Annex D: Relevant Grant and/or Contract Experience

Name of Applicant/ Subrecipient	Agency	Agency/Donor/ Contact Information	Name of the Project and Instrument Number	Funding Amount	Country of Implementation and Period of Performance	Key Accomplishments and Outcomes	Description of how this reference relates to the objective and outcomes of this FOA
Partners of the Americas <u>Sub-grantees:</u> Fundación ALDA *Fundación Comunitaria Centro de Información y Recursos para el Desarrollo (CIRD)*	U.S. Department of Labor (USDOL)	Kathryn Chinnock 1-866-487-2365 chinnock.kathryn@dol.g	Paraguay Okakuaa IL-28094-15-75-K-11	$7,499,557.87	Paraguay November 2015 – September 2021	The *Paraguay Okakuaa* (POK) project supported Paraguay in its efforts to reduce the worst forms of child labor, combat forced labor, and improve labor law compliance and working conditions, with a particular focus on the departments of Guairá and Boquerón. **The expected outcomes of the project were:** 1. Increased participation of children and adolescents in educational opportunities. 2. Households with increased access to Livelihood. 3. Improved application of labor laws that protect children and adolescents. 4. Improved labor law compliance and acceptable working conditions with a focus on preventing and combating forced labor. **Key accomplishments of this project include:** <u>Signed Agreements:</u> 1. Signed agreement between the Ministry of Labor, Employment and Social Security (MOL) of Paraguay, Ministry of Education, Ministry of Children and Adolescents, CIRD and ALDA (project subawardees). 2. Signed agreement between MOL and target municipalities of Villarrica, Borja, Iturbe, Troche and Paso Yobai. 3. Signed agreement between MOL and the Ministry of Social Development within the framework of the project. 4. Signed agreement between the MOL and Petróleos del Paraguay (PETROPAR) within the framework of the project. 5. Signed Letter of Interest between POK and sugarcane producer organizations (ASO Independencia and Cora). <u>Educational Interventions:</u> 1. Agreement for the methodological transfer of Quantum Learning (QL) and the Espacios para Crecer (EpCs) in the districts of Paso Yobai, Borja and Troche (Guairá Department) and Neuland (Boquerón Department) between Ministry of Children and Adolescents and the project. 2. Declaration of interest of the Ministry of Education and Sciences for the EpC booklets. 3. Training to the educational community of Neuland (Boquerón Department) and Guairá Department in the QL methodology. 4. Training on QL for the educators of the ABRAZO program (national program to combat child labor) nationwide 5. 3,032 active beneficiary children and adolescents in Guairá in educational services delivered by the project: 874 in EpCs (5 to 10 years old) and 2,158 in 4H clubs (11 to 17 years old). 6. 81 active participant children in Neuland district (Boquerón department), in EpCs (5 to 10 years old). <u>Institutional Capacity Building Interventions:</u> 1. Development of labor inspection computer system. Delivered to the MOL.	**POA has extensive experience creating channels to prevent and raise awareness of the risks of child labor, forced labor, and labor rights violations, emphasizing how to identify them, in the Chaco region of Paraguay**. Under POK's third objective, building local capacity to improve the application of labor laws, POA designed and implemented an awareness-raising campaign targeting vulnerable populations. While designing the campaign, POA identified gaps in knowledge regarding labor rights, particularly among indigenous communities in the Chaco. The first phases of the campaign, which included radio spots, written materials, and in-person discussions, focused on teaching target populations about their rights. These initial topics facilitated discussions on more complex labor issues, including forced labor and how to identify and report labor rights violations. As POA's awareness-raising activities continued, target audiences expanded from local communities to also include the public and private sectors, and POA successfully engaged businesses, local government entities, and other organizations in discussions of labor rights, forced labor, and their responsibilities in protecting and advocating for workers. Additionally, POA supported the MOL in establishing a Regional Office, the first of its kind in the Paraguayan Chaco. POA supported the MOL create a local presence in the region to provide legal counsel and support to workers. Through POK, POA demonstrated a strong capacity to raise awareness among target populations, including local communities and civil society, on understanding and identifying labor rights violations. Additionally, POA has proven success in establishing formal mechanisms for advocating on behalf of workers and building local capacity to maintain and expand upon these mechanisms. POK emphasized local capacity building, particularly concerning organizations' ability to protect and advocate on behalf of workers. This experience includes establishing a Regional Office for the MOL to support workers in the Chaco, designing awareness-raising materials on labor rights to be distributed by that office and local organizations, and developing trainings and tools for members of those organizations to increase their knowledge and efficiency. These strategies have served to strengthen the resilience of these entities, increasing the sustainability of their efforts to defend and support workers and their rights. POK successfully provided resources to workers and their families and built the capacity of local organizations and entities to continue to provide these services beyond the life of the project. The project strengthened the capacity of local government agencies to provide information and legal support and counsel to workers. POA supported the MOL in setting up a hotline for workers from the region to call with questions about their labor rights and how to identify or report potential violations. Additionally, under its second outcome, POK worked with families vulnerable to labor violations, including child labor and forced labor, to provide them with sustainable livelihood opportunities. The strategies used by POA to provide these services to target populations would facilitate worker organizations' and civil society

						2. Development of the Registro del Adolescente Trabajador (RAT) system. Delivered to the MOL. 3. Development of the Observatorio Nacional de la Niñez y Adolescencia del Paraguay computer system for the Ministry of Children and Adolescents . 4. Re-activation of the Consejos de Desarrollo Distrital (CDD) in the districts of Villarrica, Borja, Iturbe, Troche and Paso Yobai (Guairá department). 5. Updating of the "National Strategy for the Prevention and Eradication of Child Labor and Protection of Adolescent Work in Paraguay," approved by the National Commission for the Eradication of Child Labor and the Protection of the Adolescent (CONAETI), delivered to the President Mario Abdo Benitez. 6. Development of the Professionalization Plan for the Career of MOL´s Labor Inspectors. <u>Improved Labor Law and Compliance Combating Forced Labor:</u> 1. Communication campaign "Paraguayan Chaco with Decent Work" within the framework of the 2018 Expo Rodeo, with the presence of the President Abdo Benítez and Labor Minister Carla Bacigalupo. 2. Communications campaign "Christman bonus is a labor right" targeting indigenous people. 3. Communications campaign "Preventing labor exploitation through access to education for the most vulnerable people" addressed to high school students from public schools in the districts of Filadelfia, Mariscal José Félix Estigarribia, and Loma Plata (Paraguayan Chaco). 4. Training of the MOL Official in Boquerón for effective counseling, guidance, and mediation. 5. Coordination between the Regional Office of Boquerón and the Governor's Office, through the Departmental Secretariat of Children, Adolescents, and Women and the Departmental Secretariat of Native Peoples of the Department of Boquerón for awareness-raising talks with indigenous peoples about protected adolescent work. 6. Raising awareness among employers in the districts of Filadelfia, Mariscal José Félix Estigarribia, and Loma Plata, on the importance of offering protected jobs for adolescents. 7. Knowledge management on specific topics such as decent work, domestic work, and protected work for adolescents	organizations' ability to provide similar services to their members and target populations and to raise awareness on their labor rights. The mechanisms developed under POK would be replicated under the activities of this project, ensuring workers' access to channels to protect and defend their rights. POA's strategies from POK for engaging the private sector were extremely successful in the projects' target regions. The project's awareness-raising efforts, originally targeted primarily towards local indigenous communities, were successful in drawing the attention of local businesses and private sector organizations, including businesses owned by the influential Mennonite region. POA successfully tailored trainings to this audience, involving them in discussions of the rights of their employees and their responsibility to protect and uphold those rights. These methods for private sector engagement would be shared with civil society organizations and worker organizations in the target sectors and regions of this project, increasing their capacity to foster social dialogue and hold employers and the private sector accountable for upholding the rights of their employees.
