Commodities arriving under the McGovern-Dole program will be unloaded directly into bonded or non-bonded warehouses managed by vetted providers such as Crowley Logistics, HL Worldwide, and One Union Solutions, each offering integrated customs services and 24-hour security.

Customs Clearance & Receiving
Upon arrival at Puerto Cortés, commodities will be received by a contracted customs agent, accompanied by an independent cargo surveyor and officials from International Regional Organization for Plant and Animal Health (OIRSA), the Honduran tax authority, and the port operator. The port is equipped with secured inspection cages to isolate cargo during checks, as well as CCTV surveillance. The customs agent and surveyor will be responsible for completing clearance formalities and coordinating all in-country transport under door-to-door delivery terms, ensuring the security of commodities throughout the process.

Transfer to Warehouses
After clearance, containerized commodities will be transferred via commercial carriers to the central warehouse in Siguatepeque, chosen for its location on the CA-5 highway and accessibility to La Paz and Intibucá. Each truck will travel under sealed loads with waybills issued to confirm delivery. The warehouse has over 1,200 MT of storage capacity and is fully equipped to ensure proper handling and management of commodities. Security measures include a surveillance system and round-the-clock guard services.

Commodity Dispatch to Schools
Commodities will be transported quarterly to school network distribution hubs; these are the leading schools within government structured school networks. POA will issue annual contract tenders with an in-country transportation service to move U.S. commodities from the main warehouse to school network distribution hubs. POA will organize for volunteers and school actors support last-mile

delivery of commodities from network hubs to schools.

Safe Transport to Schools
POA will train staff, contracted third party vendors, and community members on key protocols and measures to ensure safe transport of U.S. commodities to schools. This includes international and domestic food safety standards around sanitation, cleanliness, and proper handling. Training and protocols will be implemented around safe disposal of US commodities in the case of accidents or spoilage in accordance with USDA McGovern-Dole regulations.

Proper Storage of Commodities at School Level
POA will train staff, school actors, and community members on key protocols and measures to ensure safe handling and storage of U.S. commodities at schools. This includes ventilation storage requirement, cleanliness, and proper handling. Training and protocols will be implemented around safe disposal of US commodities in the case of accidents or spoilage in accordance with USDA McGovern-Dole regulations.

(b) Reprocessing or Repackaging

U.S. provided commodities will be handled and preserved in their original packages throughout the supply chain, to the extent possible. In cases of partial damage, products will be reconditioned using a reserve of high-density 24x37 inch, 50kg bags, while 12x18 inch, 3kg bags will be used for take-home rations. All commodities will be labeled in compliance with Central American Technical Regulations and USDA requirements prior to distribution. For locally procured commodities, food safety and packaging standards will be clearly defined in tenders and contracts, with compliance and quality verification required prior to acceptance and storage. Take-home rations will be repackaged using safe and durable packing materials appropriate for food commodities.

(c) Procured Commodity Details?

When making a local or regional procurement of qualified commodities, Partners of the Americas, Inc will ensure that all procured commodities comply with the following nutritional, quality, labeling, and food safety standards in Honduras for each commodity:

Eggs

POA will procure whole eggs locally to complement U.S. provided commodities. All procured eggs will comply with Honduran food safety and quality standards established by the National Plant, Animal Health, and Food Safety Service (SENASA) and the Sanitary Regulation Agency (ARSA), including certification of origin, sanitary permits, and Central American Technical Regulations (RTCA) labeling requirements. Suppliers will be required to demonstrate adherence to biosecurity and food safety practices in production, handling, and transport. Where national standards are not codified, POA will ensure compliance with the Codex Alimentarius Recommended International Code of Practice: General Principles of Food Hygiene CAC/RCP 1-1969 Rev 4-2003, including the Hazard Analysis and Critical Control Point (HACCP) System and Guidelines.

Fruits and Vegetables

POA will procure fresh fruits and vegetables locally to complement U.S. provided commodities. All procured produce will comply with Honduran food safety and quality standards established by the National Plant, Animal Health, and Food Safety Service (SENASA) and the Sanitary Regulation Agency (ARSA), including sanitary permits, certification of origin, and Central American Technical Regulations (RTCA) labeling requirements. Suppliers will be required to demonstrate compliance with national standards for safe production, handling, storage, and transport, including proper washing, packaging, and traceability. Where national standards are not codified or are incomplete, POA will ensure compliance with the Codex Alimentarius Recommended International Code of Practice: General Principles of Food Hygiene (CAC/RCP 1-1969 Rev 4-2003), including the Hazard Analysis and Critical Control Point (HACCP) system and guidelines.