Name of Applicant/ Subrecipient	**Agency**	**Agency Contact Information**	**Name of the Project and Instrument Number**	**Funding Amount**	**Country of Implementation and Period of Performance**	**Key Accomplishments and Outcomes**	**Description of how this reference relates to the objective and outcomes of this FOA**
Partners of the Americas Subgrantees: National Federation of Coffee Growers of Colombia (FEDECAFE)	U.S. Department of Labor (USDOL)	Raymond Marolt, 1-866-487-2365 marolt.raymond.j@dol.gov	Colombia Avanza IL-31475-17-75-K	$2,500,000	Colombia December 2017 - October 2022	Colombia Avanza works to improve the capacity of civil society to better understand and address child labor and promote acceptable conditions of work in Colombia's coffee sector. The project has a tripartite approach, focusing on improving the ability of civil society to identify and document accurate, independent, and objective information on the nature and scope of child labor and other labor violations in the coffee sector, as well as improving the capacity of civil society to raise awareness and participating in public advocacy scenarios related to the prevention of child labor and the promotion of acceptable conditions of work in the coffee sector. **The expected outcomes of the project were:** 1. Improved capacity of civil society to identify and document accurate, independent, and objective information on the nature and scope of child	POA has already developed capacity-building activities for civil society actors, including coffee worker associations and FEDECAFE, to identify and address child labor and promote acceptable conditions of work in the coffee sector. This relevant experience may serve as a foundation for capacity-building activities. POA has developed training resources on public policies, citizen participation, and occupational safety and health. The project's successful partnership with and training of civil society organizations has increased their capacity to both understand and identify labor violations, as well as advocate for protections against child labor and forced labor in accordance with national and international labor standards. **A central component of the Colombia Avanza project was to build the organizational resiliency of civil society organizations to incorporate and sustain annual work plans, communications strategies, and awareness-**

Center for Regional and Business Research (CRECE) International Initiative to End Child Labor (IIECL) Departmental Cooperative of Coffee Growers of Huila (Cadefihuila) Cooperative of Coffee Growers of the South of Tolima (Cafisur) Fundación el Arte de Crear (National Network of Rural Youth of Colombia) Ascoffeekatin Café Especial Salomón Assosiation						labor and/or forced labor, and violations of acceptable conditions of work in the coffee sector and/or supply chain. 2. Improved capacity of civil society to raise awareness for the protection of workers from child labor and/or forced labor abuses, and violations of acceptable conditions of work. 3. Improved capacity of civil society to implement initiatives to address child labor and/or forced labor and violations of acceptable conditions of work, including facilitated access to grievance mechanisms and/or remedy for victims of labor exploitation. **Key accomplishments:** 1. Signed Memorandum of Understanding with FEDECAFE to collaborate under Colombia Avanza. 2. Signed Sub-contract with FEDECAFE to support the implementation of project activities. 3. Signed Sub-awards with Cadefihuila, Cafisur and Fundación Arte de Crear, Ascoffeekatin and Café Especial Salomón Association, targeted civil society organizations for strengthening capacities on child labor and acceptable conditions of work through the implementation of project activities. <u>Outcome 1</u> 1. Through partnership with CRECE, the project developed a Study on Child Labor in the Coffee Sector in Colombia, which was approved by USDOL and subsequently presented to and disseminated amongst key project stakeholders. 2. Creation of a technical committee to coordinate actions between public entities, such as MOL and the Colombian Institute of Family Welfare. 3. Facilitation of the integration of recommendations of the project's research products into the plans FEDECAFE, MOL and the Colombian Institute of Family Welfare, for its implementation according to each entities' plans, policies, and capacities. 4. Holding of technical sessions held with the Inter-Institutional Committees to Eradicate Child Labor in the four targeted municipalities in Tolima and Huila to support the implementation of the Line of Public Policy for the Prevention and Eradication of Child Labor and the Integral Protection of Adolescent Workers 2017 – 2027. 5. One evaluation developed and available on the operating conditions in the Inter-Institutional Committees to Eradicate Child Labor of four targeted municipalities in Tolima and Huila. 6. Development of eight action plans for the Inter-Institutional Committees to Eradicate Child Labor, two per each targeted municipalities with the support of the project, for the implementation of the Line of Public Policy for the Prevention and Eradication of Child Labor and the Integral Protection of Adolescent Workers 2017 – 2027. <u>Outcome 2</u> 1. In partnership with the *Universidad de Ibagué*, completion of eight in-person training workshops to build capacity on child labor and acceptable conditions of work (343 people trained) with 72% knowledge improvement among the targeted participants, and completion of ten virtual training workshops on public policy and citizen participation related to child labor and acceptable conditions of work (182 people trained) with 68% knowledge improvement among the targeted civil society organizations participants.	**raising campaigns to address labor violations and promote acceptable conditions of work within their work.** The project has provided trainings and user guides to local and departmental Inter-Institutional Committees for the Eradication of Child Labor, FEDECAFE, as well as target cooperatives to ensure they not only had the resources necessary to implement and monitor action plans that respond to specific Colombian labor regulations, but also understand how best to implement them following the close of the project. POA increased the capacities of departmental and local Inter-Institutional Committees for the Eradication of Child Labor by providing workshops to strengthen their operations, including teamwork and inter-institutional coordination. POA has also strengthened the capacities of Inter-Institutional Committees for the Eradication of Child Labor and FEDECAFE to formulate and monitor their annual work plans, ensuring adequate incorporation and implementation of labor-focused components. POA's activities under Colombia Avanza have provided key civil society organizations with tools to better manage compliant labor practices within their operations and to benefit workers and their families following the implementation of the project. POA will build on its efforts to strengthen Colombian civil society organizations to build and strengthen the organizational capacities and infrastructure of the civil society and worker organizations in Ecuador through the proposed project. POA's experience supporting the establishment and growth of civil society organizations oriented towards promoting and practicing acceptable conditions of work in accordance with legal labor standards also extends to its creation of two new local nodes of the National Network of Rural Youth of Colombia in the project's target departments. In addition, two of the project's sub-awardees, coffee associations Cafisur and Cadefihuila, were inducted as permanent members of the National Colombian Network Against Child Labor thanks to support provided by POA. The institutionalization of these entities will ensure they are strategically placed to operate independently as strong advocates of labor compliance and protection of workers, without continued project support. POA will employ similar training and resource provision strategies to ensure worker organizations and civil society organizations not only develop but sustain the capacity to identify labor violations. POA has developed several informational and advocacy resources, such as video series, radio programs, and communications guides to highlight what is and is not child labor in accordance with international and national legal frameworks, and to promote acceptable conditions of work amongst coffee growers and their families. The project's awareness-raising messages have been very well received, employing the most-used means of communication by target communities, particularly those in rural and remote contexts. The effectiveness of these communication strategies reflects POA's ability to engage workers and their families on issues regarding their rights and labor standards. Furthermore, the dissemination and integration of the project's communication toolkit, as well as training materials within the curriculum of local coffee associations such as *Ascoffeekatin* and *Café Especial Salomón,* as well as FEDECAFE platforms, is evidence of POA's ability to develop context-appropriate materials that meet needs identified by local stakeholders. Furthermore, Colombia Avanza's strong relationship with FEDECAFE demonstrates POA's ability to form critical alliances with unions, their leadership, and members.

						2. In partnership with *Fundación Tiempo de Juego*, carried out five virtual training workshops to build capacity on communication strategies on radio to raise awareness on child labor and acceptable conditions of work at the local level among the targeted participants from civil society organizations (70 people trained). Four radio slots were developed by youth participants from Cafisur (1), Cadefihuila (1) and the National Network of Rural Youth (2) - Chaparral and Pitalito broadcasted in local radio stations in Tolima and Huila. 3. Awareness-raising and project socialization campaigns implemented in collaboration with FEDECAFE, Cadefihuila, Cafisur, MOL and the Colombian Institute of Family Welfare in the target municipalities and in Neiva and Ibagué. These campaigns were part of the Communications Strategy developed and defined by the Communications Specialist. 4. Designed and implemented awareness raising campaigns to prevent child labor and promote acceptable conditions of work in the coffee sector: i) Awareness raising campaigns in December, in the Christmas season, where there is a greater risk of child labor (2018, 2019 and 2020); ii) Awareness raising campaigns to commemorate the World Day Against Child Labor in 2019, 2020 and 2021; iii) Awareness raising campaign in response to COVID-19 pandemic in 2020; and iv) Awareness raising campaign to commemorate the 2021 as the international child labor year declared by United Nations (International Year for the Elimination of Child Labor). 5. Communications materials produced by the project and in collaboration with FEDECAFE on child labor prevention and the promotion of acceptable conditions of work in the coffee sector (radio slots, radio soap, videos, printed material such as didactic guides, posters, flyers, banners, puzzles, calendars, and social media material such as videos, pictures, and posts). This material has been shared with targeted civil society organizations and national and local stakeholders (MOL, Colombian Institute of Family Welfare, officials from the Inter-Institutional Committees to Eradicate Child Labor, among others). A digital press kit was developed with all the activities carried out by the project. 6. In person and virtual forums conducted by the project on child labor prevention and the promotion of acceptable conditions of work in partnership with key stakeholders such as FEDECAFE, MOL, International Labor Organization, Global Compact Colombia Network, and local authorities from the four targeted municipalities in Tolima and Huila. 7. Launched a story contest entitled "Inheriting a Coffee Culture Free of Child Labor," to promote an understanding of child labor amongst children and adolescents, as well as the practice of generational knowledge-sharing that focuses on a coffee sector free of child labor. <u>Outcome 3</u> 1. Two local nodes of the National Network of Rural Youth of Colombia created in the project's target departments of Tolima and Huila, each of which have been strengthened through training workshops on child labor and acceptable conditions of work, communication strategies on radio, and public policy and citizen participation. Sustainability promoted through each node's replication virtual training workshops on child labor and acceptable conditions of work with other branches' members of the National Network of Rural Youth of Colombia from other Departments. 2. Initiatives created by the Chaparral and Pitalito branches to reinforce and apply the thematic contents of the three trainings provided by the project: i) Awareness Raising Day, ii) Production of two videos on the experience and learnings in the trainings workshops shared on nodes' social media and iii)	POA has developed expertise in alliance management to join efforts with public and private stakeholders in order to implement project activities at the national and local levels. In addition to partnering with targeted worker civil society organizations and Inter-Institutional Committees for the Eradication of Child Labor, Colombia Avanza worked with other governmental, nongovernmental, and private sector institutions including the MOL, the Colombian Welfare Institute (ICBF), *Universidad de Ibague,* Center for Regional Coffee and Business Research (CRECE), the International Initiative to End Child Labor (IIECL), Global Compact – Colombia Network against Child Labor, ILO, Pilares Project– PACT, among others. POA has partnered and collaborated with these institutions to provide training workshops, develop awareness-raising activities in virtual and in-person formats at the local and national levels (campaigns, forums and events), and promote public advocacy to address child labor and forced labor. As such, POA has a demonstrated capacity to develop and sustain productive partnerships with key actors in our target sectors and geographic areas.