If a commodity to be procured is a grain, legume, or pulse, each such commodity must meet the food safety standards of Honduras for such commodity; however, if Honduras does not have food safety standards for a grain, legume, or pulse to be procured, then the Recipient must ensure that such commodity meets the Codex Alimentarius Recommended International Code of Practice: General Principles of Food Hygiene CAC/RCP 1-1969 Rev 4-2003, including Annex Hazard Analysis and Critical Control Point (HACCP) System and Guidelines.

If a commodity to be procured is a food product other than a grain, legume or pulse, such as a processed food, fortified blended food, or enriched food, each such commodity must comply, in terms of raw materials, composition, or manufacture, with the Codex Alimentarius Recommended International Code of Practice: General Principles of Food Hygiene CAC/RCP 1-1969 Rev 4-2003 including Annex Hazard Analysis and Critical Control Point (HACCP) System and Guidelines.

If a commodity to be procured is a cereal, groundnut, or tree nut, or a food product derived from or containing cereals, groundnuts, or tree nuts, each such commodity must be tested and have a total aflatoxin level that does not exceed 20 parts per billion.

ATTACHMENT B 1
COMMODITY SPECIFICATIONS
YELLOW CORN

Whole corn shall be of the class yellow corn, U.S. Grade No.2 or better, 14.5 percent or less moisture. With prior approval by the Government, U.S. Grade No.3 yellow corn may be accepted, subject to discount, if the only grade determining factor is broken corn and foreign material.

ITEM	MINIMUM	MAXIMUM
BCFM 1/	---	3.0%
Damaged Kernels 2/	---	5.0%
Test Weight	54 lbs./bu.	

1/ Broken corn and foreign material (BCFM)
2/ Includes heat damaged kernels (0.2% max)

PACKAGING

Bulk shipment or bagged in 50-kilogram woven polypropylene fabric and circular-woven style bags.

ATTACHMENT B 2
COMMODITY SPECIFICATIONS
VEGETABLE OIL

The vegetable oil shall be clear and brilliant when held at 70 degrees to 85 degrees Fahrenheit. The vegetable oil shall be free from sediment, such as metal, wood, dirt, glass, paint, insects, insect parts, or any other foreign material. The vegetable oil shall have a bland odor and flavor and shall be free from beany, rancid, painty, musty, metallic, fishy, putrid, or any other undesirable odor and/or flavor. The vegetable oil shall have a light viscosity and shall not have a heavy oily mouth feel. The vegetable oil shall be fortified with vitamin A (retinol palmitate) at the rate of 60-75 IU/g.

Analytical Requirements

Bleached, Deodorized, Refined and Winterized (Style A)

	Requirements	
Item	**Minimum**	**Maximum**
Color (Lovibond) Scale	---	2.0 red20.0 yellow
Moisture and Volatile Matter(percent by weight)	---	0.06
Insoluble Impurities	---	NONE
Free Fatty Acids as oleic, (percent) by weight, 1/ 2/	---	0.05
Peroxide Value (PV) (meg/kg), 1/	---	1.0
Stability, Oil Stability Index (OSI)1/	5 hours	---

1/ Determination shall be made within seven days after packaging.
2/ Maximum of 0.06 percent free fatty acid will be acceptable if propyl gallate is added as an antioxidant.

PACKAGING

4-liter steel cans, 4-liter plastic jugs, 20-liter steel pails, or 208-liter steel drums

ATTACHMENT B 3
COMMODITY SPECIFICATIONS
PEAS, BEANS AND LENTILS

Whole dry peas, split peas, and lentils shall meet the specifications as defined in the "U.S. Standards for Whole Dry Peas, Split Peas, and Lentils" in effect at the time the applicable invitation for offers is issued. Whole dry peas shall grade U.S. No. 2 or better, except U.S. No. 3 or better because of cracked seed coats. The grade certificates issued by FGIS for the whole dry peas containing up to 9 percent for cracked seed coats will show the grade number U.S. No. 3 and must include the following statement:

"This lot meets the requirements applicable for U.S. No. 2 or better whole dry peas except for cracked seed coat."