						Elaboration and update of the public and private institutional offer targeting children and adolescents for the occupation of leisure time in the municipalities of Chaparral and Pitalito to be socialized and shared with officials from the Inter-Institutional Committees to Eradicate Child Labor and local authorities for better coordination efforts to assist children and adolescents and prevent child labor. 3. With the support of the project, Municipal Development Plans for the 2020-2023 period (one for each targeted municipality) included actions to prevent child labor and/or promote acceptable conditions of work. 7. With the accompaniment of the project, the targeted civil society organizations participated in public advocacy scenarios, in sessions of the Inter-Institutional Committees to Eradicate Child Labor as special guests to contribute to the implementation of the Line of Public Policy for the Prevention and Eradication of Child Labor and the Integral Protection of Adolescent Workers 2017 – 2027 in the targeted municipalities. The civil society organizations participated in three sessions of the Inter-Institutional Committees to Eradicate Child Labor municipalities of Chaparral (Cafisur), Neiva, Cadefihuila, and Pitalito (Pitalito node). Cafisur became a permanent member of the Inter-Institutional Committees to Eradicate Child Labor of Chaparral in 2021. 4. Through support provided by the project, two of its partner civil society organizations, Cadefihuila and Cafisur, were inducted as permanent members of the Colombian Network Against Child Labor. <u>Other achievements</u> 1. Participated in the committee convened by USDOL in Colombia to share best practices to apply for improvement in project implementation. 2. Developed two limited-editions specialty lines of coffee produced by producers committed to the prevention and eradication of child labor and the promotion of acceptable conditions of work in Colombia's coffee sector, through partnership with local civil society organizations.	
Name of Applicant/ Subrecipient	**Agency**	**Agency Contact Information (Name, telephone, fax, e-mail)**	**Name of the Project and Instrument Number**	**Funding Amount**	**Country of Implementation and Period of Performance**	**Key Accomplishments and Outcomes**	**Description of how this reference relates to the objective and outcomes of this FOA**
Partners of the Americas <u>Sub-grantees:</u> JE Austin Associates Social Accountability International (SAI)	U.S. Department of Labor (USDOL)	Leyla Strotkamp 1-866-487-2365 strotkamp.leyla@dol.gov	Reducing Child Labor and Forced Labor in Palm Oil Supply Chains (Palma Futuro) IL-32820-18-75-K-	$7,360,289.00	Colombia, Brazil, Ecuador, Peru January 2019 - July 2024	Palma Futuro works to improve the implementation of Social Compliance Systems that promote acceptable conditions of work and the prevention and reduction of child labor and forced labor in palm oil supply chains in Colombia and Ecuador. Additionally, the project seeks to collaborate with relevant regional and global actors to disseminate best practices in social compliance systems in palm oil producing regions and the development of experiential learning and awareness-raising mechanisms in palm oil producing regions of Colombia, Ecuador, Brazil, and Peru. **The expected outcomes of the project are:** Strengthened capacity of private sector partners in the palm oil sector in Colombia and Ecuador to implement robust social compliance systems. Increased understanding, at regional and global levels, of promising practices in Social Compliance Systems in Palm Oil Supply Chains. **Key accomplishments:**	Palma Futuro has worked with relevant stakeholders to build robust social compliance systems across the palm oil supply chains of the industry. The main purpose is to ensure the implementation of effective protocols to identify violations of labor rights. The development of these mechanisms represents POA's ability to successfully enhance the capacity of local officials, workers, and worker organizations to document, report, and address unacceptable conditions of work. The success of these efforts to not only build and implement enforcement mechanisms, but to do so in a collaborative manner with local civil society organizations, public, and private sector actors will undoubtedly inform POA's proposed activities. Furthermore, POA's experience implementing activities has been gained from Palma Futuro's engagement with government private sector partners to carry out capacity-building activities focused on improving social compliance systems indicates POA's ability to successfully promote improved labor conditions through coordination with the private sector.

						Strategic Alliances 1. Signed contract with J.E. Austin and Associates (JAA) to conduct a market analysis on palm oil in Colombia and Ecuador and case studies with Harvard Business School on successful experiences related to palm oil in both countries. 2. Signed contract with Social Accountability International (SAI) to implement social compliance systems in two palm oil companies in Colombia and in one company in Ecuador. 3. Signed Memoranda of Understandings with Palmas del Cesar, and Biocosta and its four extraction plants as the Private Sector Partners that would receive training to build capacities and improve the implementation of Social Compliance Systems. 4. Signed MOU with FEDEPALMA to join efforts for the implementation of Palma Futuro. 5. Signed Letter of Intention with Ecuador´s MOL to support project activities. 6. High-level meeting with Ms. Martha Newton, Deputy Undersecretary for International Affairs at USDOL, and Colombian government officials to introduce the project during her visit to Colombia in May 2019. 7. Preparation of a General Agreement between POA and Ecuador's MOL to coordinate actions to promote acceptable conditions of work in the palm oil sector. 8. Signed Memorandum of Understanding with the Roundtable on Sustainable Palm Oil (RSPO) to coordinate regional and global activities. 9. POA was accepted as a strategic ally of the Companies for Ecuador Free of Child Labor and the Colombian Network Against Child Labor. Implementation of Social Compliance Systems 1. Conformed the Social Performance Teams within the palm oil companies to build capacities in Social Compliance Systems. 2. Trained 84 representatives from Private Sector Partners Social Performance Teams (in Colombia and Ecuador) and 87 suppliers in Colombia. The technical assistance was focused on Labor Performance, Social Compliance Systems and COVID-19. 3. Produced and delivered Executive Report presentations of the Social Compliance baseline for Aceites, Palmaceite, Palmagro, El Roble, Palmas del Cesar and Organic Supply to introduce their findings. Following this, it was produced comprehensive Social Compliance Systems Baseline Assessment reports for all Private Sector Partners, providing a detailed explanation of their scores, observations on current performance within each Labor Performance and Management System category, and recommendations for improvements. 4. Held Social Compliance Systems Assessment Workshops with 46 suppliers to each of the Private Sector Partners to introduce the objectives and activities of Palma Futuro, the Social Compliance Systems concept, and explains the nine labor performance elements in detail. This training included: explaining relevant national and international regulations and norms for each of the labor performance elements; connecting these issues to the specific conditions of palm fruit suppliers in Colombia & Ecuador; explaining employers' responsibilities to respect workers' rights; and how to identify, prevent, and remediate labor risks in a small farm setting. It also addressed emerging labor risks due to COVID-19, the eight management system categories, how to support labor performance and compliance and how they can be applied in a small farm setting and the role of external stakeholders in promoting Social Compliance Systems.	Palma Futuro's activities have centered around engagement with civil society and worker organizations to provide awareness-raising and communications campaigns targeted at workers and employers. These campaigns educate and empower workers to know their rights, and access proper channels to ensure those rights are protected and upheld. These methods have even been adapted to address the unique concerns presented by the COVID-19 pandemic, employing digital strategies, and incorporating messaging on acceptable and healthy working conditions in the context of the pandemic. The success of Palma Futuro's direct engagement with and education of workers has provided POA with valuable experience to apply to its engagement with worker organizations and civil society organizations to build their capacity for service provision to workers and their families. POA's capacity to reach workers, unions, and employers across supply chains demonstrates the reach and thoroughness of our campaigns. Additionally, the project has implemented activities and led coordination amongst its four target countries of implementation: Brazil, Colombia, Ecuador, and Peru. POA's capacity to lead activities and the sharing of best practices amongst worker, civil society, and private sector stakeholders in each of these countries, indicates our ability to grow strong and maintain networks of partners, stakeholders, and allies in multiple countries and to facilitate complementary interventions and programming utilizing best practices under the framework of a single project.

						5. Conducted an impact assessment survey to collect responses from workers regarding the impact of COVID-19 on their work lives and labor and social conditions. 420 surveys were conducted with workers from the private sector partners in Colombia, collecting information on where improvements in labor performance are most needed given the current context. These surveys provide critical information to prepare and implement Improvement Plans with the palm oil entities and the feedback from the surveys will be used to customize and prioritize training topics. 6. Developed materials and conducted initial training sessions for several stakeholder groups (Industry associations, schools, labor unions, and public sector). These virtual training sessions focused on introducing labor rights and work-related human rights issues and are customized for each stakeholder group to highlight their areas of influence and interest. The training for schools focused on child labor and forced labor explained the definition, training on how to identify cases, emerging labor risks due to COVID-19, and ways they can engage and collaborate with Palma Futuro. 7. Visited 16 rural communities in the department of Magdalena, Colombia, that were prioritized for engagement with the project. Community leaders were identified and reached in person to discuss the challenges their communities are facing. The conversations also served to introduce Palma Futuro‘s activities to these communities, raise their awareness about certain labor rights issues, and promote opportunities to engage with the project (e.g. stakeholder training). 8. Built on relationships developed by our implementing partner SAI in our target communities to form the first five Community Circles. Their first meeting took place in March 2021, as an opportunity to introduce Palma Futuro and the purpose of the Community Circles. The circles also discussed some of their high-priority concerns and brainstormed some action items. 9. Started the Training of Trainer (ToT) Program with the private sector partners, which is one the main strategies of the Project to develop local capacity. <u>Research, monitoring, evaluation and learning</u> 1. Finalized the market analysis and value chain mapping on palm oil in Colombia and Ecuador to understand business incentives and potential obstacles for producing palm oil under acceptable conditions of work, free of child labor and forced labor. 2. Presented the Case Study on Palmas del Cesar in the "Private and Public, Scientific, Academic and Consumer Food Policy Committee (PAPSAC)" of Harvard University. 3. Continued working in the design and development of the Knowledge Management Platform and defined a workplan composed by three phases for its development. The platform aims to share experiences, tools, good practices and provide opportunities for exchange between stakeholders to support the identification of solutions to challenges related to Social Compliance Systems in the supply chains of the palm sector in Colombia, Ecuador, Peru, and Brazil. This will include the creation of a bank of good practices, and the organization of forums, seminars, and exchange spaces about specific aspects for the strengthening of Social Compliance Systems in the sector. <u>Events and Communications</u> 1. Concluded the design and development of a Digital Press Kit that is hosted in POA’s website (https://spark.adobe.com/page/wTnfOCl83Tf9f/). This	

						Digital Press Kit is composed of four sections with content regarding the project´s objectives, highlights, frequently asked questions (FAQs) and a final section with success stories, news and events. This tool will be socialized with allies and relevant actors within the palm oil sector, national and regional stakeholders. The Digital Press Kit was designed to be a dynamic source of information, that is updated with new relevant content produced by Palma Futuro. 2. Organized and supported three webinars related to: i) labor conditions and Social Compliance Systems; ii) the challenges of Covid-19 in the fight against child labor; and iii) the effects of Covid-19 in labor conditions in the palm oil sector in Colombia and Ecuador. In total 30 public and private organizations from Colombia and Ecuador participated and supported these workshops, including the associations of oil palm growers and Ministries of Labor of both countries, and other relevant institutions related to the palm oil industry. 3. Organized a workshop in Ecuador focused on Social Compliance Systems: labor practices and risks in the palm oil supply chain. Palma Futuro, the Roundtable on Sustainable Palm Oil (RSPO), ProAmazonia and Propalma participated as panelists, with contents related to the current situation of the palm oil sector in Ecuador and Latin America, as well as the challenges ahead to address COVID-19 impacts and labor issues within palm oil supply chain. The event had 70 palm oil participants from Colombia, Ecuador, Peru and Brazil representing palm oil companies, palm oil federations, public sector and non-governmental organizations. 4. Sent 31,270 SMS to 3,461 producers affiliated to Fedepalma and printed 2,000 communication pieces for the promotion of self-care, acceptable working conditions and the prevention of child labor in times of pandemic. 5. Participated in the event hosted by the Colombian MOL to commemorate the World Day Against Child Labor with a video intervention of POA´s president and CEO, John McPhail, emphasizing on the importance of strengthening efforts by the civil society, the private sector and public institutions on child labor prevention. In addition, Palma Futuro developed a social media campaign along with the Colombian Network Against Child Labor to raise awareness on child labor prevention.	