Split peas shall grade U.S. No. 2 or better. Dry edible beans shall grade U.S. No. 2 or better, except marrow, great northern, flat small white, small white, white kidney, light red kidney, dark red kidney, small red, pink, black turtle soup, and miscellaneous beans, may include up to 5 percent total defects due to surface dirt which is readily removed during processing, and will meet the specifications for the class(es) of beans listed in the "U.S. Standards for Beans."

Pea beans shall grade U.S. No. 2 or better but will contain no more than 5 percent of beans with surface dirt and grime and total defects. Lentils shall grade U.S. No. 3 or better.

The grade certificates issued by FGIS for beans, except for pea beans, containing between 4 and 5 percent total defects due to surface dirt will show the grade U.S. No. 3, and shall include the following statement:

"This lot meets the requirements applicable for U.S. No. 2 or better whole dry peas except for cracked seed coat."

The grade certificate issued by FGIS for pea beans shall include the following statement:

"This lot contains (percent) of beans with surface dirt and grime and total defects. Beans with surface dirt and grime are not considered damage in pea beans and are not included in the "Total Defects results."

Packaging

2-pound polyethylene bags, 4-pound polyethylene bags, or 50-kilogram woven polypropylene bags

ATTACHMENT B 4
COMMODITY SPECIFICATION
CORN SOY BLEND PLUS

CSB Plus is prepared from heat treated maize and soya beans, vitamins and minerals. If CSB Plus is consumed as a porridge or gruel, it should be prepared by mixing an appropriate proportion of flour and clean water (i.e. 40g of CSB Plus with 250 g of water) followed by a cooking time at simmering point from five to ten minutes.

Product Specifications:

Item	Requirement	
	Minimum	Maximum
Moisture, %	---	10.0
Protein (Nx6.25), %	14	---
Fat, %	6.0	---
Crude Fiber, %	---	5.0
Energy	380 kcal	---

Micronutrient

CSB Plus must be fortified with a micronutrient supplement containing the following micronutrient levels per 100 grams ---

Vitamin/Mineral	**Required Level***	**Chemical Forms**
Vitamin A RE**	3460IU	Dry Vitamin A Palmitate 250 Cold Water Dispersible Stabilized
Vitamin D3	441.61U	Dry Vitamin D3 100 Water Dispersible Stabilized
Vitamin E TE	8.3 mg	Dry Vitamin E Acetate 50% Water Dispersible
Vitamin K1	30 µg	Dry Vitamin K1 5% Water Dispersible
Vitamin B1	0.2 mg	Thiamine mononitrate
Vitamin B2	1.4 mg	Vitamin B2 fine powder
Vitamin B6	1 mg	Pyridoxine hydrochloride
Vitamin C	90 mg	Ascorbic acid
Pantothenic acid	1.6 mg	Calcium D-Pantothenate
Folic acid (*as Dietray Folate Equivalent)*	110 µg	Folic Acid***
Niacin	8 mg	Niacinamide
Vitamin B12	2 µg	Vitamin B12 0.1% or 1% Spray Dried
Biotin	8.2 µg	Biotin 1%
Iodine	40 µg	Potassium Iodide***
Iron (total)**	6.5 mg	
Iron (a)	4 mg	Ferrous fumarate fine powder
Iron (b)	2.5 mg	Iron-sodium EDTA

Zinc	5 mg	Zinc Sulphate Monohydrate
Carrier		Corn maltodextrin
Other minerals		
Potassium	140 mg	Potassium Chloride with 0.5% silicon dioxide as anticaking agent, complaint with food chemical codex, min 90%<425 micron and min 60%<250 micron
Calcium	**452 mg**	
Phosphorous	**290 mg**	Tri-Calcium Phosphate
Item	Minimum	Maximum
Vitamin A (including intrinsic and premix contributions)	2930IU	4329IU
Iron (including intrinsic iron)	6.5 mg/100g	13.5mg/100g