Name of Applicant/ Subrecipient	**Agency**	**Agency Contact Information (Name, telephone, fax, e-mail)**	**Name of the Project and Instrument Number**	**Funding Amount**	**Country of Implementation and Period of Performance**	**Key Accomplishments and Outcomes**	**Description of how this reference relates to the objective and outcomes of this FOA**
Partner on the Americas <u>Sub-grantees:</u> Social Accountability International Centro de los Derechos del Migrante	U.S. Department of Labor (USDOL)	Carolina Chavez 202-693-2992 Chavez.Carolina@dol.gov	Mexico Awareness Raising Project IL-35868-21-75-K-	$10,000,000.00	Mexico 2021 - 2025	The Mexico Awareness Raising Project (MAP) seeks to strengthen the Mexican government's, specifically the Secretariat of Labor and Social Security (STPS), ability to rapidly implement the 2019 reform of its labor justice system by achieving significant impact at federal and the state levels and promoting changes to widely accepted practices on the part of the government, employers, and some unions that prevent workers from choosing or engaging in authentic negotiations over the conditions of their labor. The project seeks to achieve this objective by targeting workers, worker organizations, and employers with information on the new Labor Justice System and mechanisms for remedying labor disputes. To promote sustainability of project activities, MAP also works directly with STPS to build their capacity to conduct targeted awareness raising efforts on the components and implementation status of the 2019 Labor Reform.	Through MAP, POA demonstrates its ability to build productive relationships with key government stakeholders, facilitating the improvement of their capacity to raise awareness of and support the implementation of labor-rights focused activities with key stakeholders. The project has demonstrated its ability to engage STPS officials at the local and national levels to provide them with customized trainings and tools. In turn, these efforts have led to demonstrated improvements in capacity and ability to promote a labor-rights focused agenda. POA's strategy under the MAP project places a particular emphasis on the sustainability of capacity building efforts. By not only providing institutions like STPS with direct resources, but also by training them on how to develop and implement their own strategies, the project is promoting a long-term solution to increase the government's ability to

Comité Fronterizo de Obrer@s						**The expected Outcomes of the project are:** 1. Increased understanding by workers, employers, and union leaders on how to utilize Mexico's new labor systems to protect labor rights and effectively address disputes. 2. Building the capacity of the federal and state level STPS staff and constituents from key institutions to conduct outreach regarding labor rights and implementation of the labor reform among target audiences. **Key Accomplishments:** 1. The project has completed a baseline assessment to measure knowledge among target populations of the 2019 labor reform. The findings of this assessment have proven invaluable for the design of project activities and indicators to ensure maximum reach and relevance of awareness-raising efforts. 2. MAP has successfully engaged both traditional Mexican union confederations as well as independent unions, forming productive partnerships and building a reputation as a reliable and trusted source for information and capacity building regarding the 2019 labor reform. 3. MAP has forged robust connections with key stakeholders at both the federal and local government levels. The Director-General of the Federal Center for Conciliation and Labor Registration (CFCRL) regards POA as a crucial ally among the leading figures in Mexico's labor landscape. 4. MAP has strengthened the capacities of grassroots organizations like the *Comité Fronterizo de Obras y Obreros* (CFO). MAP has collaborated with this organization to enhance their monitoring and evaluation capabilities. In 2022, they had virtually no data collection tools, while by 2023, everything is thoroughly documented. Additionally, MAP has also been working to strengthen the capacities of the *Frente Auténtico del Trabajo* (FAT), an independent organization that has reached 1,655 workers through the forums it conducts as part of MAP's project. <u>Outcome 1:</u> 1. After engaging with MAP, over 427 stakeholders, including workers, employers, and union leaders, have demonstrated an increased understanding of Mexico's labor reform and how to defend workers' rights and address labor disputes. 2. Hundreds of thousands of individuals, particularly workers, have been reached through MAP's multi-channel social media strategy, which engages influencers across multiple platforms such as TikTok and Instagram to share information on labor rights, the 2019 Labor Reform, and mechanisms for remedying cases of rights violations. 3. One year after the launch of MAP's multichannel communications campaign, traffic to USDOL's USMCA Web-based Hotline experienced an astonishing surge, increasing by an impressive 46,101% compared to the same month during the previous year. 4. Sub-grantee CFO has completed the first module of its Gender and Empowerment of Women Toward Action program, training eight women workers to better understand how the reform uniquely affects women so they can serve as promoters within their communities. 5. Over 2,000 stakeholders have been reached with more information on the Labor reform through public forums implemented by the project.	promote the implementation of the 2019 Mexican Labor Reform and the new labor justice system. As such, POA has a demonstrated ability to increase government capacity to promote labor rights. One of MAP's greatest achievements to date has been the implementation of its multimedia awareness-raising campaign to inform workers, employers, and union leaders of labor rights and remediation mechanisms under the 2019 Labor Reform. After conducting an initial assessment of knowledge of the 2019 Labor Reform among workers, employers, and union leaders, the project used these findings to identify the most important information to share with these stakeholders about labor rights. The assessment also collected information on the means by which these populations receive information on labor rights and the Labor Reform. POA has demonstrated its ability to develop a nuanced understanding of both the gaps in knowledge and preferred means of information sharing of workers and other stakeholders and apply this knowledge to the design and implementation of awareness-raising efforts. The project has engaged both traditional information sharing methods, such as physical posters and the creation of public spaces for dialogue and education, as well as social media with the support of influencers with large followings, to reach hundreds of thousands of workers with information on their rights. Thus, POA has a proven track record of designing tailored awareness-raising efforts to increase worker knowledge about their rights. Beyond raising awareness about workers' rights, MAP has also demonstrated POA's capacity to educate workers on remediation mechanisms in the case that they are victims of rights violations. Materials targeted towards workers have included information on USDOL's USMCA hotline for reporting rights violations. Since disseminating this information, interactions with the hotline have increased significantly, demonstrating POA's ability to provide workers with information on means to address instances of rights violations.

						6. 13 collective structures and institutions have demonstrated improved linkages and systems to better address labor rights issues. <u>Outcome 2:</u> 1. MAP has helped STPS to update its website with information on the labor reform and its status of implementation throughout the country with an interactive MAP. After the initial development and deployment of this new resource, MAP provided training to STPS to ensure that officials were familiar with the platform and can continuously update it with new and accurate information. 2. MAP has hosted successful capacity building activities with STPS and other key institutions to increase their ability to design and implement awareness-raising campaigns to inform workers, employers, and unions on the 2019 Labor Reform. 3. Over 40,000 individuals have been reached by information published by STPS on their website and social media regarding the labor reform.	