*Premix variation (except for vitamin A and iron): The permitted variations in premix content is -10 to +15% for other added vitamins and minerals for acceptance.
**Vitamin A and Iron ranges
*** Adequate dilution mist be used in order to guarantee premix homogeneity

Microorganisms	Levels
Mesophyllic aerobic bacteria	50,000 cfu per g (maximum)
Coliforms	100 cfu per g (maximum)
Salmonella	0 cfu per 25g
E. Coli	<10 cfu per g
Staphylococcus	<10 cfu per g
Bacillus cereus	50 cfu per g (maximum)
Yeasts and molds	1,000 cfu per g (maximum)

Dispersibility - shall be essentially free from lumping or balling when mixed with water of ambient temperature.

Packaging
25-kilogram multi wall paper bags

Storing
CSB Plus must be stored under dry, ventilated and hygienic conditions.

ATTACHMENT B 5
COMMODITY SPECIFICATION
FORTIFIED MILLED RICE (U.S. #2 or Better)

The fortified milled rice shall be long or medium grain milled rice grading U.S. No. 2, U.S. No. 3, or U.S. No. 5, or better.

The milled rice shall meet the specifications of the class and grade offered as defined in the "Official United States Standards for Milled Rice," in effect at the time the applicable solicitation for offers is issued.

When fortified milled rice is requested, the rice shall be fortified with rice-premix using technologies which will result in a final product that has been demonstrated to be effective, from the standpoints of end food preparation and utilization. Final fortified rice blend shall come pre-blended with traditional rice, with no modifications to traditional rice preparation and cooking required.

Target Levels of Micronutrients and Suggested Chemical Forms (mg/110g).

Micronutrient	**Mg/100 grams**	**Recommended Chemical Form**
Vitamin A	0.11	Micro-encapsulated vitamin A Palmitate
Vitamin B1	0.47	Thiamine Mononitrate
Vitamin B3	5.60	Niacinamide
Vitamin B6	0.60	Pyridoxine Hydrochloride
Folic Acid	0.15	Folic Acid
Vitamin B12	0.0011	Vitamin B12 0.1% WS
Iron	4.80	Micronized Ferric Pyrophosphate (<=3microns), or other iron forms if same or better bioavailability can be shown
Zinc	3.50	Zinc oxide
Fortification Ratio	1:99 - 1:199	The dilution factor should be adjusted to optimum payload, which would allow best sensorial characteristics and fortificant homogenous distribution

FUMIGATION
Not more than ten (10) days prior to packaging, the milled rice shall be fumigated in a quantity and manner which will affect a kill in all stages of weevil or other insect infestation.

PACKAGING
50-kilogram woven polypropylene bags.

Attachment F

Terms and Conditions Regarding the Acknowledgment of USDA Funding, the Use of the USDA Logo, and Communications to the Public
McGovern-Dole International Food for Education and Child Nutrition Program

I. **General Requirements**

The Recipient will comply with the requirements in 7 CFR section 1599.9(d) – (f) and with these terms and conditions in implementing a project under this agreement.

II. **Acknowledgment of USDA Funding**

A. The Recipient will notify beneficiaries and officials in the target country that the U.S. Department of Agriculture (USDA) provided funds for the activities under this agreement. The Recipient will publish notifications in local newspapers to highlight its activities under this agreement and identify USDA and the McGovern-Dole Program as the funding source of these activities. The Recipient will recognize USDA and the McGovern-Dole Program as the source of funding in all printed materials produced with USDA resources under this agreement.

B. The Recipient will prominently display signs that inform beneficiaries that funding for the project was provided by USDA and the McGovern-Dole Program at all USDA-supported activity implementation sites and events unless a waiver in accordance with 7 CFR section 1599.9(g) or (h) is applicable. These sites and events include, but are not limited to, commodity distribution sites, schools, demonstration plots, farms, and construction or rehabilitation activities.

C. The Recipient will comply with 2 CFR section 415.2, Acknowledgement of USDA Support on Publications and Audiovisuals.

III. **Use of the USDA Logo**

A. The Recipient will use the USDA logo in all communications to the public, promotional materials, vehicles, and structures that are produced, purchased, or constructed using funds provided or sale proceeds realized under the McGovern-Dole Program. This will include, but not be limited to, publications, posters, websites, signs, presentations, t-shirts, aprons, hats, instructional materials, handwashing stations, latrines, hygiene rooms, water tanks, and demonstration plots.