Name of Applicant/ Subrecipient	**Agency**	**Agency Contact Information (Name, telephone, fax, e-mail)**	**Name of the Project and Instrument Number**	**Funding Amount**	**Country of Implementation and Period of Performance**	**Key Accomplishments and Outcomes**	**Description of how this reference relates to the objective and outcomes of this FOA**
Partners of the Americas	U.S. Department of Labor (USDOL)	Lorena Davalos, (202) 693-4835, (202) 693-4830, davalos.lorena@dol.gov	EducaFuturo IL-23988-13-75-K	$8,125,000.00	Ecuador and Panama 2012-2018	EducaFuturo was a US$8.125 million project funded by the US Department of Labor (USDOL) International Labor Affairs Bureau (ILAB). The implementation period was from December 27, 2012, to December 26, 2016. The general objective of EducaFuturo was to reduce child labor and increase school enrollment among children 5 to 17 years old, especially those belonging to indigenous, afro-descendant and migrant populations in Panama and Ecuador and among children with disabilities in Ecuador, as defined in the Comprehensive Monitoring and Evaluation Plan (CMEP). The specific objectives were to improve educational outcomes for children and adolescents involved in child labor; and improve family income so that households do not need to rely on the work of children for their survival. **The Expected Outcomes of the Project Were:** **Accomplishments:** 1. EducaFuturo implemented activities in four provinces in Ecuador and three provinces and two comarcas in Panama, specifically targeting Afro descendants, indigenous, and migrant populations. In Panama, EducaFuturo partners with local implementing agencies Fe y Alegria Panama, CoSPAE and APROTENGB. And in Ecuador, EducaFuturo partners with FUDELA, ExpoFlores and Communidec. Funding for this program was provided by the U.S. Department of Labor. 2. EducaFuturo offered educational services and institutional capacity building, mostly through its two proven methodologies: Espacios para Crecer (EpCs) and A Ganar, and developed a Livelihoods approach to increase income opportunities for households. 3. EducaFuturo established linkages with public and private child labor initiatives, developed alliances with public and private sectors to help strengthen their policies and effectiveness in	EducaFuturo demonstrates POA's ability to partner with local and international stakeholders to develop capacity-building strategies and monitoring mechanisms. The project's activities included not only the provision of direct educational services to children in Ecuador and Panama, but also offered trainings to educators and facilitators on the Quantum Learning methodology. As such, the project demonstrates POA's ability to improve the capacity of local officials and actors, ensuring the institutionalization of proposed mechanisms. Additionally, EducaFuturo demonstrates POA's ability to engage local, regional, and international stakeholders in efforts to increase capacity. EducaFuturo allowed POA to develop and maintain a strong network of allies in Ecuador, whose interests include the defense of human and labor rights. For the purposes of this FOA, POA would engage and expand upon these existing connections to ensure efforts to strengthen mechanisms to address labor violations in the target sectors are approached in a collaborative and well-supported manner. EducaFuturo's success was based largely in its ability to reach and support children and households from diverse backgrounds. As such, the project demonstrates POA's ability to maximize the reach of project activities, particularly to traditionally underserved communities. POA will engage existing networks and build upon our previously successful strategies to engage workers and raise awareness on labor rights, acceptable conditions of work, child labor and forced labor. Along with the provision of direct services, EducaFuturo's activities included awareness-raising and educational efforts targeted at communities and populations at the greatest risk of child labor. As this FOA seeks to raise awareness among workers of their labor rights and remediation mechanisms, POA will employ and expand upon the successful public engagement and communication efforts of EducaFuturo in proposed activities. Our ability to reach, educate, and provide resources to diverse groups of workers will prove invaluable for ensuring maximum reach and longevity of project activities.

							addressing child labor; conducted awareness-raising efforts at the national and local levels promoting the value of education and educating on the impacts of child labor; and finally, conducted research aimed at filling the gaps in child labor -related knowledge, especially in the coffee, banana, and plantain sectors. 4. EducaFuturo was effective in achieving its objectives. EducaFuturo met its targets in providing educational services to a wide range of communities in Ecuador and Panama. Throughout the life of the project, 6,183 children and youth engaged in or at high risk of child labor were enrolled indirect educational services in 81 communities (47 communities in Ecuador and 34 in Panama). Of this total, 46.5% of children and youth were indigenous and 15.7% were afro descendants. 5. Both the Final Evaluation and the Endline Survey (ELS) Reports reveal that the strategy and methodologies implemented by EducaFuturo were effective in achieving results. In addition, there is evidence that these methodologies and interventions will be sustainable over time as they have been adopted by schools, local and national government institutions, private sector entities, and civil society organizations, working in the target areas. For example, there is a solid foundation in place in many schools, with trained educators and Facilitators, which will allow the Quantum Learning (QL) methodology to continue being used. At the decentralized institutional levels in the areas where the EpCs operated in Ecuador, the EpC model is now incorporated into their services. 6. A total of 1,758 households were provided with direct Livelihood services. Livelihood services consisted of technical training, seed capital (in the form of equipment/supplies), and assistance accessing the network of social protection offered in each country, and monitoring progress. Out of the total, 1,113 households were from Ecuador and 645 from Panama. 7. 13 EducaFuturo Days were conducted in five provinces of Ecuador and four provinces in Panama, with the participation of 1,190 direct beneficiaries. 8. Six different communicational products were used to disseminate information on child labor issues. The communication products are media mapping, success stories, infographics with the relevant information of the Project results, informational brochure, USB with the manuals for EpC and A Ganar for children and youth with disabilities, and a digital library (http://partners.net/bibliotecavirtualEF/). 9. Three research studies were undertaken by EducaFuturo in Panama: two Task Mapping and Comprehensive Social Reviews (CSR), one in the coffee sector and another in the banana/plantain sectors, conducted by the International Initiative to End Child Labor (IIECL). The CSR analysis produced seven Codes of Conduct: four with coffee producers, and three with banana and plantain producers. The third corresponds to a preliminary study to combat child labor in the mining sector of La Pintada, Colón, Panama, was conducted by the Universidad Especializada de las Americas (UDELAS). 10. EducaFuturo developed a Comprehensive Monitoring and Evaluation Plan (CMEP) for the initial phase of the project	EducaFuturo demonstrates the sustainability of POA's efforts to promote human and labor rights. The project's final evaluations revealed not only the success of activities during project implementation but projected continued effectiveness and sustainability of interventions. Activities including trainings for officials and engagement with multiple interested parties from the public, private, and civil society organizations sectors demonstrate a commitment to implementing long-term strategies that increase the capacity of local actors to continue to promote the defense of human and labor rights. POA's successful engagement with government ministries and officials in Ecuador demonstrates an ability to institutionalize project outcomes and objectives, ensuring their sustainability through legal mechanisms. Additionally, our facilitation of exchanges and partnerships between local stakeholders including worker organizations and authorities allows for synthesis of efforts and strategies, increasing efficiency and sustainability of efforts to promote acceptable conditions of work.

						implementation and completed a revision for the extension period. 11. 124 teachers and Facilitators were trained in the QL methodology and were certified as QL trainers with the purpose of increasing their knowledge and capacity to address CL issues.	