B. The Recipient will use the USDA logo in accordance with the 2013 USDA Visual Standards Guide and the official USDA Style Guide website.

C. The Recipient will place the USDA logo and the text "United States Department of Agriculture – McGovern-Dole International Food for Education and Child Nutrition Program" or "United States Department of Agriculture – McGovern-Dole International Food for Education Program," as preferred, in the upper left corner of communications material or other marked item, unless otherwise approved by FAS. The Recipient may also add the American flag. The Recipient will

not use project-specific logos.

D. The Recipient will not use the USDA logo on administrative materials such as stationery and business cards.

E. The Recipient may use the USDA logo in conjunction with a symbol of the target country, another donor, or a nongovernmental organization that is involved in the project, subject to the following conditions:
   - The USDA logo with the text "United States Department of Agriculture – McGovern-Dole International Food for Education and Child Nutrition Program" or "United States Department of Agriculture – McGovern-Dole Food for Education Program," as preferred, will be placed prominently on the upper left corner of the item being marked.
   - The other symbol(s) will be placed to the right of the USDA logo, provided that, with advance approval by FAS, the symbol of the target country may be placed to the left of the USDA logo in a situation where such placement would be advantageous to the success of the project.
   - The placement of the USDA logo will be at least as favorable, in terms of size and prominence, as the placement of the other symbol(s).

F. The Recipient may choose not to place the USDA logo on, or otherwise mark, target country government-owned products if marking would undercut host-country "ownership" of policies, studies, reports, publications, or other communications better positioned as "by" or "from" a target country ministry or government official. In such cases, the Recipient will acknowledge USDA, as appropriate, within document text or verbally at meetings and events.

IV. **Communications to the Public**

A. Project Naming Criteria

When naming the project to be implemented under this agreement, the Recipient will:
- Begin with "U.S. Department of Agriculture" followed by the program name (e.g., U.S. Department of Agriculture McGovern-Dole International Food for Education and Child Nutrition Program) and will not use "MGD."
- Reference the country or region where the project is focused. If the project is global in nature, either omit the country or region, or include the word "global" instead.
- Be clear, concise, simple, and descriptive.
- Not use jargon or acronyms.
- Not reference the Recipient's internal organizational structures (e.g., "Recipient's School Meals Activity").

B. Project Communication Plan

The Recipient will submit a Project Communication Plan as an appendix to the annual work plan. The Project Communication Plan will include the following information:
- The central project message.
- An "official" translation of the project name and central project message. The Recipient must obtain approval of the translation from FAS before procuring or

printing promotional materials.

- A description of how the Recipient intends to use the USDA logo in conjunction with a symbol of the target country, another donor, or a nongovernmental organization that is involved in the project, if applicable.
- The names of any other donors or nongovernmental organizations involved in the project and their communications and marking plans as they relate to the project.
- Any research publications expected to result from project funding, as well as any anticipated authorship issues, and how they will be handled.
- A Marking Plan (sample in Annex 1), which will include:
  - Types of materials that the Recipient intends to produce and mark.
  - The type and number of social media accounts the Recipient seeks approval from FAS to create, if applicable.
  - The approximate number of project sites that the Recipient plans to mark.
- Anticipated events, listed by fiscal year, and any potential communication materials that will be released before, during, or after each event, e.g., press releases, success stories, etc.

C. Media Communications

1. *General*

a. The Recipient will notify the appropriate USDA program analyst and USDA Post of all media interactions in the same communication or as close to simultaneously as possible.

b. The Recipient will not claim the status of, and will not take any action that is likely to lead to it being perceived as, a USDA employee or member of the U.S. Government or Diplomatic Mission.

2. *Press Conferences, Interviews, and Speaking Engagements*

The Recipient will notify USDA in advance of any scheduled press conferences, interviews, or speaking engagements with the media regarding the project to be implemented under this agreement. In the event of an unexpected or unplanned media engagement, the Recipient will notify the appropriate USDA program analyst and USDA Post as soon as possible to enable them to inform the U.S. Embassy Public Affairs Section. The Recipient will ensure that its project staff or other appropriate personnel acknowledge U.S. Government support and USDA as the source of funding during any press or media engagement with the Recipient.