Name of Applicant/ Subrecipient	**Agency**	**Agency Contact Information (Name, telephone, fax, e-mail)**	**Name of the Project and Instrument Number**	**Funding Amount**	**Country of Implementation and Period of Performance**	**Key Accomplishments and Outcomes**	**Description of how this reference relates to the objective and outcomes of this FOA**
Prime: Winrock International Sub-Awardee: Partners of the Americas	U.S. Department of Labor (UDOL)	Chris Wooley (Winrock International) 703-302-6552 chris.wooley@winrock.org	Attaining Lasting Change for Better Enforcement of Labor and Criminal Law to Address Child Labor, Forced Labor, and Human Trafficking (ATLAS) IL-3281-18-75-K (Subaward Number: 6891-19-A-02)	$1,487,873	Paraguay April 2019-October 2022	The ATLAS project works to increase the capacity of host governments to reduce child labor, forced labor, and human trafficking in four countries: Paraguay, Thailand, Argentina, and Liberia. The project's scope involves identifying roles and responsibilities of government and other relevant stakeholders, mapping existing social protection programs and coordination systems, processes, and activities, assessing gaps and weaknesses in existing coordination within and among law enforcement and social protection entities, and establishing or improving the existing coordination framework. As a sub-awardee to Winrock International (WI), POA is leading the implementation of project activities in Paraguay. **The project's expected outcomes were:** 1. Strengthened labor and/or criminal legal frameworks concerning child labor, forced labor, and/or human trafficking. 2. Improved enforcement of labor and/or criminal legal frameworks, specifically related to child labor, forced labor, and/or human trafficking. 3. Increasing coordination among law enforcement and social protection entities to address child labor, forced labor, and/or human trafficking. **Key accomplishments** Comprehensive Training Program 1. Development of a training manual on an integral approach to child labor, forced labor, and human trafficking. 2. Development of a training program, "Comprehensive Approach to child labor, forced labor, and human trafficking," which has been integrated into the curriculum of the Higher Institute of Police (ISEPOL) Education of the National Police and in the Technical Training Office of the MOL. 3. Implementation of 16 trainings for nine judicial and social protection institutions in Paraguay. 4. Development of a kit of didactic educational materials on child labor, forced labor, and human trafficking for the International Center of Judicial Studies (CIEJ) of the Supreme Court of Justice (CSJ) and the Superior Technical Institute of the Ministry of Public Defense (MDP). 5. Development of a guide for the treatment of adolescent labor proceedings within the jurisdiction of children and adolescents. 6. Development of a practical tool to calculate compensation for victims of human trafficking: "Estimation of Damages to Victims of human trafficking: Criteria for Claiming Fair Compensation in Criminal Proceedings," aimed at members of the Specialized Unit of the Public Prosecutor's Office (MP).	The ATLAS Paraguay project has strengthened the capacity of judicial and social protection institutions to legally enforce violations of child labor, forced labor, and human trafficking through a strengthening of legal frameworks and inter-institutional coordination. Through the project's Inter-Platforms Coordination Mechanism, Human Trafficking Roundtable, and Living Lab, **POA provided technical support to improve the organizational resiliency, technical capacity, and coordination of Paraguay's three interinstitutional coordination platforms that address child labor , forced labor , and human trafficking** at the central level: the National Commission for the Eradication of Child Labor and Protection of Adolescent Labor (CONAETI); National Commission on Fundamental Rights at Work and Prevention of Forced Labor (CONTRAFOR) and the Inter-institutional Roundtable to Prevent and Combat Trafficking in Persons in the Republic of Paraguay (Human Trafficking Roundtable). POA will build on its experience bringing together institutional stakeholders involved in addressing child labor, forced labor, and human trafficking in Paraguay, applying our understanding of inter-institutional coordination regarding labor rights to expand coordination amongst stakeholders. In addition, POA will draw on its extensive knowledge of communications networks in Paraguay and its awareness-raising material created under the framework of the ATLAS project to create engaging tools and resources to increase the capacity of civil society organizations / civil society organizations to advocate on behalf of workers. POA has experience strengthening the capacity of civil society organizations to understand and provide compensation to victims of child labor, forced labor, and human trafficking. By creating a space to bring together key stakeholders from Paraguay's law enforcement and social protection institutions through the Living Lab, POA has led efforts to increase the capacity of civil society organizations to identify and calculate victim compensation. Having established mechanisms by which to strengthen such capacities in the institutions involved in the ATLAS project, POA would utilize its knowledge of training methods and stakeholder engagement to provide similar capacity building to strengthen the capacities of civil society organizations /worker organizations in Ecuador to provide services to workers and families.

						Living Lab 1. Convened a group of 22 experts to address the topic of compensation to victims of child labor, forced labor , and human trafficking . 2. Held two international exchanges, including a seminar, two facilitate sharing of best practices and lessons learned related to legal treatment of child labor, forced labor, and human trafficking cases with judicial experts from Argentina and Brazil. 3. Development of a final Living Lab document containing analysis, recommendations, and best practices to guarantee effective access to compensatory damages for victims of child labor, forced labor, and human trafficking, including methodology of work carried out in the framework of the Living Lab, and presentation of this document to members of the Living Lab Working Group and high authorities of the CSJ, Public Ministry (MP), MDP, and MOL.. 4. Reception of a declaration of commitment by the Living Lab Working Group to promote the implementation of the recommendations in the final Living Lab document in their respective institutions. Moot Court 1. Facilitated a mock trial competition amongst 20 teams made up of 59 representatives of Paraguay's judicial institutions to promote increased competencies on issues of child labor, forced labor, and human trafficking. 2. Developed a training program on child labor, forced labor and human trafficking and implemented 46 trainings in the project's five targeted territories throughout the country (Boquerón, Ñeembucú, Caaguazú, Guairá e Itapúa), resulting in the certification of 132 members of Paraguay's Departmental Commissions for Human Trafficking and 649 other officials from Paraguay's judicial and social protection institutions. Inter-agency Coordination Platform 1. Produced one public policy analysis document and one document on enforcement procedures each of which were validated by the National Commission for the Eradication of Child Labor and the Protection of the Adolescent (CONAETI), National Commission on Fundamental Rights at Work and Prevention of Forced Labor (CONTRAFOR), and the Inter-institutional Roundtable to Prevent and Combat Trafficking in Persons in the Republic of Paraguay (Human Trafficking Roundtable). 2. Developed a matrix of common indicators shared by child labor, forced labor, and human trafficking strategies to facilitate informed and effective implementation of both these strategies and Paraguay's 2030 National Development Plan. 3. Developed a training program on child labor, forced labor, and human trafficking customized to meet the operational context of each of the project's five target territories (Boquerón, Neembucú, Caaguazú, Guairá and Itapúa.) Communication Strategy 1. Carried out four communications campaigns focused on Decent Work; *Criadazgo* (a form of domestic child labor); human trafficking; worst forms of child labor; and international human trafficking for the purposes of sexual exploitation. 2. Developed and disseminated three radio micro-programs, two radio spots, and two animated television shorts, each of which reached 1,500,000 nationwide. 3. Created 21 informational publications on child labor, forced labor, and	

						human trafficking issues and distributed 75,000 copies. 4. Implemented 11 productions of a play focused on raising awareness of human trafficking in Paraguay, in 11 districts across 7 departments of Paraguay to 1,441 attendees. 5. Developed a digital library compiling the project's communications material and informational resources which was shared with key stakeholders and the public for future use. 6. Developed and distributed 150 communications kits to the project's allied institutions at the central and local levels within the project's prioritized territories for use in trainings, awareness-raising campaigns, and other child labor, forced labor, and human trafficking prevention activities.