3. *Press releases*

The Recipient will include the following standard language in a footnote at the bottom of any press release related to the project implemented under this agreement:

"The USDA McGovern-Dole International Food for Education and Child Nutrition Program (McGovern-Dole) funds school meals and education and nutrition programs for women, infants, and children in countries with high food insecurity. By providing school meals, teacher training, and related education and nutrition support, McGovern-Dole projects help boost school

enrollment, increase attendance, and improve reading outcomes and literacy results. The program provides for the donation of U.S. agricultural commodities, local and regional procurement of agricultural commodities, and financial and technical assistance to support school feeding and maternal and child nutrition projects. For more information, visit https://www.fas.usda.gov/programs/mcgovern-dole-food-education-program."

4. *Social Media*

a. The Recipient may create a project-specific social media account only if it demonstrates to USDA that there is a clear connection between the use of social media and the achievement of the project's objectives, and the Recipient obtains approval from USDA to create such project-specific social media account. In using an approved project-specific social media account, the Recipient will:
    - Include only content that provides clear and accurate information that is focused on the project, consistent in quality and accessibility, family friendly, positive, and used to advance the project's development objectives.
    - Include only posts that are consistent with stated USDA public positions, messaging, and communications strategies.
    - Include high-quality pictures in the content, whenever possible.
    - Place the USDA logo only on the introductory and closing frames of a video and include the USDA URL in the closing frame of a video.
    - Maintain the privacy of project staff and beneficiaries.
    - Take appropriate precautions to safeguard accounts from unauthorized use, hacking, or defacement.
    - Tag relevant USDA accounts (@USDAForeignAg on X (formerly Twitter)) or hashtags.
    - Include a disclaimer that the information in the account does not necessarily reflect the views of the U.S. Government.
    - Archive and deactivate all project-specific social media accounts at the end of the project.
    - Not include any disparaging remarks, including such remarks about the U.S. Government, the target country government, or U.S. agricultural products.
    - Not advocate for target country government policies that disadvantage U.S. agricultural exports.
    - Not use social media to respond to reports in other media, such as newspapers, broadcast, and online reports.

b. The Recipient may use its organization's social media platform to inform beneficiaries and the public about the project's objectives and achievements. In social media posts related to the

project, the Recipient must identify USDA as the funder and include the McGovern-Dole program name. The Recipient will tag the USDA handle (@USDAForeignAg) in messages delivered though X (formerly Twitter) related to the project, whenever possible. The Recipient must notify the appropriate USDA program analyst of all social media posts that it makes related to the project.

c. The Recipient will remove specific content related to the project from social media if USDA determines it to be inappropriate. If the Recipient fails to comply with a requirement of Section IV, Paragraph C.4, USDA may require that all of the Recipient's individual social media posts related to the project be pre-cleared by the appropriate USDA program analyst.

5. *Disclaimer Language*

The Recipient will include the following language in any non-pedagogical or training materials that are distributed to the public under the project:

"This [study/report/publication/audiovisual/other information or media product (specify)] was made possible by the generous support of the American people through the United States Department of Agriculture's McGovern-Dole International Food for Education and Child Nutrition Program. The contents are the responsibility of the [Recipient] and do not necessarily reflect the views of the United States Department of Agriculture or the United States Government."

6. *Other Communications Requirements*

a. Approval Process for Materials

The Recipient will submit the following materials to, and obtain the approval of, the appropriate USDA program analyst before using or distributing the materials:

- Templates for banners, project-site signs, presentations, and other common formats
- Templates for press releases
- Templates for policy papers

The Recipient must submit such materials in the English language as part of the work plan or annual update referenced in Part IV, Item II, Paragraph D, of this agreement.

b. The Recipient should endeavor to update fact sheets on a regular basis, but not less frequently than once a year, and as requested by the appropriate USDA program analyst.

c. The Recipient will endeavor to submit at least one success story as an attachment to each semiannual performance report or as requested by the appropriate USDA program analyst. Multiple stories are encouraged to show a fuller picture of the success of the project. The Recipient will submit a success story(ies) that:

- Is grounded in data.
- Reflects a broader look at the success of a specific activity or the project rather than a focus on specific individuals.
- Includes a high-quality photo with corresponding caption and photo credit.

USDA is also interested in receiving human interest stories that may be shared with FAS Post and U.S. Embassy colleagues.

d. When beneficiaries receive donated commodities directly, the Recipient will provide information to the beneficiaries regarding the proper preparation and use of such commodities.

7. *Promotional Items*

a. The Recipient will clearly outline any plans to produce promotional items related to the project in its Project Communication Plan. The Recipient will only produce such products when necessary to advance the goals of the project.

b. The Recipient will not produce or distribute any promotional item that is marked with the USDA logo until after it has demonstrated a clear connection between the item and the project's objectives, and the production and distribution of the promotional item has been approved by the appropriate USDA program analyst.

8. *Reporting on Public Outreach and Response*

The Recipient will submit to the appropriate USDA program analyst, in the semiannual performance report submitted in accordance with Part IV, Item II, Paragraph H(1), of this agreement, information that quantifies the Recipient's outreach activities and response during the reporting period for the project implemented under this agreement. In each such report the Recipient will quantify the media used, the number of pieces of content per media, the exposure of each piece of content, and the total estimated exposure for the reporting period across all media platforms. The information in each report must include the following categories:

- Press Releases: Quantify number of releases, outlets picking up content, and circulation.
- Events: Quantify number of events and total attendees.
- Radio: Quantify segments and listenership.
- TV: Quantify segments and viewership.
- Web: Quantify pieces of content (e.g., articles, blogs, etc.) and webpage visits.
- Social Media: Quantify pieces of original content (not comments, likes, etc.), outlets (e.g., Facebook, X (formerly Twitter), YouTube, Instagram, etc.), and total views across media platforms.

V. **Waiver of Requirements**

A. In accordance with 7 CFR section 1599.9(g), the Recipient may request USDA to waive compliance with one or more of the labeling, marking, or notification requirements under this agreement. The Recipient will not have to comply with such requirement(s) while awaiting a determination by USDA regarding its waiver request if the Recipient determines that compliance with such requirement(s) poses an imminent threat of injury, loss of life, or destruction of property in the target country. In such case, the Recipient must submit to USDA an explanation of the safety or security risk, as soon as possible, in a letter on the Recipient's letterhead and signed by an authorized official within the Recipient's organization.

B. Except as provided in Section V, paragraph A, the Recipient must comply with all labeling, marking, and notification requirements under this agreement unless it has received a specific approval from USDA of a request to waive compliance with one or more of such requirements. Approval of a work plan or Project Communication Plan does not constitute an approval of a waiver.

C. Pursuant to 7 CFR section 1599.9(g), the Recipient may submit a written request for a waiver at any time after the agreement has been signed. The Recipient is encouraged to submit any request to waive a marking requirement, any proposed alternatives, and detailed information to justify the waiver request before submitting the Project Communication Plan, to the extent possible. The Recipient may not incorporate in the Project Communication Plan a deviation from a marking requirement unless USDA has approved a waiver request to permit such deviation. The Recipient may request a waiver when a marking requirement would:

- Prevent an appearance of neutrality that would further the objective or purpose of the product.
- Reduce the credibility of the project's data or findings.
- Impair the functionality of the product.
- Not be cost-beneficial or practical.
- Violate cultural or social norms or otherwise be considered inappropriate.
- Violate applicable international law.
- Deter achievement of project goals.
- Detract from host country "ownership."
- Place project beneficiaries or the Recipient's staff in physical jeopardy.

Annex 1: Communications Plan – Sample Marking Plan

Product	Type & Placement of Marking	Remarks
200 Project Signs (located at each of the 200 project schools)	3ft x 2ft signboard placed at entrance of school. Signboard will include USDA logo, program name, target country's logo, project title, and name of school, and acknowledge USDA as the donor.	Ministry of Education requires that its logo be placed in the upper left corner.
Training Manuals	USDA logo, program name, Recipient's logo, and project title will be displayed on the cover of the manual.	
Project page on Recipient website	USDA logo, program name, Recipient's logo, and project title will be displayed.	Webpage information will be maintained in the French language.
Latrines (located at each of the 200 project schools)	USDA logo sticker (8in x 8in) will be placed on side.
